Thread: [How to make a invisible folder](#)

Malaikat313 - July 25, 2013, 9:58 am

Today I'm going to teach you how to make a invisible folder.

This can be used for several things.

Today I'm going to teach you how.

1. Right click the "Folder"

Properties -> Customize -> Change Icon

Now click "Apply"

Now you see a invisible folder with a name

Now to get a invisible name press these

Hold alt then PRESS 0160

Then click the Enter key.

Congrats, now you should have a invisible folder.

Decent tutorial, but LQ user and post for ASKING for rep. Maybe you should consider reading the rules.

Xyzo - July 25, 2013, 10:15 am

Already knew that, but it sometimes get bugged so the image get black.

Anyway thanks for sharing! :D

"A +Rep would be appercaited."

Asking for rep? really...

Olof - July 25, 2013, 12:34 pm

A "ok" tutorial but from a LQ member. Read the rules, asking for rep is against them.

Tenaxium - July 25, 2013, 12:35 pm

You cant ask for rep, that's against HackForums policy.

We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.
