Thread: [\[Web Design\] Landing Page Design. Need feedback.](#)

Aired - July 24, 2013, 9:09 pm

Hello,

I designed a landing page which I later plan to sell to ThemeForest, but in the mean time I need feedback for the design, so my partner can go ahead and start coding it.

For now, I made 3 color variations, and I do plan to add more later on. This website is targeted for Apps, Softwares, and Products.

Revision 1

Ignore the bottom white box at the very bottom and all the empty space.

Please give me some pointers of what I can possibly add, remove, or modify for what I have.

Thank you.

Wow, it's awesome. Clean, simple and professional.

Fox™ - July 24, 2013, 11:23 pm

I really like it, just like Amazing said above - it's clean and simple. Has a nice feel to it. Good work!

Regards,

Clean and simple, looks sick. I'd go with the green colour though, makes it more friendly :)

Ivy Mike - July 25, 2013, 1:54 am

Wow I was expecting something different aha, this is quite amazing you have a lot of talent, I like the

blue version as it promotes "calm" as it says on the website. Anyway I really like these designs really clean and professional imo, keep up the good work :-)

gnarly - July 25, 2013, 2:35 am

i love them, they are very clean well done

MyLittlePony - July 25, 2013, 3:31 am

Beautiful.

The green version is the best as it matches the theme of the phone's picture.

Amazing job.

Josylvio - July 25, 2013, 3:33 am

In which program did you make this? It's awesome. Green is the best choice in my opinion.

I would assume he used Photoshop but wait for his response.

Nilsson - July 25, 2013, 5:36 am

It's actually pretty cool, but maybe it's too empty. There's too many empty spaces that should be filled in, other than that, Good job.

varhf - July 25, 2013, 6:54 am

If you plan to sell it on theme forest id up the price to \$10 (If the price was going to be \$5)

It's a very nice theme and i disagree with user above me, the theme fits together well and looks pro.

Aexion - July 25, 2013, 8:33 am

Looks very well designed, and only a few things stuck out to me. The colored underline in the navigation menu doesn't seem long enough to me, and I feel like the phone would look better if it wasn't cut off at the bottom. Otherwise, it's a very nice landing page! (:

Wow, it's awesome. Clean, simple and professional.

CitrUs - July 25, 2013, 10:44 am

This looks really clean man, very professional looking. I like the red the most.

Where are the empty spaces you were referring to? I personally prefer to space out the elements as much as possible so they look more cleaner in perspective. Cramped designs make me sick.

(:I totally get what you mean by the colored underline being short and it was intentional. I just wanted to try something new and see how it'd look. I guess I failed, haha. And as for the phone, yes I understand. I will try to see what I can do to fit the whole phone in.

Thanks everyone for all the feedback, I really appreciate them. Cheers!

Personally, I think the blue scheme looks the best. (:

p???? - July 25, 2013, 8:31 pm

Very clean, the bottom introducing part is a bit bland maybe try to liven it up with a bigger font the same color as the background?

Bonfire - July 25, 2013, 8:53 pm

I love the green theme.

The only thing I would change though, is that big blob of white on the phone, in the river. I feel as if it's too congested.

Other than that, very nice web design.

Hey thanks for your feedback. I don't know what you mean by "big blob of white". Could you please explain to me? And the river is just a placeholder image so it isn't much of a big deal.

Updated with Revision 2. Added one of the features.

I'm talking about this

But then again, like you said, that's just a placeholder image.

Don't give feedback if you don't know what you are talking about. Whitespace is a key element of

web-design.

Very cool design, mate. The layout resembles my website roughly too:

<http://cona.netii.net/headlined/>

Have you coded it yet? or are you going to sell it as a psd template?

Thank you. I am in the process of coding it as we speak. As of right now, I plan to sell it coded and as a PSD, but I hear PSDs are more harder to get accepted into, so I am not sure.

Again, thank you everyone for the feedbacks.

Looks pretty cool and clear, some elements may be added too, but it is good however, good job :)

Thanks man.

Working on revision 3.

Kyousogiga - July 26, 2013, 4:14 pm

That looks really clean, nothing too over the top it flows really nicely.
