Thread: [\[TUT\]How to tell if someone blocked you on Facebook\[TUT\]](#)

Zapu - July 25, 2013, 11:12 am

How to tell if someone blocked you or deactivated on Facebook.

Things you'll need

- Facebook
- A brain

Step 1

Note I'm not sure if this works with default URLs, I'm pretty sure it only works with customized URL's.

Know the URL of the person. The url should be something like <http://www.facebook.com/<insert customized URL here>>

for example <http://www.facebook.com/iLoveHackforums> is a customized URL. A non customized url is the one that is like <http://www.facebook.com/profileid?=343565443647> or something close to that.

Step 2

Great, you have the URL of the person, now go the address bar and type in "graph.facebook.com/<insert customized URL here>"

Don't add in the <http://www.facebook.com> part just the last part which.

So it should look like this: graph.facebook.com/iLoveHackforums

Once you do that hit enter and you should get a white page with text on it.

Step 3

Analyze between the two.

If you get this:

```
{
  "id": "00",
  "name": " ",
  "first_name": " ",
  "last_name": " ",
  "username": "iLoveHackforums",
  "gender": "male",
  "locale": "en_US"
}
```

That means they blocked you.

If you get THIS however:

```
{
  "error": {
    "message": "Unsupported get request.",
    "type": "GraphMethodException",
    "code": 100
  }
}
```

That means the account is deactivated/disabled

Now I understand you can simply ask people, but you'll look desperate. I also know if you ask a friend for the URL and they link you it you know they blocked you, and if the friend doesn't, then you know they didn't block you and deactivated. But this can be your own thing that's quick and easy as opposed to asking people.

Ad?m - July 25, 2013, 1:03 pm

Great method. Will use this later.

First post. Haha

Zapu - July 25, 2013, 1:04 pm

First post. Haha

Ahaha, I was waiting for someone to comment, the thread was getting lonely ;-;

Scooby Doo. - July 25, 2013, 1:05 pm

Nice :P

Thanks for the contribution, I might put this to use some time :P

Ah, please do! It comes in handy at times!

Brat_Somi - July 25, 2013, 1:32 pm

Sorry but it's easier to check profile with other facebook account.

Zapu - July 25, 2013, 1:35 pm

(Jul 25, 2013 01:32 PM)Brat_Somi Wrote: [\[CITE\]](#) Sorry but it's easier to check profile with other facebook account.

It has its advantages, but also its disadvantages

If I know the URL I can just do

graph.facebook.com/<insert URL here>

and get my answer

unlike logging into a new account.

asdfandsfhhajdsqfygyfgywjlfgv7sfabdhawfyfhgat8hgtryufy78uygfaegjdfayufs
No problem, although I don't know why you had a seizure on the keyboard. ?

Mopex - April 26, 2014, 8:58 am

hi I DID NOT KNOW TIS METHOD. Tank you

raymond43 - April 28, 2014, 3:19 am

90% possibilities he/she blocked you on facebook if you got error in graph api and 10%\$ chance
that he/she might change his/her username before he/she blocked you and you got error in graph
api

5414h - April 28, 2014, 12:40 pm

Your signature is from Steins;Gate , an awesome anime :)

JehovahWitness - April 28, 2014, 12:42 pm

Pretty cool, cheers for that mate :)

ZuGgY - April 28, 2014, 12:45 pm

Thanks for sharing this.
Will test this out

hahdbwoannniabs - April 28, 2014, 5:10 pm

Or you can do it the easy way without following this pointless ass tutorial and try going to the link of
their profile?

Zapu - April 28, 2014, 6:18 pm

Do you feel proud commenting on a thread that's months old?

"Pointless ass tutorial"

Yet, you've made nothing worthwhile, closest thing you have is a thread on good sites for doxing,
thats been made millions of times.

hahdbwoannniabs - April 28, 2014, 6:51 pm

At least my thread is actually useful, this is just retarded.

ShitzFez - April 28, 2014, 9:45 pm

  "last_name": " ",
  "username": "iLoveHackforums",
  "gender": "male",
  "locale": "en_US"
}
```

That means they blocked you.

Are you sure that's right? I tried out the method with someones page that I know hasn't blocked me, and I got that same message.

Zapu - April 29, 2014, 4:11 am

(Apr 28, 2014 06:51 PM)ThatExploitTho Wrote: [\[CITE\]](#) At least my thread is actually useful, this is just retarded.

No, it wasn't actually. I've seen the same threads a million times, you should feel bad.

Not to mention, all your posts aren't even helping people, all you do is sarcastically comment saying "wow you're a fucking retard" and never once actual post an answer. Is that because you don't know it?

(Apr 28, 2014 09:45 PM)ShitzFez Wrote: [\[CITE\]](#) Are you sure that's right? I tried out the method with someones page that I know hasn't blocked me, and I got that same message.

Oh sorry, misread what you said,

it works for people who have blocked you and still have the account, and people who haven't blocked you.

ShitzFez - April 29, 2014, 12:59 pm

(Apr 29, 2014 04:11 AM)Zapu Wrote: [\[CITE\]](#) Oh sorry, misread what you said,

it works for people who have blocked you and still have the account, and people who haven't blocked you.

So that same code is shown for people how still have an account, regardless of whether you're blocked or not?

Zapu - April 29, 2014, 1:03 pm

(Apr 29, 2014 12:59 PM)ShitzFez Wrote: [\[CITE\]](#) So that same code is shown for people how still have an account, regardless of whether you're blocked or not?

If person A blocks you, and you do the above you'll get the

```
{
  "id": "536533311",
  "first_name": "Joe",
  "gender": "male",
  "last_name": "lovino",
  "locale": "en_US",
  "name": "Joe lovino",
}
```

```
"username": "joe"
}
```

if they didn't block you, and you still did graph.facebook.com/<whatever> you'll still get

```
{
  "id": "536533311",
  "first_name": "Joe",
  "gender": "male",
  "last_name": "lovino",
  "locale": "en_US",
  "name": "Joe lovino",
  "username": "joe"
}
```

If they deactivated their account, or the account was deleted, you'll get the other piece of info.

xploD - April 30, 2014, 8:46 am

Awesome find cheers man gonna be helpful.

ShitzFez - April 30, 2014, 12:39 pm

(Apr 29, 2014 01:03 PM)Zapu Wrote: [\[CITE\]](#) If person A blocks you, and you do the above you'll get the

```
{
  "id": "536533311",
  "first_name": "Joe",
  "gender": "male",
  "last_name": "lovino",
  "locale": "en_US",
  "name": "Joe lovino",
  "username": "joe"
}
```

if they didn't block you, and you still did graph.facebook.com/<whatever> you'll still get

```
{
  "id": "536533311",
  "first_name": "Joe",
  "gender": "male",
  "last_name": "lovino",
  "locale": "en_US",
  "name": "Joe lovino",
  "username": "joe"
}
```

If they deactivated their account, or the account was deleted, you'll get the other piece of info. In that case, this threads title is very inaccurate. It should be more like "[TUT]How to tell if a Facebook account had been deleted TUT]"

Zapu - April 30, 2014, 12:40 pm

No.

If someone did block you(you can't access their profile) and you did
graph.facebook.com/<whatever> and it returned info, then it means they blocked you.

If you run it across an account that hasn't blocked you, then no duh you're going to get the same
information.

ShitzFez - April 30, 2014, 1:12 pm
