Thread: [Null Email Spammer](#)

Vaxorr - July 21, 2013, 4:42 pm

hey all hackforums members

i am introducing to you my latest project in learning VB>NET

its gmail email spammer

it can spam gmail emails

its very fast and realible as it can send about 50 messgae per min and higher

any way here is the screen shot :

project on sourceforge : <http://www.sourceforge.net/p/nullemailspammer/>

Download : [here](#)

please give me your comment and opinion below

?

I would assume.Ohhh i thought it was a spoofed email bomber =/

Now i see that you actually have to sign in to use this, good way to get your gmail banned lol;'.
Anyways thanks for the response, i should have read the thread a bit better.
