Thread: [Removed Removed Removed](#)

Mr.Dom - July 20, 2013, 6:26 pm

I got my answer so i removed the thread.

Thank you.

?Screamo - July 20, 2013, 6:36 pm

Care to post more proof? Maybe a video?

Mr.Dom - July 20, 2013, 6:43 pm

(Jul 20, 2013 06:36 PM)?Screamo Wrote: [\[CITE\]](#) Care to post more proof? Maybe a video?
I was just creating but my camtasia studio was corrupted.
Will upload the video within some days.

Thank you.

?Screamo - July 20, 2013, 6:46 pm

Fair enough. Remember to update the OP when you're done with the video.

Mr.Dom - July 20, 2013, 6:47 pm

(Jul 20, 2013 06:46 PM)?Screamo Wrote: [\[CITE\]](#) Fair enough. Remember to update the OP when you're done with the video.
Ya, i will only sell my program when the video is ready.

Thank you.

-Dartz - July 20, 2013, 6:56 pm

I was thinking around \$20-\$30, haven't seen a program like it.

Does this remove the password, or does this find it for you through bruteforce?

Mr.Dom - July 20, 2013, 6:58 pm

(Jul 20, 2013 06:56 PM)-Dartz Wrote: [\[CITE\]](#) I was thinking around \$20-\$30, haven't seen a program like it.

Does this remove the password, or does this find it for you through bruteforce?

Ya, this much money is good.
????

Tibal - July 20, 2013, 7:03 pm

Something very unique here, I've done some research and i haven't seen this here, or on any other forum. Good luck with sales.

Shadowfita - July 20, 2013, 7:04 pm

(Jul 20, 2013 06:58 PM)Mr.Dom Wrote: [\[CITE\]](#) Ya, this much money is good.
????

Since you didn't answer his question properly, and I'd like to know too...

It removes password.

????

Thank you.

Tenaxium - July 20, 2013, 7:14 pm

This looks very good, id love a vouch copy when it comes out and I will make a High Quality review.

Z0mbie. - July 20, 2013, 7:29 pm

will buy this if it does what it's supposed to.

Mr.Dom - July 20, 2013, 7:31 pm

(Jul 20, 2013 07:29 PM)LulzCat Wrote: [\[CITE\]](#) will buy this if it does what it's supposed to.
It will 100% do what it should do. ?

MultipleChoice - July 20, 2013, 7:32 pm

Looks really nice, I'd buy this if it comes out and works

Mr.Dom - July 20, 2013, 7:34 pm

(Jul 20, 2013 07:32 PM)MultipleChoice Wrote: [\[CITE\]](#) Looks really nice, I'd buy this if it comes out and works

Everyone want to buy it ? , did not think that it is so amazing program.

?

PoLoW - July 20, 2013, 7:38 pm

I would get a Vouch copy if that's what it takes , This will be a good tool and you will get sales to it OP .

GL

Casual - July 20, 2013, 8:04 pm

Hasn't even started selling and vouch copies are already being asked for.

Jesse Pinkman - July 20, 2013, 8:15 pm

I would defiantly purchase this. We need more proof though. One cannot simply "remove" a rar password... because if it was possible someone would have done it by now.

imposition - July 20, 2013, 8:18 pm

I can't believe anyone is actually believing him lol.

Slash3rX - July 20, 2013, 8:21 pm

i will give you a rar with password open it and uploaded it without password then i'll believe it

Tutelary - July 20, 2013, 8:54 pm

(Jul 20, 2013 08:15 PM)Jesse Pinkman Wrote: [\[CITE\]](#) I would defiantly purchase this. We need more proof though. One cannot simply "remove" a rar password... because if it was possible someone would have done it by now.

Exactly. People far more tech-savvy have tried and failed. I'd LOVE to see what method this is. If it's bruteforce, then it's already been done before. If it's some hidden exploit not found before, I'd say it's worth some money, but it'll be patched soon.

Violation™ - July 20, 2013, 8:57 pm

Is this a remover or cracker? If its a cracker it could take years for it to become removed.

Darkwin - July 20, 2013, 9:17 pm

If this works omg i could make profit, Believe it or not this was the reason i came on HF to begin with to find someone that could open a locked archive.

Solid Cloud - July 20, 2013, 9:20 pm

I would price it out with support levels like Crypters here. If you want a lot of sales \$20-30, but for a one of a kind product I can see it being upwards of \$50. Hope this helps.

Cody8295 - July 20, 2013, 9:24 pm

It just removed the password? How is that even possible? The contents are encrypted...

Mr.Black - July 20, 2013, 9:36 pm

I can't believe OP, how can you remove the password without corrupting the file contents?

BlueRey - July 20, 2013, 11:10 pm

if that program relly delete the password i think - 30\$. or more. because not have like this program (if that work...)

iamvillain - July 20, 2013, 11:16 pm

Its IMPOSSIBLE.

What makes you think this kid with 60 posts is able to do things professionals with years of experience can't?

In theory its possible, in practicality it is not.

Tibal - July 21, 2013, 1:01 am

WinRaR use's AES, which as of 2013, has no known backdoors. The only current way of cracking a password is via bruteforce, if would require a number of years to crack a password that has even the slightest complexity. This is fake. WinRAR compressed archives uses the Advanced Encryption Standard which implements the Rijndael cipher using a 128-bit key - there are no known backdoors for Rijndael cipher (via the 128 bit key).

Casual - July 21, 2013, 1:17 am

You realize stats on a public forum mean nothing right?

Not saying that you're wrong about the program, simply saying stats on a public forum do not show experience and Intelligence.

I have seen people with really high "U3ber hack forum l33t stats" who are complete Idiots, and I have seen people with 30 posts who know more than most on this forum.

Bat™ - July 21, 2013, 1:26 am

Would like to see it in action. I will give you a rar file with a txt file in with with some random code, see if you can crack it.

Mr.Black - July 21, 2013, 3:02 am

Unless you have a PC working by photons just to brute force fast enough.

Krew - July 21, 2013, 3:35 am

Is this instantly or does it have to crack it?

Alex™ - July 21, 2013, 3:39 am

(Jul 21, 2013 03:02 AM)Mr.Black Wrote: [\[CITE\]](#) Unless you have a PC working by photons just to brute force fast enough.

"working by photons"? What you might mean is a quantum PC.

kalandershihabrocker - July 21, 2013, 6:01 am

If it removes password without Brute-Force, You can have my money.

Leg?nd - July 21, 2013, 6:05 am

lol @ people thinking this is possible(even if it was why the fuck would you sell it for \$30)

Michael - July 21, 2013, 6:10 am

I want to check this out if you release it.
Seems nice.

?????Thr????? - July 21, 2013, 6:13 am

You do realize that the contents of the archive are encrypted with a password....? You won't achieve what you want to do without brute forcing it.

Bigass - July 21, 2013, 6:15 am

Fucking retarded kids.
It's the old trick of converting a .rar to .zip.
You can do it online.

Sleazy P. Martini - July 21, 2013, 6:16 am

I can see this thread being like the runescape IP resolver thread 1ish year ago

Harold Wren - July 21, 2013, 6:17 am

Looks quite good and would be a handy tool

Bigass - July 21, 2013, 6:18 am

All the friendly people who actually believe in it should be bitch slapped and molested by their own family.

Bull™ - July 21, 2013, 6:47 am

Its a Fake program if you know the winrar encryption then you will never talk bullshit.

I can easily make a fake program in visual basic 2010 but it will be never work lol . So at the end stop talking bullshit Idiot.

Snoepie1012 - July 21, 2013, 7:14 am

Seems extremely fake, if I was you I would make that video quick and proof it.

+ you say everyone that posts here get a vouch copy, if you actual had this you would never do that.

(Jul 21, 2013 06:16 AM)Richard Z. Kruspe Wrote: [\[CITE\]](#) I can see this thread being like the runescape IP resolver thread 1ish year ago

Haha exactly the same story.

Neil deGrasse Tyson - July 21, 2013, 7:28 am

You shouldn't have posted this thread without having a video ready, You are bound to be called a "faker" untill you post some proof.

Mr.Dom - July 21, 2013, 7:35 am

(Jul 21, 2013 07:28 AM)Singularitet Wrote: [\[CITE\]](#) You shouldn't have posted this thread without having a video ready, You are bound to be called a "faker" untill you post some proof.

whatever anyone say me i do not care. But i know is that the program works.

?????

SIM-1589588 - July 21, 2013, 7:50 am

INB4 he gets his bot crypted and sends everyone a vouch copy.

Neil deGrasse Tyson - July 21, 2013, 7:58 am

(Jul 21, 2013 07:35 AM)Mr.Dom Wrote: [\[CITE\]](#) whatever anyone say me i do not care. But i know is that the program works.

?????

So you don't care about your protential customers?.

Why even post in the first place if you don't care?, Seems kinda pointless to me.

.?cb. - July 21, 2013, 8:01 am

Tomorrow +20 threads of people crying because someone rat him and steal his minecraft account ...

There is no ways to remove a password of a rar file, only bruteforce.

Neil deGrasse Tyson - July 21, 2013, 8:05 am

^

This!, Which is exactly why he doesn't care to post proof.

I mean even if he did "remove" the password, The content inside would still turn out encrypted?.

So what good would that do, this is kinda like the .rar to .zip converter that also removes the password but the content inside would still be encrypted.

[EDIT]

Apparently he decided to remove the thread.

Mr.Dom - July 21, 2013, 8:07 am
