Thread: [major difference between predatorpain vs limit less keylogger?](#)

silksoft - July 25, 2013, 10:19 am

The title says it all, and i am talking about the pro version of limitless keylogger.

Ofcourse i have checked both the threads. Just want to know if there is a major difference.

edit : btw My main requirement is stealing saved passwords from browsers, which one of the two does the job better?

I like limitless logger better, but if you have \$25 and you can portforward (or if you have \$30 and can buy nvpn) go with a rat.

If I were you, I'd waited 1 week.

Im not trying to trash any of both the sales, but in a week Im releasing my keylogger.

It has features never seen before, and it's FUD. Plus the stealers works like a charm on all versions of the browsers.

If you're on a hurry, I'd suggest LimitLess tho. It just has more features than predatorpain with a fair price.
