Thread: [\[TUT\] *UPDATED* How to make a fake fan sign!*](#)

Sweetie - July 22, 2013, 10:23 pm

Hello HackForums, I will be teaching you guys how you can Photoshop a fake Fansign!

Just follow these steps!

- 1) Open the image you want to Photoshop.
- 2) Use the "Spot Healing Brush Tool" and go over the text that's already on the sign.
- 3) Use a realistic font and type what ever you desire on it. (If you have a tablet try using that). Make sure to align the text with the sign.
- 4) Click the text layer and go to Filter>Blur>Gaussian Blur. Adjust the settings to where it is a little bit blurry but you are still able to read it.
- 5) Now, click on the text layer and under the layers tab, change "Normal" to "Linear Burn". Now adjust the opacity until it looks legit.

Finished Product

This tutorial is extremely old, I have new updated methods of manipulating these type of photos.

rudeness_e99 - September 16, 2014, 8:13 pm

how can i add a fan sign to an existing picture that doesnt already have it and make it look good?

Sweetie - September 16, 2014, 8:16 pm

Depends, if both papers have the same lighting, shading, and color. Simply take the photo with the text and erase everything around the text. Now put the text over the empty fansign. Now, you mess around with the settings until the background blends and the text fits perfectly.

ashpokeman - September 19, 2014, 6:59 pm

Useful tutorial, although you can notice a slight edit in the card, as you can see it has lines going through the card, but not in the text.

I would try to edit the lines to make it look like its more realistic.

Uhm, holy shit, this tutorial was written in 2013, I don't quite remember.

The result is SO suspicious, I mean at least for me since I use Photoshop I would totally find those little glitchy spots and this font totally fake. Anyhow good job!
