Thread: [List of Secure VPN's - Stop Buying Garbage Sold Here](#)

D??M! - July 23, 2013, 12:37 pm

Every single day I come across discussions about VPN's and what is really secure; And every single day I come across different vendors with a VPS and an OpenVPN installation attempting to offer them security. Maybe it's some hidden goal some of you have, to see how many different HF members who can get arrested, but it's incredibly frustrating and mildly infuriating coming into these threads and seeing all the ill advice... It's gotta stop. I've kept a list of strong VPN's I've used and have come to trust, and I'm willing to share it to try and steer some of you away from the bs found around here.

I will not list VPN's that do not offer an anonymous form of payment.

I am only listing locations I recommend using. Most of these VPN's offer more locations than I have provided, but due to data retention laws those locations may not be entirely secure.

This topic is not intended for those simply trying to mask their IP's to ban evade, avoid attack, etc. Most any VPN is fine for those purposes.

As most of you already know, a VPN should not be you only line of defense, nor is it likely to find a VPN that is truly logless back to the DC level.

Post here or PM me if you have a reason why one of the below VPN's shouldn't be included.

List Updated July 23

VPN: [AproVPN](#)

Payment Method: BTC, WMZ

Notable Server Locations: JP, SE

Price Per Month: \$15

Price Per Year: \$115

VPN: [BlackVPN](#)

Payment Method: BTC

Notable Server Locations: CH, EE, LT, LU, NL, PA, RU, UA

Price Per Month: \$10

Price Per Year: \$100

VPN: [Double VPN](#)

Payment Method: PM, WMZ

Notable Server Locations: CH, ES, IN, IT, NL, PA, RO

Price Per Month: Lots of combos, check site

VPN: [IVPN](#)

Payment Method: BTC

Notable Server Locations: NL

Price Per Month: \$15

Price Per 6 Months: \$70

VPN: [Mullvad](#)

Payment Method: BTC, Cash in mail

Notable Server Locations: NL, SE

Price Per Month: 0.078 BTC - \$7.50
Price Per 6 Months: 0.468 BTC - \$44.00

VPN: prq.se
Payment Method: BTC
Notable Server Locations: SE
Price Per Month 10 Mbps: 0.25 BTC - \$24
Price Per Month 30 Mbps: 0.4 BTC - \$35

VPN: SuperPowerVPN
Payment Method: WMZ
Notable Server Locations: LU, NL
Price Per Month: \$15 or \$20 for Double VPN
Price Per 6 Months: \$58 or \$79

VPN: TorGuard
Payment Method: BTC, OKPay
Notable Server Locations: NL, RO, RU, others
Price Per Month: \$10
Price Per Year: \$60

VPN: TrustVPN
Payment Method: WMZ, Interkassa
Notable Server Locations: AT, CH, EG, ES, IT, LU, MY, NL, NO, RO, SE
Price Per Month: \$15, \$30 for Double VPN
Price Per 6 Months: \$81, \$162 for Double VPN

VPN: VPN Office
Payment Method: BTC, PM, WMZ
Notable Server Locations: EG, IN, NL, PA, RU
Price Per Month: \$40
Price Per 6 Months: \$190

VPN: Zorro VPN
Payment Method: BTC, PM, WMZ, Ukash, Liqpay, Interkassa
Notable Server Locations: AT, CH, ES, HK, IM, IT, NL, NO, PA, PO, RU, SE, UA
Price Per Month: \$15
Price Per 6 Months: \$70

Know why one of these shouldn't be listed? Tell me.

?Havoc - July 23, 2013, 12:39 pm

Respect, keeping a watchful eye over the community.

Simmdon - July 23, 2013, 12:40 pm

(Jul 23, 2013 12:37 PM)Citizen Snips Wrote: [\[CITE\]](#) Daily I see threads asking for secure VPN's, and daily I see users here who have Open VPN installed on a VPS contacting them offering them security. Idk if it's secretly a goal of members to see if they can get fellow members arrested, but it's gotta stop.

Here is a list of strong VPN's I've been compiling. Most I've tried personally, some were recommended by trustworthy friends. If you have any info to add to this list, please let me know.

List updated as of June 10th

Some of these VPN's have additional payment methods, features and locations, I just noted the info that appealed to me.

[Mullvad](#) --- ~\$7/m - BTC, Cash --- SWE / NL

[prq.se](#) --- \$21-35 - BTC --- SWE

[IVPN](#) --- \$15/m - BTC --- NL

[Proxy.sh](#) --- \$10/m - BTC + tons more --- 15+ locations

[TorGuard](#) --- \$7/m - BTC --- NL, RO, RU

[BlackVPN](#) --- \$10/m - BTC --- Many Locations

[SuperPowerVPN](#) --- \$20/m - WMZ --- NL, LU

[TrustVPN](#) --- \$20-30 - WMZ --- Many Locations

[AproVPN](#)

[VPN Office](#) --- \$20 - BTC, PM, WMZ -- Numerous Locations

[Double VPN](#) --- \$30 - \$65 - PM, WMZ --- Numerous Locations - Double VPN

[Zorro VPN](#) --- \$15 - BTC, WMZ, etc --- Many Locations

Know why one of these shouldn't be listed? Tell me.

Amen to this.. And thank you. ?

Sleazy P. Martini - July 23, 2013, 12:40 pm

Quick question: Which one of them do you prefer out of that list?

OT: Nice list, Will take a look around.

D??M! - July 23, 2013, 12:42 pm

(Jul 23, 2013 12:40 PM)Richard Z. Kruspe Wrote: [\[CITE\]](#) Quick question: Which one of them do you prefer out of that list?

OT: Nice list, Will take a look around.

SuperPowerVPN was my favorite when I frequently used a VPN.

BlackVPN and Proxy.sh have both been suitable replacements for a VPN w/ many locations.

PRQ.se I've always felt secure with as they will literally fight for your privacy, but you pay a lot more for lower speeds.

Leaving forever - July 23, 2013, 12:44 pm

None of them are keeping logs? Or did I miss something?

Sleazy P. Martini - July 23, 2013, 12:45 pm

To my knowledge, no logs.

These companies have all been interviewed by numerous bloggers and researchers, and all claim to keep no logs on offshore servers. If a VPN provider offers a US location though, for example, by law they need to retain some data, so just make sure you're using the correct locations. Need to ask

for a bit, I'll answer follow up questions when I'm back.

They keep logs? .-.

Where did they confirm this? You have a link?

Arzel - July 23, 2013, 3:16 pm

<http://privateinternetaccess.com>

17 locations.

I've been using them for six months. They keep zero logs, including connecting logs; they are well known.

They are featured on TorrentFreak's list of trusted VPN as well.

D??M! - July 23, 2013, 3:19 pm

(Jul 23, 2013 02:15 PM)BlackCodez Wrote: [\[CITE\]](#) privatvpn and ipredator is also great VPNs! They have multiple locations and don't give out any private information.

Only reason privatvpn is not listed is due to limited payment methods. If I remember correctly, you must use PP or CC. They may use WMZ too, I forget, WMZ just isn't ideal for me. Definitely a good VPN though.

Ipredator I don't have experience with. I'll look into them.

(Jul 23, 2013 03:16 PM)Bitcoinbilla Wrote: [\[CITE\]](#) <http://privateinternetaccess.com>

Again Lakai speaking of something without having any knowledge about it.

Bshades VPN isn't using Open VPN darling.

Pillows - July 23, 2013, 5:15 pm

I'm surprised Spotflux isn't on that list. It's very good from what I have used.

??? ? ??? ??? - July 23, 2013, 5:19 pm

Whats wrong with open vpn guys ?, whats wrong with it ?

A????????? - July 23, 2013, 5:25 pm

I like how you think OP, because I think on same way.

I would never let my private information to some random group which is formed few months ago.

If group fall apart you never know who will get those logs, for example look at Black Diamonds.
People were buying buy-in and got scammed at the end of story.

imposition - July 23, 2013, 5:37 pm

(Jul 23, 2013 05:19 PM)??? ? ??? ??? Wrote: [\[CITE\]](#) Whats wrong with open vpn guys ?, whats wrong with it ?

Nothing is wrong with OpenVpn it is the most secure. The problem is with all the skids running the vpn services not knowing how to properly secure a server.

@op even some of the vpns you listed aren't secure, just because you see an advertisement for them on scan4you or exploit.in doesn't mean they are trusted or secure all it means is they can afford to buy advertisements.

.Infinity. - July 23, 2013, 5:45 pm

I've been looking for a solid provider in China or Georgia. Do you have any you'd recommend?

D??M! - July 23, 2013, 5:57 pm

(Jul 23, 2013 03:57 PM)PandaVenom Wrote: [\[CITE\]](#) lol or you could just setup your own VPN like me
:)Indeed

This is a good, if not better alternative to any VPN I listed above, granted you buy a strong server.

(Jul 23, 2013 05:10 PM)Stev Wrote: [\[CITE\]](#) I don't see Bshades VPN up there ... Why Citizen Chips?
Because Blackshades VPN always confused me. It very frequently changed between NL, US and some other location when I sold Blackshades, in between a lot of random server outages.

Although if I'm not mistaken, just before I left we started selling a Multi-VPN (Looked as if we struck a deal with PrivatVPN based on locations) and if my assumption about striking a deal with PrivatVPN is correct, then yes, that would indeed be a good VPN and you offer good payment methods, so I guess get back to me with more info on the VPN(s) Blackshades runs now.

(Jul 23, 2013 05:15 PM)Pillows Wrote: [\[CITE\]](#) I'm surprised Spotflux isn't on that list. It's very good from what I have used. I've never used it nor have I heard much about it from others. I'll check it out. Care to offer anymore info?

(Jul 23, 2013 05:19 PM)??? ? ??? ??? Wrote: [\[CITE\]](#) Whats wrong with open vpn guys ?, whats wrong with it ?

Nothing. It's just stupid easy to buy any basic server, install OpenVPN on it then start selling it on HF as some super secure VPN, granted it's more than likely not. As Imposition said, kids won't know how to properly configure the server and probably disregard where they buy the server, not paying attention to DC/ISP Data Retention rules.

(Jul 23, 2013 05:37 PM)imposition Wrote: [\[CITE\]](#) @op even some of the vpns you listed aren't secure, just because you see an advertisement for them on scan4you or exploit.in doesn't mean they are trusted or secure all it means is they can afford to buy advertisements.

Can you elaborate a bit more on which?

Yes these are all from various site's I've seen over time, but I don't just see an ad on a more advanced site and assume it's legitimate, I do my best to ensure it's legitimacy. I mean, I guess it's not possible for me to say anything for sure since we can't see the back end ourselves to confirm, but based off of discussions with VPN ownership (not me personally), reviewing docs from both VPN provider and the DC's they make use of, they all seem strong. Generally if you reach out to VPN providers regarding your concerns with logging and such, they're happy to discuss it with you via E-Mail. But again, I'm more than happy to hear why one or more aren't safe to use. Only makes the list stronger.

(Jul 23, 2013 05:45 PM).Infinity. Wrote: [\[CITE\]](#) I've been looking for a solid provider in China or Georgia. Do you have any you'd recommend?

I don't recall ever coming across a Georgian VPN, I believe I've come across China some time though. I'll keep looking around while I update the OP today to see if I come across anything that looks ok.

<https://hackforums.net/showthread.php?tid=2255945>

I know you mean that VPN.

The way I see it when using a VPN, there are only two viable options.

1. You create the VPN yourself, just ensure you choose a server hosted from a good DC and you configure it correctly.
2. You buy a VPN off of a company who know what they're doing, and have proven to have customer's privacy as their main priority.

As you've read in previous replies, it's highly unlikely that you find a VPN that truly does not keep logs. Maybe you've met good guy VPN provider who doesn't keep logs, unfortunately I can't think of a DC on the planet who follow similar practices, so logs will exist somewhere. The next best thing is going to be a VPN from a provider who will not willingly cooperate with LE without being forced to (valid and time sensitive court orders). Companies that I listed, when it comes to LE knocking, will fight tooth and nail for you before being forced to turn over info, granted it does in fact even exist. If a member of this forum was contacted by LE, the member here would jump through hoops to fully cooperate with LE to ensure their own safety. I can't really blame them, they're a single entity and not a company, but when it comes down to it, I feel safer knowing my fate doesn't rest in the hands of an HFer.

That's not to say it's impossible for a good VPN to be created and sold here, I'm just saying it's incredibly unlikely, and until it's proven one here does exist, it's safest to assume none exist.

(Jul 24, 2013 08:34 AM)Various Wrote: [\[CITE\]](#) And what VPN do you recommend me to buy?:)
Literally anything from my OP.

Depends what you're going for though. True anonymity and security? Or just masking your IP from plain site?

No, wasn't really the intention of this topic.

Most of the VPN's I listed have US servers though.

Scooby Doo. - July 24, 2013, 7:50 pm

Ah...

Well, as much as I'm not a fan of this thread, you have a good little list there. I haven't tried all of them, but I know one of those is legit as fuck. What these idiots who use these must know is to PROXY CHAIN. Don't bring all their reports straight to the VPN, proxy chain. There's even other legitimate VPN's that don't log that even mention this in their terms that if you're going to be doing any thing like hacking or anything else that they should be proxy chaining...they're not INVITING hackers or anything like that, but they HINT that if you're going to be using their service for things like that to proxy chain...

?

hidemyass is actually my preference

Scooby Doo. - July 25, 2013, 3:25 pm

(Jul 25, 2013 02:50 PM)AvaAccountMaster Wrote: [\[CITE\]](#) hidemyass is actually my preference

Hidemiyass is potentially the best VPN if you're not after actual anonymity.

Canc?r - July 25, 2013, 4:03 pm

I'll never understand why people want the "best security" and "no logs" but won't take the time to setup their own VPN on a server owned or leased by them.

Woe is me, I have to solidify my own security. ?

Johnny Cage - July 25, 2013, 4:33 pm

I love these VPNs you posted. I'm gonna think about buying off of them.

No, how do people not get this.
If a VPN provider is willing to ignore DMCA's etc for you, they're not doing it because they really like you as a person, they're doing it because you're paying them.

J?ey - July 28, 2013, 9:10 am

Thanks for the post, I might try out proxy.sh

piiffkush - August 1, 2013, 5:20 pm

people say use a VPN, protect yourself....

I wouldnt go buying a VPN from a hacker forum. I learned my lesson.

thanks for this post OP, IMHO it should be sticky here.

I did find it strange tho, how when I bought a VPN from diamon vpn, my posts disappeared when I spoke bad about it, kind of thought it was shady, since they seem to leave all the postive posts.

either way, I can bet you any amount of money, there are FEDS on this site posing as HF members, and even "snitches" who work for the FEDS and do their dirty work.

for example, just on the word of a confidential informant, they can by pass the need for a search warrant.

think there arent snitches? read this

http://www.nbcnews.com/id/36039784/ns/us_news-crime_and_courts/t/hacker-gets-years-credit-card-thefts/#.Ufr7IW08eSq

Gonzalez, known online as "soupnazi," became a Secret Service informant after he was first arrested for hacking in 2003.

ipazU - August 1, 2013, 10:17 pm

Perfect Privacy should be added, next update I'll do so.

Idk much about ovpn, can you refer me to any articles on it or post any info you have on it?

And yes, you are 100% correct. When using a publicly sold VPN, your traffic logs are going to be mixed with all the other user's, giving you enough plausible deniability to say "Hey, it could have been any of the other connected users, not me!" When using your own VPN, if you keep it private, you lose this luxury, and if LE can trace anything back to the VPN and they know you're the only user on it, you're going to have a bad time.

(Oct 4, 2013 08:19 AM)pokerchips Wrote: [\[CITE\]](#) BlackVPN keep logs and and are very quick to look at them.

Considering I'd have root access to the server, nothing. When operating your own VPN daemon you can choose what gets logged, 99% of upstream traffic logging claims are pure propaganda.

D??M! - October 7, 2013, 7:55 pm

(Oct 7, 2013 07:00 PM)Canc?r Wrote: [\[CITE\]](#) Considering I'd have root access to the server, nothing. When operating your own VPN daemon you can choose what gets logged, 99% of upstream traffic logging claims are pure propaganda.

I wouldn't go as far as to say 99%, in some countries it's against the law for them not to. Stay away from the European Union and you should be fine. The US doesn't have formal data retention logs, but can almost guarantee you upstream providers within the US keep some sort of logs or face the wrath of the NSA. You're right though, in theory if you can find a populated server within a location that doesn't keep logs, you're golden, it'll just take a fair share of research / contacting DCs if you don't want it to be a guessing game.

Sish!~ - October 9, 2013, 12:34 pm

Thanks for the link, will read in a moment.

betamonkey - October 19, 2013, 6:57 pm

Even without the Netherlands there are still a huge number of good locations for VPNs. I'm just not sure what makes the Netherlands so special. Sweden, Romania, Czech Republic, Iceland, Brazil, Ukraine, Russia, Luxembourg. I could go on.

potti - October 19, 2013, 7:46 pm

Correct Betamonkey,

I still think the best way to add protection layers, is to use multiple providers and hops.

Example: VPN1 Provider --VM (Double-VPN 2-hops) --Internet

Can throw in socks chain depending on how slow you want to be.

Can throw in TOR and swap it up.

Give some of your opinions?

betamonkey - October 19, 2013, 8:41 pm

(Oct 19, 2013 07:46 PM)potti Wrote: [\[CITE\]](#) Correct Betamonkey,

Well if you are talking about "double-vpn" as in some double vpn from the same provider - is that not kind of redundant? They are going to go to the vpn operator first for the information. So it won't matter how many servers you go through if they just get the people to release the customer info.

D??M! - October 19, 2013, 8:45 pm

LE: Hello, we have tracked a criminal using your VPN service, we would like his IP please, here is our warrant.

VPN Company: 12.34.56.78

LE: Um, this IP also seems to belong to you, who is behind it flashes warrant again

VPN Company: 76.54.32.11

Double VPN thwarted.

potti - October 19, 2013, 9:11 pm

Obviously you would be using multiple providers, and proxy's.

Perfect-Privacy - Insorg.org + socks?

Perfect-Privacy - Insorg.org + socks?

I think 2 VPNs (different providers, by companies based in non-western countries) and either TOR or some socks proxies is pretty decent. Look at the case of that guy who ratted Miss Teen USA or whatever in California. They basically hit a brick wall once they realized the IP in the emails was a logless VPN, and looked into other routes (no-ip...). I'm not saying the FBI can't get past VPNs, that is obviously not true, but sometimes it takes a lot more effort than they might be willing/able to expend. They are not some unstoppable international force with unlimited resources and unlimited manpower.

I don't know why I am ranting, lol. I think 3-5 layers is more than enough for 99% of the people here.

J?ck - October 20, 2013, 3:38 am

(Oct 19, 2013 09:26 PM)betamonkey Wrote: [\[CITE\]](#) I think 2 VPNs (different providers, by companies based in non-western countries) and either TOR or some socks proxies is pretty decent. potti - November 5, 2013, 3:43 am

Regarding TOR, what sort of configs do you use?

DarkRouter - November 5, 2013, 10:28 am

(Nov 5, 2013 04:43 AM)potti Wrote: [\[CITE\]](#) Regarding TOR, what sort of configs do you use?

Disable Everything

Have Adblock Have Privoxy

Have Own Exit Node (Offshore) - Encrypted Server Again Have Own Router (Offshore) - Encrypted Server Again

Block US/UK TOR Routers/ Exit Nodes. Only Connect to your own Nodes/Exit Routers.

BUY ALL OF THE ABOVE WITH A VPN AND PLENTY OF BTC. Run inside Encrypted VM Container Using (TrueCrypt & Strong Encryption)

STRICT Firewall FOR THE VM so it can only communicate on the TOR Port & back to the host.

[H]ell - November 5, 2013, 11:13 am

Maybe it's mentioned in the thread, but how do you verify they are secure?

Do they grant you root access to their servers and let you check if they are clean?

potti - November 21, 2013, 2:32 am

Regarding above,

Why not buy your own VPS via BTC (Anonymous as possible)

Than setup your own VPN ?

OnformGs - December 5, 2013, 10:01 am

nice list of unlisted vpns bro could come in handy at somepoint
