Thread: [GSN1PA360's DoX Tool v1.4](#)

Ricky™ - July 26, 2013, 7:13 pm

[img]http://i1094.photobucket.com/albums/i451/GSN1PA360/Welcome.png[/img]

Decided to put a little bit of work into my DoX Helper/Tool for those who care. I added in choice for those of you that recommended it, also changed the interface a tiny bit. ?

[img]http://i1094.photobucket.com/albums/i451/GSN1PA360/About.png[/img]

For those of you who don't know, my Dox Helper/Tool has been around for a little while now and basically it helps you in many ways such as recording/saving info, instant access to popular info look up sites on the web, and other things as well.

This link is an Adfoc link, PM me if you want a direct link.

If you can't open the program or you get stuck in a loop, delete the DoXSettings.bat file and retry. If it occurs again let me know as soon as possible so I can fix it.

Also, PLEASE make suggestions on things that would be useful so I can continue to produce updates. ?

It's much easier and convenient to use notepad instead of navigating through a batch file. The only way this would be good is it found the info itself.

Johnny Cache - *July 27, 2013, 2:44 am*

You still have to do that clickable TUI ;-)!

But yes SoA you have a point. Maybe you could implement some kind of facebook / twitter scraper. That spits out some names the doxed person could be. And then lets you choose the profile and automatically completes the dox with info from the profiles.

Thanks for the share i'll let you know how well it works/if there is any problems.

appreciate it,

-tC
