Hey All Thats A Project That I Maked and i wanna share it with you

its null Auto Typer Or Spammer
you can spam in chat rooms with it
you can use it as auto refresher
you can make it type any key on the keyboard even F1 , F2 , ...
Just Use VB keys commands here is the commands below :

Screen Shot :

Virus Scan :

[Scan 1 \(VirusTotal\)](#)

[Scan 2 \(No Virus Thanks\)](#)

Im sure that nearly everyone is able to code a program like that.
And the other is if you have no comments maybe everything is working fine :D
