(Jul 31, 2013 02:02 PM)Devskirt27 Wrote: [\[CITE\]](#) had a look at the previews but they seem a little laggy, do you have other girls than these 4 to preview? thanks

No i don't, In regards to the laggyness Manycam only works according to your computer's hardware. If the computer your running on is slow, then its going to lag your system loading so many packs at once.

Another issue could be you don't have the klite codec, Because the packs themselves are not laggy... Its impossible for a video clip to be laggy lol.

Chris3331 - July 31, 2013, 9:06 pm

Just bought a pack, looks like it could be effective.

Upon purchase you will receive an .RAR file which contains the video pack in clips, I will also include directions on how to get started. Once you purchased it, its yours lifetime, However soon i will be adding an option for package updates meaning if you want an certain action or etc. i can get it done for you.

Those '4 little circles' only happen with manycam, Its obvious that if your computer doesn't meet minimum requirements then its going to lag out, its only common sense.

Also i don't appreciate you coming on our thread sales trashing!

There's mutual hatred between myself and Darkwin + Electrode which is understandable but I can

vouch on his behalf. I can tell you, that the process of getting VCWs (legitimate or not) is much tougher than what Dallan has said. There's no way to steal videos from porn sites and make it into a comprehensive VCW. I'm not going to explain how to create VCWs as I am no master and it's a trade secret but I can say that Dallan is simply sales bashing like he did on my old thread. I don't care if Dallan negative reps me, I am telling you the truth.

Dallan, it's pretty sad how you have to bash other's products to promote your own, that's a pretty whack ass business you run.

P.S. Darkwin, I am in the process of updating my thread design ?

Doubt you're able to get these "for free" since we've sold them to only the most trusted users and limited copies, We've heard about many users scamming becareful. Wish you the best!

We have just added a CUSTOM VCW service with FULL resale rights.

Refund? First off the flash version wasn't even mandatory to be included with the product if you read the thread it was merely an bonus, Bottomline being you paid for our VCW pack and NOT a flash VCW we included a flash VCW later on as a BONUS because of demand and users asking us to make one.

Bought Erika today. Well what shall I say. Setting it up is pretty easy and the model is beautiful. Everything seems smooth but you have to use the actions at the correct time to not interrupt it. I think I have to get used to it. Nevertheless it has lots of \$\$\$-potential :) And there were also a few gifts inside the download which made me feel like a little kid on christmas.

The dozens of leaked VCW's can't do what this master piece can. I mean there are so many options to do as proof only.

But sadly no money received today after 2 hours of work but that's not the VCW's fault ^^

Thank you and also ty for helping me to how to use it :)

UPDATE:

- It took me some convincing but i now have a small picture pack of Erika and MAYBE more to come :) for an additional \$5 for new buyers & FREE for previous clients, Everyone will receive this picture pack (no nudes) just 17 HD lifestyle pictures.

- As of 2/8/2014 there are only a few Lucy copies left.

- We have just hired our new male model "Sean" for our upcoming VCW and we're in the process of signing an African American model.

A huge Thanks to our clients for all the support you have given us, We are glad to see our products are helping you gain much profit.

hughjazz - February 16, 2014, 12:39 pm

Just wanted to vouch for Darkwin and Electrode again. I've been using "Cindy" for a couple of days and I've already made my money back and then some. Here's [some proof](#) of that. Have another 20 pounds on the .co.uk website.

It also has a long show (15 min) so there's no reason to scam anyone either. A little heads up that some webcam control buttons show up right at the end of the 15 min nude show. It's nothing major at all since you'd have gracefully stopped the show by then anyway.

melvin084 - February 16, 2014, 1:31 pm

I'm not exactly sure what you mean by "they look fake asf" when most of our VCW are as natural as it gets, Specially since we've converted several of our most premium ones to Flash.

As for the experience, Just see for yourself all our vouches and users whom have posted proof of earnings!

Been watching a lot of streams lately, Lucy vcw is simply amazing. She literally does every proof those sneaky pervs demand, and if they demand something astronomical then there is always a double middle finger command to set the bastard straight ;) Not to mention that she is smoking hot, Darkwin himself probably busted a nut or two during the recording session. Definitely would recommend to everybody (would buy myself if I didn't have my own personal vcw)

Darkwin, I'll be honest with you and hopefully don't get bashed but the VCW I bought off you before for 30 bucks was awesome, except the editing was horrible, one action even showed you moving your mouse or something, and the transitions made it horribly obvious that it was fake, are these VCW's at least different than that? After problems with downloading (2x wrong Password given to me), Darkwin uploaded it again for me. Without the Pics of her. I asked him and he wrote that he doesnt have any Pics of her. But the Thread is saying that you will get 30 Pics of her. [Hotlink to Proof Image](#)

Bad thing. Also the Files of Samantha 3in1 are in .wmv format. How should i use this for manycam? No tutorials or something like this. Im really disappointed. But: The .wmv Files are High Quality.

Im not trying to crash Salestthread but how should i contact you if you are 20 Mins online each day? I will remove this after providing better Support.

I'd like to think that i provided more than adequate support, I wasn't "only on for 20-minutes a day" i'm pretty much online 10-hours a day and even when i'm not home i receive messages on my phone. As for the Samantha pics issue, I may be wrong which is why i asked you to please wait until my partner Electrode is online.

We will try to get you the pics needed otherwise we will compensate you, Thank you for your business!

PS: Reason my partner hasn't been able to provide support is partially due to his country being blocked and him being unable to access HF.

UPDATE: I have sent you the pics although it wasn't the exact quantity, It is better than not having them.

The sample pic is the non-converted version which is just the .WMV's so that they can be imported & used with Manycam, That is the reason why we don't like to convert our VCW's to Flash because it diminishes the quality.

If you want the HQ WMV's i will send them to you now, Thank you again for your business!

I don't understand what you mean by 'tried', Its an very straightforward system. You pay via the

auto-buy, Send us the required info and i will process your order immediately. No one else seems to have any issues with it, So i don't understand what the problem is.

It is auto-buy because you receive the product soon as you buy, You just have to wait for a password and that's to avoid chargebacks. A countless amount of times buyers have attempted to scam us by buying the product and immediately chargingback.

It's not a lie at all.

Is the download broken then because the only thing I received in from my email was a .txt file. Perhaps I've just had issues with the download and I was wrong but I did not receive the pack after paying for it. I understand that you want to protect your ass, no one likes scammers. BUT on the

buyers end however the thread says auto buy, but after paying you're given a download link to a notepad telling you to pm either you or Electrode on HF. That is not an automated process and 25 mins after paying for the product I still haven't received it.

You did however take the time out to try and save grace in your thread rather than giving me what I've paid for, which shouldn't even be necessary if it were truly and automated process.

First off i was being as kind and professional as possible, I just woke up and the first thing i did was get your order ready. However one thing i will not tolerate is you attempting to bash our business on my own thread.

I wasn't "saving my grace" i was re-uploading the packs files as we spoke, but after finding they were already uploaded before to another Mediafire account i cancelled the upload half way thru. Frankly if i would've known you were going to be this rude of an customer i would've canceled your order from the get-go, I'm not desperate for your money to the point that i should bend over and take it. Just so you know...

Uncertain - April 4, 2014, 4:07 am

You're taking it personal when it is not, if you're claiming to be providing an automated service it should be automated.

No one is asking you to bend over and take anything, I'm simply expressing my dissatisfaction with the service provided. If you don't like that then don't lie about what you're selling it's that simple.

No one is lying about anything that's the thing, It clearly says AUTO BUY not INSTANT and you are receiving the files once you pay... the thing is they have a password for security purposes. Also if you read the .txt file it says something along the lines of "Your order will be processed instantly when we're online."

I wasn't online during the time your placed the order therefore, It took an few hours more than usual. For the record i'm not taking it personal i simply dislike customers whom give an hard time and blow things out of proportion when it isn't necessary.

Darkwin - April 4, 2014, 12:32 pm

(Apr 4, 2014 08:53 AM)K Dot Wrote: [\[CITE\]](#) The fact is Auto Buy is perceived as being able to pay for something and immediately receive it after you've paid. You aren't doing anything wrong but you should just change it. What you should not do is argue with potential repeat customers while making yourself look bad in front of possible first time customers.

Adding passwords to auto-buy files is an practice which many vendors throughout HF do, It has saved me in the past from potential scammers since i've had numerous members download and immediately chargeback however when they realize the file is locked they message me apologizing and trying to come-up with excuses to justify there scamming tendencies.

I don't plan on changing it now or ever, I provide almost instant support when i'm online and if any of our customers isn't capable of waiting an few hours to receive an product then perhaps they shouldn't buy from us, As a matter of fact i'd recommend them to purchase from other VCW vendors instead.

We cater our business to mature & experienced e-whore's, NOT 12-year olds whom throw an hissy fit when they can't get things there way. That being said i appreciate our loyal customers for being part of our business, Thanks for lurking the thread.

No ones throwing a hissy fit, you've clearly just never held a real job.

You obviously also have some sort of mental problem judging by your inability to admit that you're both wrong and very unprofessional.

But hey, who cares if you can't hold a conversation offline if you can ewhore and sell vcw's to pay the bills.

What are you talking about? How do you expect me to maintain my professionalism when its obvious you're just continuing to instigate, Like for example right-now i wasn't even referring to you i was speaking to the member above me about what's happened in the past, Yet here you come back feeling the need to stir-up drama.

You got your product now kindly leave this thread, Any offtopic post will be brought to the attention of staff and reported. For the record since you must know i have several online businesses from which i profit from, I don't need to sell VCW's nor do i do it strictly for the money. GG!

So how do I use this efficently without flash???

I really don't get it.. Because switching between every action will cause a black screen and wont look legit WHAT so ever

So could anyone fill me in or help me before I waste money

And with Lucy is there a proper show, like a 10 minute thing so the buyers dont chargeback? Also is there a delay in when they change video clip? And is there anything I need to download?

There is an 8-minute nude show included with Lucy as well as an pic pack, You will not need anything else besides Manycam so that you can screen capture and show as webcam.

First off the flash version includes a strip show and nude show as well totaling in 8-mins as i explained to him via PM. Also its obvious your intent for the past couple of days has been to stir-up drama and maybe even sales trash indirectly, therefore i'm going to kindly ask that you refrain from posting on our thread.

No, But there is an reason why there is an 'report spam' option. If i'm in the middle of assisting customers & making sales i don't need you posting nonsense and interfering with sales. Want to make an review? fine feel free to do so, but not on this thread while i'm providing support.

Its actually constituted as sales trashing to interfere with sales by making quote on quote "honest reviews", As i said i'm not going to argue. I'd simply prefer it if you wouldn't post on our thread anymore, Good day!

This might help your problem:

Code go to C:\Windows\System32\Macromed and C:\Windows\SysWOW64\Macromed and delete the Flash folder. Then reinstall flashplayer 10.

If that doesn't work run Adobe's uninstaller.

Download:

http://download.macromedia.com/get/flashplayer/current/support/uninstall_flash_player.exe

Re-Install Flash 10/11

If that still doesn't work try using this standalone 10.3 player:

It will be sold but only to previous Lucy V1 customers in order to keep it as private as possible.

From your customers? Why would you get that question 'from your customers'? Sounds to me like you may be attempting to re-sell our products, Also last i checked there was a Wave action.

To answer your question she is expensive because its an private pack only 3-copies are going to be sold.

Foxortz - May 3, 2014, 2:16 pm

I bought Kesha and the autobuy wasn't autobuy, I had to wait 3 hours to get the pack. Thread advertised that Kesha has 80 pictures and Flash version but what I got was just VLC media files, no pictures, no .swf. The password doesn't even work. I'm very unsatisfied right now and I'm waiting for a fix or a refund.

First off Auto-Buy doesn't mean you'll instantly receive the unlocked files, If it was that easy 90% of HF vendors would get countless amount of charge-backs on the daily. As i've stated multiple times throughout this thread i'm online 12+ hours a day and deliver orders in an promptly manner.

Regarding the VCW order you place, There was an mistake on my end i had sent you the wrong files however i have sent you the correct files now. Enjoy!

As a first time customer i'm very disappointed as well.

Horrible is not the word to describe Kesha VCW. I lost 10 customers in a row now just because these jumps and loops are so obvious... I just gave up and switched to my old saturated VCW because its impossible to ewhore with this VCW and its nowhere near to price that this comes with.

That's really sad because all the time i was hearing about legendary quality of Darkwins products...

1.) You never informed me of any problems otherwise i would have stepped in and taken action to

provide a 'fix' if it needed one to begin with, I don't appreciate you trashing our thread without even asking for support first.

2.) Lag issues aren't always the VCW's fault, Many times its Flash or Computer Specs, On some systems flash consumes alot of memory therefore there will be a noticeable skip or almost glitch-like skip.

3.) We aren't the #1 VCW sellers on HF for no reason, We provide a quality product. Out of appx. 5~ Kesha customers, You seem to be the only one to have any issues.

Any other product related questions or concerns feel free to contact me via PM, I don't handle support via this thread.

You won't earn money with Kesha and I think you won't earn anything from any vcw which is made by him.. money waste. I already use my old FREE vcws because those are better than this shit..

Trust me, don't buy Kesha. I can give you a free vcw which is better than this..

Sorry for not quoting but seems like i'm not the only one.

Its not about lag or other software issues, you can clearly see 'jumps' between scene and that scares away all customers. ?

I purchased the Lucy pack, but i can't PM you in order to send you transaction details because I had to re-register a new account and i still don't have 25 quality posts.

Can you eventually PM me and tell me how to send you this information.

Thanks

We are aware of the Kesha Issues. Although we feel it is not "that" bad we will still offer compesation to all customers and will recieve a copy of our new VCW coming tommorow for FREE.

Again we want to build mutual trust and provide quality to all our customers.

Just purchased Lucy. He was very polite and kind and one of the easiest sellers I've dealt with on HF. Will post back with my earnings for the night (:

RESULTS: First time e-whoring in 10 months and I almost made around \$50 with this VCW in just an hour..

I made a BUNCH of mistakes and couldn't close on over 10+ guys and if I was as good as I was a few months ago I would have easily made around \$300, this is a must buy.

Hi guys,

So I want to give a vouch for Darkwin and Electrode :).

I had the VCW Lucy and after 2 days I can say that ... I earned money ! 175\$ and 50€ of earn. I took 150\$ from one person, and he will maybe send 250\$ again tonight :p. He is fall in love of Lucy ahahah.

That's really good to have this number of action, we can respond for a lot of answers of the "customers" to give the proof that "Lucy" is real.

So, e-whoring is a hard work ... I can spend 8hours without no earning lol. But with work nothing is impossible. I was a noob, I didn't try e-whoring before. So for a first time, I'm happy :).

Thank's for this quality product ! I hope you will have other version of Lucy, with other clothes/(actions if possible) ... I'm ready to pay again with no doubt :p.

My favorite seller for buying anything e-whoring related.

Originally planned on only purchasing one package but seeing the "regular buyer" discount encouraged me to buy two more.

All of the models are beautiful; considering the features and the quality of the videos, you cannot get any better for these prices.

It's nice that knowing that Darkwin / Electrode take their services seriously and have each model signed to a legitimate contract.

If you're wondering whether you should purchase a package, or more? Do not hesitate. With vcws like this, money comes easy.

hello could you help me with some stuff? you see i purchased lucy happily and i noticed that all the commands dont fit up in the screen,i tried expanding the window,but this is what happens?

<https://gyazo.com/66e7d329698924eda6ee678e04e884be>

if i could scroll it would it be great but it doesnt let me to do,what should i do

p.s purchase was pure success with a lil bit of delay though.. plus rep

one more question,how to use voice tool,if i turn on my microphone and start clicking audio commands wont sounds from my real life environment microphone interfere and blow my cover up?

Thank you for your purchase, For use of the voice tool you have to disable your mic and enable stereomix, Follow these instructions:

<http://www.howtogeek.com/howto/39532/how-to-enable-stereo-mix-in-windows-7-to-record-audio/>

As for the VCW commands, Simply expand the window vertically and you will see all of the commands: <https://gyazo.com/12e1f7bc8e4390b18b65ed75db089ba6>

If you're still unable to see the full commands after that then its an issue with your display i suggesting adjusting your resolution. Id like to ask that you please forward all other questions/concerns via PM instead. Thanks!

Last-time we put Lucy V2 for sale it was up for less than a day and we were only selling the VCW without picture pack, hence why it was much more cheaper.

Thank you for your interest.

Along with the packs i throw in some useful guides as well as our custom voice tool which comes with preset commands such as: "How are you?", "Do you want to buy a show?", "My mic isn't working well" etc. and many more.

These commands can be played to your slave via stereomix and will allow to further prove yourself to them as a 'female'.

E-whoring is something that's very simply and easy to grasp, All you have to do is have a good unsaturated picture or VCW pack and basic understanding of the subject. From there you just advertise your services on several sites and profit!

For further information on the subject of eWhoring i suggest using the search feature.

Yeah, your username needs to be added to the server in order for you to access the VCW when you have bought her and darkwin or Electrode usually do that.

What is your netseal username and also, could you please add me on skype?

I bought VCW from this thread, and it's almost perfect, I would be 100% happy if she would havestand up option, and if she wouldn't have this stupid zoom on the show... Anyway, I got first payment, so I recommend this thread to anyone serious about money. Also, you should add raw videos, because flash files are losing quality... And it doesn't helps you with leaking, because it's ultra-easy to get files from your system.

Good luck with your sales. ?

First off if everyone you're encountering is saying the same thing then its obvious the issue isn't with the product but the sites you're spreading on, Most-likely you're using Teen-Chat/Chat-Avenue or an saturated source which is being used by almost everyone within this section.

Lastly if you were experiencing any issues you could've brought it to my attention instead of trashing our products when its quite clear that the issue here is with your lack of unsaturated sources. You don't go to a store and buy a wrench and then return it because you don't know how to use it; how is that the stores fault?

Give him 50 euro Paysafe and then he can just pay you 7\$ in PayPal/BTC or he can just spend 60\$ on that card and leave 7\$ for you.

water_poopies - August 12, 2014, 7:21 am

Got Lannie, nice pack, lots of options in there and satisfied. A little too smiley and giggly in my opinion though, makes it look like she's laughing at nothing sometimes :P I've got a few tips for people who want to use this video.

After she waves, she cups her mouth and laughs, throwing herself back a little bit. This might confuse some people who simply ask you to wave, and wonder what he hell you're laughing at, but

it's useful for when you start talking to someone new and their junk is all up in the camera for you. Just tell them that you like their size or something.

But if you just get to a normal guy and he asks you to wave, cut back to chat loop after she waves but BEFORE she laughs, this fools them almost all of the time.

ok product for \$20 tho :) i'm satisfied!

No sorry, We no longer distribute raw video-clips.

Thanks for understanding!

(Oct 8, 2014 03:50 AM)Buffy Summers Wrote: [\[CITE\]](#) Does Lucy V3 come with any photos? Or would it be possible to purchase an amateur picture pack from Lucy? How long is the show?

Most likely going to purchase it before the weekend. Thanks for the great product, OP.

Yes it comes with a rather small picture pack around 10 or so pics, There aren't any amateur packs of her available at the moment but that may change in the future; As for the show its around the 5min mark.

Thanks for your interest!

I have been through some problems in this deal and I have still not received what I paid for, if you wanna say that you gave me VCWs which are not running, why are you not providing me support?

I have sent 20+ messages to Electrode, but he hasn't responded yet. Is this how you treat your clients?

am still asking for help...

I'm quite curious as to why you're lying? You literally just pm'd me 30secs ago stating that the VCW you purchased indeed works - Ginna was just a bonus which you didn't pay for and was given free to members of our private forum. So why lie on this thread and claim that "you haven't been able to use them", when they clearly work fine? Now, just on principle I'm not going to offer any support or assistance - Don't PM me or Post on our sales thread any longer.

Haven't been avoiding you at all, I already told you everything i had to say in the last message i sent you. Don't worry about your cut you'll get it soon via Skrill because i'm not greedy, As for the VCW's once i've recuperated all of them will be discontinued in order to make room for the new ones - I will officially be taking over the Camtrix brand after that.

Lastly what is there to resolve? If you really wanted to get a hold of me to talk about whatever you got my Whatsapp, You're not being 'ignored' i simply choose not to do anymore business with you that's all.

Hey just purchased Lucy looking forward to using here she is smoking hot!!

F3D3X - April 22, 2015, 5:37 am

Just bought Lucy, im waiting for response, cant wait to use here :) Will post review when i recieve product.

God Save the Queen - April 22, 2015, 6:34 am

Yeah Lucy looks incredible. I'll definitely make bank with this. That loop between the first and second strip is no good though you basically have to go right into the second strip looks like max headroom otherwise.

This is ridiculous! You guys obviously put a lot of work into this. And the voice tool... Nuts

I have a question. Is the vcw and the voice tool meant to be used at the same time? No right...?

I don't generally like posting on sales threads, but please will you finally unlock my license? Also I have purchased another VCW for a friend, received the serial code via Electrode, but the VCW hasn't been added as of yet. I don't want to sound like a bitch, but I've literally been waiting over a week for my license to be unlocked and over 4 days to receive the additional VCW. I hope this can be resolved.

(May 31, 2015 06:19 AM)marcus_aurelius Wrote: [\[CITE\]](#) I have purchased darkwin vcws before. And have earned tons with them. He really delivers top notch quality product. And delivers great customer service on top. However his transition to camtrix to run his vcws turned me away from his products. And I will never buy again. Firstly the software reads as a virus. So one must turn off your security software and vpn to run it. This is unacceptable for us ewhorers where security is a top priority for us..if you are new to darkwin products I advise you to look elsewhere. I hope this post is

not deleted. By a mod. This should be public knowledge for those interested in purchasing
We have explained time and time again that the only part of our software that remotely detects as a virus is NetSeal and that's due to its built-in auto update feature which most AV's detect as a backdoor - feel free to contact the NetSeal owner yourself [Aeonhack](#) to confirm this issue. Secondly if eWhorer's are that 'security conscious' then perhaps you should've taken the time to properly scan the application running something such as VirusTotal or third-party software for analyzing and it would've clearly shown it being an false positive as seen here:
<https://www.virustotal.com/en/file/96b4fca17e256c132d972c8e3c2741ceab8b3316b1e5b6194c327f0219c56b7c/analysis/> (note the date)

Lastly there are many ways to bypass this issue, Most eWhore's already use VirtualMachines to operate from; our application can be used on a virtual machine. We appreciate your review however it is unfair to judge our product without properly giving it a chance, If security is your top priority then you should have the skills necessary to properly analyze a file and determine whether its harmful or not. Sorry to have lost your business, Unfortunately we don't plan on changing our software's protection setup any-time soon - so i'd recommend you go with another VCW vendor.

Best of luck! ?
