Thread: [\[TEST\] &\[b\]#34\[/b\]; Cracking &\[b\]#34\[/b\]; Bios Password !](#)

Rackzen - July 20, 2013, 6:12 pm

Hi HackForums people , i'm writing this thread because i'm testing a BIOS Password " Cracker " ..

Ok , so when you try to access at your BIOS , he ask for a password like that -

[img]http://4.bp.blogspot.com/-t5BfWDcxDsl/URAgKKeouJI/AAAAAAAAABY/6Ee4k3VEukw/s320/pas
sword+bios.jpg[/img]

Then you think : " OMG , i didn't put any password .. So what is it ? "

No Problem i have the solution (i think xD) .

Let's go , so when the computer ask for the bios password write anything like : " asasasas" 3 Times !

Then you will get an error like that -

[img]http://hackadaycom.files.wordpress.com/2010/10/bios-password-bruteforce-e1286462689572.j
pg?w=470&h=175[/img]

Don't worry , just pick the error code E.G: 07437 , and the computer model .

Then post here like : Acer - 00000 , and i will try to help as soon as i can !

PS: Sorry for my bad English ! :s

Pcaptain27 - October 16, 2013, 5:07 pm

after i attempt the password three times the computer shuts off
what do i do?

Why don't you change the password on your own bios system and test it.

Rackzen - October 17, 2013, 3:28 am
