Not bad. But this isn't really USG, man.

Add features to the USG such as:

- Code Scrambler
- Proxy Calls

Because all you're doing now is renaming variables and adding junk-code.

Also regarding junk-code - is it senseless or actually does something? I would like to see an example of added junk-code via PM, if that's possible.

Is the payload compressed? What is average Stub size? Is output smaller than input or larger?

How long it takes you to refud the crypter?

Thanks for the suggestions. We do not have those features yet we plan on adding them.

Junkcode maintains longer FUD time.

Output is larger due to it is AutoIT. 650kb without any compression, but can be compressed to about 45% less.

Thank you sir.

Someone who studies Malware or security would know that junk code does nothing and is only used by Skids. I suggest you research this or edit your post. Anyone with even the slightest bit of knowledge in this field knows this. ?

this is a very good question i forgot to ask that

EDIT: HERE YOU ALL GO ENJOY THIS HAS BEEN INTERESTING

Hey guys, this is Razor & Digital today we expose a crypter named clarion crypter.

Step1: decompile stub with Exe2Aut

<http://speedcap.net/sharing/files/b3/41/b341095522d00c84c808935bc3b892d7.png>

Step2: Replace Execute with FileWrite

->ASM.txt will contain the runpe

Here is a link to it: <http://ge.tt/5rO089n/v/0?c>

I edited the stub source a bit and added to original command executed as comment:

<http://speedcap.net/sharing/files/29/df/29df4e3b395ba7c9f0fd0f59a6d5bb16.png>

You see the runpe & the Dll-Call/Struct creation, it is 100% public as you can see here:

<http://www.ic0de.org/archive/index.php/t-11704.html>

Let's see what the crypter owners think about this!

Does it has USB spread included as function?

Azulejo - August 7, 2013, 1:06 am

v1.3.8 released.

News:

-Refud.

-New method of storage coded in VBS for bypass nod32 more easy.

Greetings

alignment - August 7, 2013, 1:38 am

Yes it has USB spread. We do offer support.

We are fixing the detections asap.

Sibil - August 7, 2013, 1:54 am

I would like to purchase the silver package(15\$), but I want to be sure it has USB spreading function as I did not see it on screenshots. Also it has auto update?

Azulejo - August 7, 2013, 6:27 am

New Update Released.

*Startups & Antis Refuted - 1/37 -> 0/37

The main Crypter Stub no need refud, the output is still FUD.

Talz - August 7, 2013, 6:59 am

Seriously don't recommend you purchasing this crypter, support is very bad and never helped me resolve my issue.

Sc?rpi? - August 7, 2013, 7:54 am

I highly suggest purchasing this crypter.

My computer apparently can't run fucking anything crypted anymore and customer support is actively assisting me with this matter and has assured me a fix in 1-2 days.

Much better than Razor's shitty crypter that he wont even respond to my PMs about how it wont work.

TL;DR: Talz is full of bullshit.

Talz - August 7, 2013, 7:55 am

No I am not, I added the Skype; someone from Norway. He gives the worst support you could possibly imagine.

He told me to add startup in DC when the crypter has it built in ... makes sense.

Then you sir must have gone full retard because I assure you that the customer support is actively trying to fix my problem.

On top of that, what the fuck is the problem with telling you to check startup in the actual builder than in the crypter?

I'd much rather put the chocolate chips inside the cake than on the frosting.

Edit: To expand one what I said in the second point, you went to the fucking customer support and he gave you a solution yet you are criticizing them for this?

Would firstly like to kindly thank iMap for the instantaneous and extremely helpful support on Skype off the get-go with a small issue I had encountered with Clarion Crypter (Was my fault, not the crypters in any way shape or form). After doing a quick scan with RazorScanner (non-distributable) it showed me the true power of this FUD crypter. Fantastic job on this and looking forward to continuous updates and ongoing support.

His Skype is from Spain, and the same IP on his reasen and Grendel Crypter Skype.

I'm not stupid, I am friends with the kid that busted him.

Look at his creation date, brand new, he did the same with Grendel.

Sorry but support till now has failed to help me.

Once I am crypting my server, it is not connecting anymore.

Any reason why?

Thank to all for maintain this service working perfect and reporting bugs.
I fixed all bugs reported for now.

New version released:

Version 1.5.1.4

Changed execution method, more stable and bypassing more proactives.

Greetings.

Being competitors doesn't mean you need to fuck up for someone else.

If someone is better than others, they don't need to spend time on those so called 'competitors' if they are so good themselves. ?
