Thread: [how to extract mp3 from website ?](#)

Sun8 - July 22, 2013, 1:59 am

Hello

I have found a ftp website with a lot of mp3 loops, and I search a method to extract all theses mp3 loops to my computer , how to do ?

Xen_ - July 22, 2013, 2:02 am

Wait are you saying you have FTP access to the files?

Maybe post a screenshot.

Murphys_lawless - July 22, 2013, 2:04 am

Pm me the link to song and I can get it for you without a problem.

Sun8 - July 22, 2013, 2:33 am

yes I have access to the ftp, because there are no passwords, and there are a lot of free loops songs.

But my keston is , how to extract all theses mp3 from this ftp

Xen_ - July 22, 2013, 3:15 am

Highlight the ones you want in your FTP client, then drag then to your desktop.

lol

How to extract all mp3 songs on this big list ?

<http://www.producerloops.com/files/audio/> gift

SIM-574702 - July 22, 2013, 4:41 am

You're doing it wrong. Don't access FTP from browser, access it from FTP client. That way you can download whatever you want.

I suggest File Zilla

<https://filezilla-project.org/download.php?type=client>

EDIT: Is downloading like this legal because when you go to FTP client it won't show any files.

Sun8 - July 22, 2013, 4:47 am

hum

I search to get all mp3 songs on this list

<http://www.producerloops.com/files/audio/>

I dont need ftp and I dont want download 1 by 1

SIM-574702 - July 22, 2013, 4:52 am

That's why you would use client but does site have FTP access, this isn't real FTP.

SIM-1241186 - July 22, 2013, 9:31 am

This isn't FTP at all. To use an FTP client, you need to connect with the FTP information. You've said you had FTP access. All you have is directory listing, because they didn't CHMod.. so you can freely view the files.

This is an example of FTP;

<ftp://producerloops.com/>

And to answer your question, this looks like exactly what you're wanting;

<http://www.raymond.cc/blog/how-to-download-all-files-from-a-folder-on-a-website-or-ftp/>

With those links, I was able to use wget to download them pretty easily.

If you're running Windows, you can get a windows verison of WGET by just a simple google search.
