Thread: [\[V 1.5\] A Logger \[Unique Keylogger Built with Fun in Mind\]](#)

TickTack - July 25, 2013, 4:11 pm

A Logger

Bringing innovation to a cesspool of leechery.

A Logger is a keylogger coded in C#. Upon taking a look at all the keyloggers in this section, I noticed one thing: THEY ALL HAVE THE SAME EXACT FEATURES. (And probably the same exact code) A Logger breaks this tradition by introducing highly hilarious, highly useless features designed purely to cause aggravation.

Features [\(Click to View\)](#)

You can drag the form border to the right to show more features.

Each addon shows a balloon explaining what the feature does in detail. No more confusion on what they all do.

Update Log [\(Click to View\)](#)

This is where updates are recorded.

V1: Release. Special addons: Clipboard penises (replaces your clipboard with different pics of penises),
penis flash (flashes a pic of a big black penis every 2-5 minutes. So quickly that the victim won't know what he saw),
and meat spin crash.

V1.1: Bugfix + Testing. The Flash addon has been fixed so that it actually works now. Added a test email button.

V1.5:

- Evolved user interface
- Customizable email settings in a separate form
- Steam Stealer (Best of its kind, steals Steam Guard files too)
- Activation Alert
- IE Default (My new favorite addon, sets IE as the default browser and closes Chrome or Firefox if user tries to launch them)
- Wallpaper Shenanigans (Change the victim's wallpaper to any image and keeps it changed)
- Hungry PC/CD tray

Virus Scan [\(Click to View\)](#)

the youtube feature sounds interesting :D

littlereddevil - July 25, 2013, 8:19 pm

Lol I laughed out loud when I saw 'meat spin'... Sounds interesting, hope to try it soon!

TickTack - July 25, 2013, 8:38 pm

Other than the meat spin feature and the standard startup, screenshots, melt, and antis, you can also delete the victim's cookies, show a message box, copy the victim's clipboard, replace the victim's clipboard with 1 of 30 different random pictures of penises, and also have a big black penis quickly flash on the screen every 2-5 minutes, so quickly that the victim won't be sure of what he saw.

More features will be added soon that won't involve penises, I promise.

Toske - July 26, 2013, 6:42 am

Looks interesting & easy to use tbf.

xo11 - July 26, 2013, 7:48 am

wow really a nice soft i am going to use it

littlereddevil - July 26, 2013, 10:55 am

Does it only support gmail? Or are other emails fine. Also I can't quite get it to work yet... still playing around. I think you need to add the "send test email" thing.

Knick0241 - July 26, 2013, 11:12 am

Sent you a PM can't wait to youtube people

Tany123 - July 26, 2013, 2:30 pm

I ought to say you're more creative than anyone here. I'd personally like to try penis flash. Although I know C but I never did that much creative with phallus. Sent you a pm for the key logger.

irfanizm - July 27, 2013, 4:00 am

i need 10 messages to send pm i cant send. can u send me pm

Nina - August 14, 2013, 2:14 am

I got the logger quickly, thanks for that.

xo11 - August 14, 2013, 2:19 am

Its really a good key-logger i used it and also get positive results but one thing i dont get all key strokes ..

TickTack - August 14, 2013, 2:43 am

Coming up soon.

vizyx - August 14, 2013, 9:25 am

great logger! thanks for your effort!

skull350z - August 14, 2013, 11:09 am

Looks like something I'll probably use thank you, I plan on getting it at some point when I learn some more about how to properly keylog ^_^

Litte_Anon - August 14, 2013, 12:45 pm

sounds interesting, hoping for more features! ^_^

joeykapi - August 14, 2013, 3:12 pm

XD cool extra's.

And now i know my friend's password :D

vovo226 - August 14, 2013, 11:40 pm

Interesting keylogger. I'll have to check it out later, but at the moment i'm new.

lokeshramesh - August 15, 2013, 12:54 am

Very nice... I Just checked out and works well.. Thk u... :)

thnx bro.. i love it.. gona use it :P

Redeemz - August 15, 2013, 7:10 am

Vouch for this logger :D I just got it to look at it's current progress, but I'm going to contact ticktack about updates.

Weeson - August 15, 2013, 2:24 pm

Vouch gave me the keylogger, thanks! :D

vovo226 - August 15, 2013, 2:42 pm

Vouch, keylogger is pretty good, and definitely easy to use

Burritos - August 15, 2013, 7:25 pm

vouch got it and testing it now, looks great

slipstrm - August 15, 2013, 7:44 pm

Can't wait to try this one out. Great gui!!

Trisomy 21 - August 17, 2013, 8:41 pm

Pmed me the download link. Vouch for A Logger and Tick Tack.

Double A - August 17, 2013, 10:13 pm

What test button tests email right? Not the key logger cause having dicks everywhere would be frightening :O

I'm new to this stuff but I have a victim I can trick easily, I have tried 3 key loggers which all failed I keep telling him that the coding isn't perfect and to wait for me to fix my 'program' can you pm me the logger? I would appreciate it and finally get my first victim :D

Oh I have a question, the email you put in will it get saved and sent to the same email?

And can you please pm me the link? Can ANYONE pm me the link?

PooPooHead - August 17, 2013, 11:51 pm

I've sent a pm, can't wait to try this out, thank you in advance.

Just got it, when I try and "Error: A new expression requires () or [] after type" when I try and build (email works.)

I have Startup, Screenshots, Melt and Clipboard C activated, but it happens even when I have nothing activated.

EDIT:

Works perfectly fine after extraction.

Massive vouch for this sexy program :)

EDIT EDIT:

I think you should change the name in task manager from "A logger.exe"...

TickTack - August 20, 2013, 1:28 am

Updated it to 1.5. The addons I were funnier done than said, fortunately. I'm 100% positive you guys will love this new update.

I like the new features :)

Ok, so I setup the keylogger, everything's working but, it sends me an email with the wrong Operating System.

It says "Main is logged in on PC: HOME-COMPUTER
OS: Microsoft Windows NT 6.1.7601 Service Pack 1"

Main is my username, HOME-COMPUTER is my computer name, but my operating system is Windows 7 Home Premium SP1...

How do I get rid of it?

I ran it on my comp to test it, and I don't know how to get rid of it now .-.

Also, I got this email when someone else ran it:

Quote: Hi __,

Someone recently tried to use an application to sign in to your Google Account - __@gmail.com.

We prevented the sign-in attempt in case this was a hijacker trying to access your account. Please review the details of the sign-in attempt:

If you do not recognize this sign-in attempt, someone else might be trying to access your account. You should sign in to your account and reset your password immediately.

Any way to disable that so that it works?

Great keylogger TickTack. I have one question though. What email service do you recommend to use with this? When I use gmail or aol both detect "suspicious account activity" and make me change my password therefore making the installed logger useless. Know of any email service that doesn't have these kind of checks? Thanks!

If you can muster it, I would recommend your own private smtp server.

NewToKeylogg - September 22, 2013, 8:22 pm

my problem is, for example when I get the email, in the clipboard section, it does NOT show every single key stroke they hit, (I've done this 10 times on different people), for example when they login to league of legends, It only shows their username that they typed, and not their password, however it shows empty spots in the clipboard in the logs in the email that it sends me....please help me out, email me on samsamilis67@gmail.com or just add me on skype raymondiaaw18 and tell me what I'm doing wrong, it shows every other useless information in the logs in the email, except the every keyboard key they hit....I've already tried many different keyloggers but had the problem with each one (free loggers) such as dracula, sys, reflector,project neptune and ultimate.

Akrohail - September 23, 2013, 10:43 am

(Jul 25, 2013 08:38 PM)TickTack Wrote: [\[CITE\]](#) Other than the meat spin feature and the standard startup, screenshots, melt, and antis, you can also delete the victim's cookies, show a message box, copy the victim's clipboard, replace the victim's clipboard with 1 of 30 different random pictures of penises, and also have a big black penis quickly flash on the screen every 2-5 minutes, so quickly that the victim won't be sure of what he saw.

More features will be added soon that won't involve penises, I promise.

Awesome! I wouldn't mind testing v1.7 before you release 2.0... :D

MUSIC DRIP - October 20, 2013, 11:59 pm

lol this is a funny logger id like to try it out soon :DDDD

o0vash0o - October 21, 2013, 12:48 am

can't wait for the 2.0! this one is really great keylogger! THUMBS UP BRO!

Thug Tree - October 21, 2013, 12:15 pm

I cant msg you but if you can send me the keylogger that would be great thanks in advance :D

MissingN?. - October 22, 2013, 11:04 am

Thanks for the download will try it now.

Commador823 - October 22, 2013, 12:56 pm

Looks interesting. I'll have to add it to my kit ?

mrniceguy122 - October 22, 2013, 7:36 pm

Nice logger , i will check it out. I dont know about this , but it sounds hilarious! I will definatly try it

Also , i just wanna ask. Could you add a steal Minecraft account , this should be simple , consdering the lastlogin file , they could already have it , but if they dont , you just force them to run the old launcher once and it appears in there .minecraft file , then you can decrypt it for their username and password

Commador823 - October 23, 2013, 6:04 am

TickTack is legit, and A Logger is a lot of fun

How do I remove these keyloggers from the victims computer?

Medicate - October 23, 2013, 9:10 am

Sounds like fun, will try it out soon.

Cauet - October 23, 2013, 9:33 am

Thank you very much for your share.

dBluRxD - October 23, 2013, 11:04 am

great logger works very well! hoping to see upgrades

Devious_Hero - October 23, 2013, 6:16 pm

Vouch This guy gave me the download link for the logger in under an hour <3

sakupljac - October 24, 2013, 12:39 pm

very corect guy vouch for you and for your product bro

MuffinTyrant - October 24, 2013, 7:50 pm

Sounds like a great program would you recommend this for beginners? ?

MirrorDude - October 24, 2013, 9:07 pm

The reason keyloggers dont have those functions are because they are useless. Even if you make a black dick flash across the screen(fight club rip off), you cant see the persons reaction like you can w/ a RAT, if they have a webcam. More sadistic than funny...

Also, they make the victim realize something is wrong...which is not a good idea, because with one scan of malbytes or whatever, POOF, your victim is gone.

3. Lol i bet those are the only "unique" code you have, and they dont do shit. Send us your source so we can checkout where you copied and pasted your necessary features from.

??tt - October 24, 2013, 9:09 pm

sent you a pm hope i get this amazing logger

You've obviously been alive for a very short period of time. 90's viruses were all about antics and annoying fun. This was made as a tribute to that time, when malware was for the lulz than just about money.

So be less of a douche and lighten up and gtfo my thread. Thanks! ?

Hello Friend,

I used Your Keylogger and Find it working great,

But Which CRYPTER have you used to make it FUD without disturbing Builded File/Stub ??
i Used Grieve Crypter, but keylogger doesnt work after crypting !?????

barukoru - October 29, 2013, 2:58 pm

wow really a nice soft i am going to use it

(Jul 25, 2013 04:11 PM)TickTack Wrote: [\[CITE\]](#) A Logger
Bringing innovation to a cesspool of leechery.

A Logger is a keylogger coded in C#. Upon taking a look at all the keyloggers in this section, I noticed one thing: THEY ALL HAVE THE SAME EXACT FEATURES. (And probably the same exact code) A Logger breaks this tradition by introducing highly hilarious, highly useless features designed purely to cause aggravation.

Features [\(Click to View\)](#)

You can drag the form border to the right to show more features.

Each addon shows a balloon explaining what the feature does in detail. No more confusion on what they all do.

Update Log [\(Click to View\)](#)

This is where updates are recorded.

V1: Release. Special addons: Clipboard penises (replaces your clipboard with different pics of penises),
penis flash (flashes a pic of a big black penis every 2-5 minutes. So quickly that the victim won't know what he saw),
and meat spin crash.

V1.1: Bugfix + Testing. The Flash addon has been fixed so that it actually works now. Added a test email button.

V1.5:

- Evolved user interface
- Customizable email settings in a separate form
- Steam Stealer (Best of its kind, steals Steam Guard files too)
- Activation Alert
- IE Default (My new favorite addon, sets IE as the default browser and closes Chrome or Firefox if user tries to launch them)
- Wallpaper Shenanigans (Change the victim's wallpaper to any image and keeps it changed)
- Hungry PC/CD tray

Cool looking keylogger, going to definitely try this out, thanks!

MrOG - November 22, 2014, 5:21 pm

Good job TickTack ;)

Keep up the good work!

Poopsac213 - November 22, 2014, 6:59 pm

Hey TickTack unfortunately I am a new user who at first came on simply to find a cracked version of Adramax but when I saw this I just had to have it. Well because I am a new user I can't send you a PM to ask for the download until I upload "25 quality posts". As a result I am going to have to ask you if you may please send me a PM with the download.

iCyber - November 22, 2014, 8:06 pm

Lol this looks fun. Good thing you added some fun options ;)

SwagDogger - November 24, 2014, 2:05 pm

Can anyone please pm me the download? I'm new and I can't yet! Thanks in advance :D

hownerd - November 24, 2014, 6:51 pm

Can't wait to try it, thank you for the upload :)

Vemius - December 25, 2014, 6:25 pm

meat spin feature lol thanks for the logger man <3

We are sorry but we require 25 quality posts to send a PM. Any LQP (Low Quality Post) spamming will result in a closed account. If you upgrade to l33t membership this requirement is removed. [Wtf Is This ???]

Tomip2000 - December 25, 2014, 7:00 pm

If i try to download it it just says i cannot send private messages yet, any reason for that?

kHomicide - December 25, 2014, 7:38 pm

pm me the link someone, not enough post thx :)
