Thread: [Have RAT Questions? ASK ME! \[Experienced\] \[Free\]](#)

Business - July 28, 2013, 11:48 pm

I am making this thread to assist anyone with questions regarding RATs!

Have a question regarding:

RATs?

Crypting?

Port Forwarding?

Misc.?

I can help! Simply comment below with your question, and I will answer it as fast as possible. I can assure you that I will give an answer that will help you solve your problem.

If you find this thread helpful, and want to learn more, PM me about my private lessons!

Thank you for letting me help you! I hope to assist you in the future!

epicrhino - July 28, 2013, 11:57 pm

I am interested in setting up a rat could you contact me i will send you my skype info ty

Gaddovisor - July 29, 2013, 12:34 am

I am in need of help fixing Dark Comet, Can we do it over Team viewer?

xtremegamer1882 - July 29, 2013, 12:36 am

I would like to find out how RAT's and Crypter's work please... And a way to set a RAT with a Good Crypter up plz.

Venom NeTwork - July 29, 2013, 12:59 am

What would be the best place to upload a RAT for a direct download link that doesn't distribute?

Many thanks

~HN

Business - July 29, 2013, 7:45 am

~HN

Well, you can use paid sites like virushostr, or you can use sharesend for free!

The Guardian warrior - July 29, 2013, 7:49 am

How to get Girls Rat slaves what's the best way?

Business - July 29, 2013, 7:52 am

(Jul 29, 2013 07:49 AM)!~The Guardian~! Wrote: [\[CITE\]](#) How to get Girls Rat slaves what's the best way?

Disguise your stub as a download that girls would want. I have make mine look like a Justin Beiber song, and I said that it was unreleased. I can tons of downloads. Just make sure it is FUD and has a good icon.

sonic208 - July 29, 2013, 7:54 am

I cant afford a crypter

what else can i do to make my rat as undetectable as possible ? What are all things that i can do ?

Business - July 29, 2013, 7:58 am

(Jul 29, 2013 07:54 AM)sonic208 Wrote: [\[CITE\]](#) I cant afford a crypter

what else can i do to make my rat as undetectable as possible ? What are all things that i can do ? Purchase jRAT if you have the money. You do not need a crypter with jRAT.

josimc - July 29, 2013, 8:08 am

Everytime I got to see if the port for my rat is online using <http://canyouseeme.org/> I always get this error: <http://prntscr.com/1i6t08>

I don't know why this is happening because on my router look: <http://prntscr.com/1i6t1w>

Thanks in advanced!

sonic208 - July 29, 2013, 8:08 am

yes but as i say for the moment i dont have money respectively no paypal account due to my age ... so.. could u try to answer my question or is there nothing to do for my situation

Business - July 29, 2013, 8:12 am

(Jul 29, 2013 08:08 AM)josimc Wrote: [\[CITE\]](#) Everytime I got to see if the port for my rat is online using <http://canyouseeme.org/> I always get this error: <http://prntscr.com/1i6t08>

Thanks in advanced!

Make sure to go to Windows Firewall and turn it COMPLETELY OFF.

(Jul 29, 2013 08:08 AM)sonic208 Wrote: [\[CITE\]](#) yes but as i say for the moment i dont have money respectively no paypal account due to my age ... so.. could u try to answer my question or is there nothing to do for my situation

Try using the free version of jRAT? It is limited to 5 connections.

sonic208 - July 29, 2013, 9:04 am

oh ok i didnt know there is a free version of jrat
man this is crazy ill try it now...

Business - July 29, 2013, 9:06 am

(Jul 29, 2013 09:04 AM)sonic208 Wrote: [\[CITE\]](#) oh ok i didnt know there is a free version of jrat
man this is crazy ill try it now...

You can only have 5 connections on it, so it is not the best :p

sonic208 - July 29, 2013, 9:18 am

yes but until i get the money for buying it its okay

ehmm when i build the server i can choose which output it should have normally it is best to choose exe right ? Because then the victims can run it.. but i dont get an exe i get a normal .data and no .exe.. why the hell ?

Trisomy 21 - July 29, 2013, 9:38 am

Im pretty new to RAtIng and darkcomet. I followed a couple tutorials on hf here, made a stub, but when I tried running it on Anubis nothing came up in my users, do you know what could cause this? Im using nVPN btw, so I port forwarded with nVPN. If you find time to skype with me I would appreciate it a lot.

Business - July 29, 2013, 9:52 am

(Jul 29, 2013 09:18 AM)sonic208 Wrote: [\[CITE\]](#) yes but until i get the money for buying it its okay ehmm when i build the server i can choose which output it should have normally it is best to choose exe right ? You should get a .jar from jRAT. You can opt for a .exe, but I prefer the .jar

(Jul 29, 2013 09:38 AM)Dr. Penguin Wrote: [\[CITE\]](#) Im pretty new to RAtIng and darkcomet. I would double check your Windows firewall to see if it is COMPLETELY OFF. That is the very first step.

sonic208 - July 29, 2013, 11:49 am

sorry what does the abbreviation opt mean and is the jar executable on every computer ? Because the jar is the file i spread, isnt it ? ... and its fud do i understand right ? thx for ur help :)

Swiftson - July 29, 2013, 11:59 am

Hi. ?

I'm interested in a RAT but not sure which to choose/use. I mainly want one to if has a feature to use victim's connection as a proxy via Http/Https 8080 or 3128 ports. And but not really via socks 4/5 ports.

And but not a necessity as the above proxy feature, but also if the same RAT comes with a good number of DDOSing types feature

So yeah is there 1 or more single RATs out there like that?

elzor - July 29, 2013, 12:09 pm

What is the best crypter to use if you are buying one?

also, which is the best crypter to use for free, if any?

Fluffy_Raptor - July 29, 2013, 12:26 pm

Is there any good guides for setting up jRAT 4.2 on mac?

I can find a lot for Windows; just not for mac that is updated to 4.2 jRAT.

Trisomy 21 - July 29, 2013, 12:26 pm

(Jul 29, 2013 09:52 AM)RAT Setup Wrote: [\[CITE\]](#) You should get a .jar from jRAT. You can opt for a .exe, but I prefer the .jar

I would double check your Windows firewall to see if it is COMPLETELY OFF. That is the very first step.

I made sure all of my firewall/AV was down when I tried darkcomet. I fixed the port problem. But I still cannot get any slaves to show up on my users tab. If you can get it to work i will pay you paypal, but i have spent 2 hours just trying and nothing seems to work.

Business - July 29, 2013, 5:59 pm

I personally like jRAT. Why? It can infect Macs and PCs, which will let you get a larger variety of victims. Plus, you do not need a crypter when using jRAT. It is fast, stable, and easy to use.

God Emperor - July 29, 2013, 6:19 pm

Thank you for the fast response, I appreciate it. I just have another question, what makes all of the other RAT's different from CyberGate or any other free version?

I heard Imminent Monitor is the best RAT, and I already have a license with one of the greatest crypters sold here, so if the only reason jRAT is considered greater is due to Mac support & FUD, crypting shouldn't be a problem for me.

On the jRAT thread, I see a lot of issues happening, that's the only reason I was straying awaying

from it. So you believe jRAT is more considerable than Imminent Monitor & CyberGate?

Business - July 29, 2013, 6:22 pm

jRAT is updated twice a month, which eliminates all problems quickly. It is bug free right now. Imminent is fast, but I would not consider it the best. If you are looking for something besides jRAT, second is Black Shades. Amazing RAT really. It is much better than Imminent.

Snick - July 29, 2013, 8:08 pm

difference btw a keylogger and a rat ?? sorry i am NOOB in all these stuffs :(

how do i stay safe from it lol??

even if its 100 FUD with no detection rate and awesome crypted?? how do i recognise them??

Business - July 29, 2013, 8:11 pm

There are many ways to detect RATs. The White Hat section could assist you better with removal and detection.

There a several RATs with DDoS features. I personally suggest using a botnet to do this, but I am sure you can find a RAT to do the job.

God Emperor - July 30, 2013, 10:34 am

Do you have any tips for spreading other than YouTube? I've tried YouTube, purchased Likes, comments, and A LOT of viewers, and it wasn't very successful.

Business - July 30, 2013, 10:36 am

(Jul 30, 2013 10:34 AM)GayPal Wrote: [\[CITE\]](#) Do you have any tips for spreading other than YouTube? I've tried YouTube, purchased Likes, comments, and A LOT of viewers, and it wasn't very successful.

I suggest torrents, and skype spreading. These are great ways to spread. Spreading is really about maximizing your methods, making it less likely for you to fail.

redpois0n - August 4, 2013, 10:59 am

rat setup is a great guy who knows his stuff in this field ?

Sword Art Online - August 4, 2013, 11:55 am

are there any good unsaturated methods of spreading that you are willing to share :)?

SOPS - August 4, 2013, 11:56 am

What port should I use for blackshades? I tried opening 1604 with my router, but could not. Could you possibly teamview me?

Business - August 4, 2013, 11:57 am

(Aug 4, 2013 11:55 AM)Sword Art Online Wrote: [\[CITE\]](#) are there any good unsaturated methods of spreading that you are willing to share :)?

Very broad... define "unsaturated" in your own words, referring to spreading.

Sword Art Online - August 4, 2013, 11:59 am

(Aug 4, 2013 11:57 AM)RAT Setup Wrote: [\[CITE\]](#) Very broad... define "unsaturated" in your own words, referring to spreading.

Methods other then:

Youtube

EWhore

Torrents

Chatrooms

Pastebin

Yasuð - August 4, 2013, 12:14 pm

What do you think I need to do? I don't have money but:

-Should I RAT using a VPN (I don't have money to pay for that only credit card, and I don't want to add it on PayPal)

-Should I RAT using my own IP?

Can I be in jail if I RAT?

Business - August 4, 2013, 12:14 pm

I would say using Skype is great. Once you infect someone, spread using their Skype. I have gotten hundreds that way.

Yasuđ - August 4, 2013, 2:06 pm

Could you answer me?:)

What do you think I need to do? I don't have money but:

-Should I RAT using my own IP?

Can I be in jail if I RAT?

ForeverJohn - August 4, 2013, 2:12 pm

Dear, Nocturne

Yes, you can be arrest for using Rat. But, that is why other people, use a IP hider, or a IP Changer, so they wouldn't because. Hoped, I helped.

Business - August 4, 2013, 2:14 pm

Jail is highly unlikely. Please use caution while using such tools, however.

Anonimox - August 4, 2013, 3:01 pm

so, can u tell me where or how can i get undetected icon's.

cox most of the icon's r now detected by AV's.

Thanks

Business - August 4, 2013, 3:04 pm

Making one yourself is a good way to make sure it is not detected. I could upload my icon collection.

DildoSwag420Blazelt - August 4, 2013, 3:07 pm

Can you crypt for me? I'm not a noob.

Won't scan on VT or spread using dumb method

Business - August 4, 2013, 3:08 pm

I do not crypt, as I do not own my own. I purchased it here on Hack Forums.

Anonimox - August 4, 2013, 3:36 pm

tell me any site or any software that i can make an icon's undetected from my own.

Business - August 4, 2013, 3:58 pm

I can send some to you later. I will when i get home

Removed - August 7, 2013, 12:33 pm

Is portforwarding with a VPN the same as without?

My VPN says they have all ports open but I can't seem to get it to work. Do I have to do something extra with DC to get it to work with a VPN?

Business - August 7, 2013, 12:36 pm

(Aug 7, 2013 12:33 PM)Removed Wrote: [\[CITE\]](#) Is portforwarding with a VPN the same as without?

My VPN says they have all ports open but I can't seem to get it to work. Do I have to do something extra with DC to get it to work with a VPN?

Yes it is. As long as your VPN supports port forwarding, it is the same thing.

crisps - August 7, 2013, 1:08 pm

do you have skype be easier to talk bro

Business - August 7, 2013, 1:09 pm

No sorry, I do not use Skype. Please ask here if you have any questions.

mooreblech - August 7, 2013, 2:14 pm

i want to know if i can attached my server(FUD) as an attachment with any of the free email services out there and send to someone with it being flagged as supicious file

Business - August 7, 2013, 2:15 pm

(Aug 7, 2013 02:14 PM)mooreblech Wrote: [\[CITE\]](#) i want to know if i can attached my server(FUD) as an attachment with any of the free email services out there and send to someone with it being flagged as supicious file

I suggest you upload it to a direct download site and them link it in the email, much better way.

mooreblech - August 7, 2013, 2:19 pm

(Aug 7, 2013 02:15 PM)RAT Setup Wrote: [\[CITE\]](#) I suggest you upload it to a direct download site and them link it in the email, much better way.

How do i do that cos am suppose to be mailing my RAT as pics,involving a third party downloading site will raise eyebrows.Can i attached it and send it through a private SMTP server?

Business - August 7, 2013, 2:26 pm

You can attach it. That will work fine, just stranger.

mooreblech - August 7, 2013, 2:31 pm

(Aug 7, 2013 02:26 PM)RAT Setup Wrote: [\[CITE\]](#) You can attach it. That will work fine, just stranger. thanks for the quick respond.i really appreciate

Business - August 7, 2013, 2:31 pm

No problem. Feel free to ask anything.

Massacre - August 7, 2013, 9:08 pm

Hey RAT Setup,

Today I have started using RATs again & for some reason the No-IP DUC program keeps giving me the "Request times out." error.

I am entering my email & password correctly, Since i log in to no-ip.com with the same email & pass, but it still gives me the same error over & over again.

Anyone have any idea what's going on?

(Copied from original thread...?)

Business - August 7, 2013, 9:10 pm

(Aug 7, 2013 09:08 PM)Massacre Wrote: [\[CITE\]](#) Hey RAT Setup,

Try user a crypter with a binder. You can find awesome crypters here:

<https://hackforums.net/showthread.php?tid=3675979>

purplemilkftw - August 9, 2013, 8:15 pm

Hey I need help for setting up darkcomet rat...

Wanna do it over skype or teamviewer? There will be no test neede from you so don't worry for me infecting you.

I port fowarded.. port open.. no-ip set up.. but darkcomet still wont show victims when i test on myself.. I need help, and I hope you'd be able to.

Business - August 9, 2013, 8:17 pm

I suggest you take a look at my new thread:

<https://hackforums.net/showthread.php?tid=3680749>

autorunman22 - August 9, 2013, 8:28 pm

Me and my friend are having trouble opening up my computer port. I dont actually have a router connected on my computer, we're just using USB Stick Modem (prepaid load)

We've already used the Utorrent method but it didn't open the port we want to. We also used the DC's UPNP Option but still no luck opening it.

Can you tell me unique methods to open my fucking port? We're getting pissed ATM.

Business - August 9, 2013, 8:32 pm

Try buying a VPN. Check the thread I linked you and go to the bottom of the port forwarding section. Reply on that thread if it helps.

Blazeplex - August 9, 2013, 11:24 pm

Hey!

Thanks for what you're doing. My DarkComet server.exe is always corrupted when I try to crypt it on Byte Crypter. The server.exe works when it is straight out fresh from DarkComet. When I crypt it, it won't work.

Here are my DC settings:

<https://imgur.com/a/3gNd3>

Here is my Crypter and Obfuscator settings:

<https://imgur.com/a/7U3Z0>

Thanks for taking time to look at this ticket!

coks - August 10, 2013, 1:17 am

Hi! I need a rat, coded by c++. The reason is: i dont want to dependies .net or java or anything else.

Do you recommend me one?

Thanks!

Business - August 10, 2013, 5:56 am

.NET dependencies, and java dependencies, effect less than 15% of computers.

SIM-1908883 - August 10, 2013, 6:00 am

So I know my rat works as #Lulzvex tested it for me by sending it a connection, so all good there.

I started to spread it and it got 11 downloads on ge.tt, but i don't have any slaves? None popped up or anything, the only one i had was the one that #LulzVex sent.

Look at this screenshot for proof of the 11 downloads

<http://prntscr.com/1kg32e>

Anyone know why this has happened? Cause if this always happens then my rat's practically useless.

-Vimpz

Business - August 10, 2013, 6:02 am

They might have simply downloaded it, got suspicious, and did not open it. This, or there is a problem with your file.

kammi321 - August 10, 2013, 6:10 am

Can you help me with Jrat? For some reason its not working for me. Port is opened there is no firewall, windows defender on and no AV installed. Java is fully updated latest version. I am using correct password and encryption on server build area as well as on socket area. Still when i test my jrat server it never comes. I tested on my vmware which has latest java installed and all protection disabled. Can you help me over teamviewer please?

Business - August 10, 2013, 6:10 am

Are you testing on yourself? This does not always work due to NAT Loopback.

SIM-1908883 - August 10, 2013, 6:12 am

(Aug 10, 2013 06:02 AM)RAT Setup Wrote: [\[CITE\]](#) They might have simply downloaded it, got suspicious, and did not open it. This, or there is a problem with your file.

Hm well altogether with other sites its on there are 17 downloads, so one of them must of opened it, i don't see what could be wrong with the file though?

Business - August 10, 2013, 6:13 am

Are you sure that it works? You can always check my tutorial to see if you set it up correctly:

<https://hackforums.net/showthread.php?tid=3680749>

<https://hackforums.net/showthread.php?tid=3680749>

I've tested it on myself, my brother and #lulzvex tested it and it worked for all? But just doesn't work for randomers

Business - August 10, 2013, 6:17 am

Strange...is it FUD? If your file is not FUD, it could be opened and detected.

SIM-1908883 - August 10, 2013, 6:22 am

(Aug 10, 2013 06:17 AM)RAT Setup Wrote: [\[CITE\]](#) Strange...is it FUD? If your file is not FUD, it could be opened and detected.

Well i bought a crypter from MARVId (Absolute Crypter) Which is supposed to be FUD 0/35, but i have noticed it is actually 7/35 Hm, but surely it can't of been caught by every person, because i tried it on this randomer and he said he opened it but nothing happend, which is what is supposed to happen as i took the message box off, but he didn't pop up as a slave :s

Business - August 10, 2013, 6:22 am

Try making a new file and crypting it, then test it.

redpois0n - August 10, 2013, 6:23 am

(Aug 10, 2013 06:22 AM)Vimpz Wrote: [\[CITE\]](#) Well i bought a crypter from MARVId (Absolute Crypter) Which is supposed to be FUD 0/35, but i have noticed it is actually 7/35 Hm, but surely it can't of been caught by every person, because i tried it on this randomer and he said he opened it but nothing happend, which is what is supposed to happen as i took the message box off, but he didn't pop up as a slave :s

That might be it. 7/35 is very bad in your case

SIM-1908883 - August 10, 2013, 6:24 am

(Aug 10, 2013 06:22 AM)RAT Setup Wrote: [\[CITE\]](#) Try making a new file and crypting it, then test it. Testing the rat on someone or testing it to see if its fud?

(Aug 10, 2013 06:23 AM)redpois0n Wrote: [\[CITE\]](#) That might be it. 7/35 is very bad in your case I know, it was 0/35 fud on the first few rat's crypted, but now its 7/35 so i may have to buy a new one when i get the money -.-

Business - August 10, 2013, 6:25 am

I am saying you need to recreate a file, crypt it, and test to see that it works.

redpois0n - August 10, 2013, 6:30 am

(Aug 10, 2013 06:24 AM)Vimpz Wrote: [\[CITE\]](#) Testing the rat on someone or testing it to see if its fud?

I know, it was 0/35 fud on the first few rat's crypted, but now its 7/35 so i may have to buy a new one when i get the money -.-

If it is a serious crypter, it will be refudded, if not, you might want to get a rat fud by nature or crypter included. jRAT is always near fud, and gets refudded each update

SIM-1908883 - August 10, 2013, 6:36 am

(Aug 10, 2013 06:30 AM)redpois0n Wrote: [\[CITE\]](#) If it is a serious crypter, it will be refudded, if not, you might want to get a rat fud by nature or crypter included. jRAT is always near fud, and gets refudded each update

Hm yeah this is the thread for it:

<https://hackforums.net/showthread.php?tid=3237193>

So for jRat you don't need a crypter?

Business - August 10, 2013, 6:39 am

No crypter is needed with jRAT4, and it is usually FUD. Highest it gets is 1/35.

SIM-1908883 - August 10, 2013, 6:45 am

(Aug 10, 2013 06:39 AM)RAT Setup Wrote: [\[CITE\]](#) No crypter is needed with jRAT4, and it is usually FUD. Highest it gets is 1/35.

Okay Thanks, so how much is it 30\$?

Business - August 10, 2013, 6:47 am

Yes. It is \$30 and updated every month.

redpois0n - August 10, 2013, 6:52 am

(Aug 10, 2013 06:47 AM)RAT Setup Wrote: [\[CITE\]](#) Yes. It is \$30 and updated every month. It is updated every 2-3 weeks and there is a update today.

SIM-1908883 - August 10, 2013, 7:17 am

This is something that confuses me... in some tutorials people say that you should tick "Start the stub with windows (Installation)" and some people say you shouldn't: /

<http://prntscr.com/1kgf2o>

Business - August 10, 2013, 7:18 am

Do not add startup when building your stub.

SIM-1908883 - August 10, 2013, 7:22 am

(Aug 10, 2013 07:18 AM)RAT Setup Wrote: [\[CITE\]](#) Do not add startup when building your stub. What difference would it make? Because i was planning on having it a persistent installation.

Business - August 10, 2013, 7:24 am

You add startup when you crypt, not during build. Same with persistence.

SIM-1908883 - August 10, 2013, 7:30 am

(Aug 10, 2013 07:24 AM)RAT Setup Wrote: [\[CITE\]](#) You add startup when you crypt, not during build. Same with persistence.

Ah on this crypter it has startup, but not persistence :/

<http://prntscr.com/1kggt3>

Also, heres the new rat i just crypted, the test.

<http://prntscr.com/1kgh16>

AdGo57 - August 10, 2013, 7:46 am

Hello dear,

I have a problem, I need to bind my RAt to another program but when it's done and that I execute it, the only thing that works is the RAT, the other program doesn't open.

So it loose all its interest..

Do you understand ?

Do you have an idea, a solution ?

Thank you in advance !

Business - August 10, 2013, 7:58 am

No problem! If you have anymore questions, feel free to ask.

fxb0t - August 11, 2013, 2:10 am

Hey RAT Setup.

Im currently using win8, i did everything as i used to do on my win7. Port-Foward, No-IP. Tried to run my server Sandboxed and i cannot see connected user on my darkcomet.

Any help pls??

Business - August 11, 2013, 2:13 am

See if this thread helps you:

<https://hackforums.net/showthread.php?tid=3680749>

fxb0t - August 11, 2013, 2:17 am

Hey and thanks for fast reply. Alrady tried everything there..

would you check it if i use join.me?

Business - August 11, 2013, 2:18 am

Are you testing on yourself? If so, you might not be able to.

fxb0t - August 11, 2013, 2:22 am

Yup. also using my laptop and sending it there. It doesnt work either..

laptop uses win7.

Business - August 11, 2013, 2:24 am

You can not test on your own connection due to NAT Loopback. (Most likely)

fxb0t - August 11, 2013, 2:25 am

oh i see. is there any other way which i can test it?

M?trix - August 11, 2013, 3:59 am

If I want to get some accounts that may be worth some money e.g. steam, netflix,hulu,origin accounts and so on. What we be the best spreading method.

Business - August 11, 2013, 4:02 am

I suggest you try Forums. Going on movie forums, etc...that will produce better Netflix chances. :D

adityagupta1994 - August 11, 2013, 6:32 am

Can you help me solve port forwarding issues that i am facing when i attach a wifi (cisco 120n) between my pc and modem ?..

When i remove the wifi everything works perfectly.. but when connected to internet through wifi i cant port forward.. even though i have forwarded my ports properly in wifi too along with the modem..

fxb0t - August 11, 2013, 7:27 am

(Aug 11, 2013 02:24 AM)RAT Setup Wrote: [\[CITE\]](#) You can not test on your own connection due to NAT Loopback. (Most likely)

tnx alot. Tried on a friend and worked :)

Perelman - August 11, 2013, 7:58 am

Hi dude, i've got a question about RAT, , i've install the RAT, the crypter, in a VM, i use no IP, and to set up the " no ip updater" in "client setting" it doesn't work , port 1604 is open i've already checked, the DUC is open so ... what I must do? Is it possible to use no ip on a vm? I guess ... Thanks

Business - August 11, 2013, 11:08 am

I am not sure where your problem is... if you have join.me I can take a look.

Everything should work find on the VM.

How unsafe is it to host a RAT on a PC even behind a VPN?

Qviist - March 2, 2014, 4:14 am

Hey do you know any way to upload or send the virus so it dosent gets unspoofed?

Thanks in advance!!

chris811 - March 2, 2014, 5:10 am

Im having problems with port-fowarding!! Im using DarkComet 4 because im having problem with the No-ip updater in DarkComet 5. When i go to Network Settings in Darkcomet 4 it says that [Localhost was successfully connected to port: 1604 / LAN (192.168.1.xxx) was successfully connected to port: 1604 / xxxx.no-ip.biz was not successfully connected to port: 1604].....p/s: I've followed the exact instruction on how to port-foward on your router and computer!! ? and also, what's the function of no-ip??? Can i use a RAT without it and what will happen if i do??

driton007 - March 2, 2014, 5:15 am

Do you can ask ? What do jRAT is that a good product?

Thanks bro

lordofrandom03 - March 2, 2014, 7:01 am

I have darkcomet problems.I don't know what is the problems.

I portfoward everything properly,download all neccesery files,and start.

I get the error when i want to connect no-ip with darkcomet and it says that it's unable to connect.

When i build a stub,it wont work.

Please Help,Thanks.

(the version of darkcomet i use is 5.3.1)

DeadBeam - March 2, 2014, 7:03 am

Hey,

I use FileGuardian with DC and njRAT.

I always choose the .exe extension and then I spoof it to .avi or .wav

but when I post it on skype or something, the download says it is a .scr file (screen saver)

I think some computers refuse to download this kind of files.

Help please?

Thanks

Business - May 5, 2015, 11:32 pm

To avoid spam in the RAT section, post any questions you may have here!

Mcbride - May 6, 2015, 12:25 am

I see people talk about dependencies, what's that and how does it apply to rats

SilverSkies88 - May 6, 2015, 4:03 pm

Hello, thanks for your service. I'm wondering if it is easy to trace a RAT, I'm trying Nanocore. If I left a USB stick around with a RAT file on it, and someone got curious and infected themselves, from that USB would the RAT be traceable back to me?

Thanks

Business - May 6, 2015, 4:39 pm

I personally like to keep my stub as vanilla as possible, but if there are settings that you really want in the stub by all means! However, make sure that none of your stub settings conflict with those from your crypting. I personally like to do startup on crypter no matter what.

I am not quite sure if redpoison still updates jRAT or not. Feel free to check the official website for that answer!

waganer25 - May 9, 2015, 8:27 am

whenever i close my RAT i lost my client(s).does this caused because i'm offline? or my stub has been detected by AV?or i need to setup a server for 24/7 to keep my RAT online?

Business - May 9, 2015, 8:32 am

(May 9, 2015 08:27 AM)waganer25 Wrote: [\[CITE\]](#) whenever i close my RAT i lost my client(s).does this caused because i'm offline? or my stub has been detected by AV?or i need to setup a server for 24/7 to keep my RAT online?

Well when you close it they should be gone, since you closed the program! Maybe restate what you mean?

glysce - May 9, 2015, 9:36 am

Is there anyway to make DarkComet very hard to get rid of? I've been using Plasma RAT and computers can't really find it, but it doesn't have very many features.

Business - May 9, 2015, 9:40 am

(May 9, 2015 09:36 AM)glysce Wrote: [\[CITE\]](#) Is there anyway to make DarkComet very hard to get rid of? I've been using Plasma RAT and computers can't really find it, but it doesn't have very many features.

Crypting is your solution to this. If you use the proper settings while creating your stub and crypting, your stub should be very difficult for someone to remove.

Probably not the most powerful remote desktop tool around, in that case. This can be caused by the strength (or lack there of) of the connection.

kurorolucifer23 - May 10, 2015, 1:13 am

Hello Business, When i am installing another server of another rat for backup i am losing my infected pc i dont know why? and also i am receiving a notification in infected PC which that showing my server installation location. which way you recommending that should i install a backup rat ? to not lose the pc to not receive that notification.

Tigernoob - May 10, 2015, 6:30 am

I have purchased razor crypt and some how when i crypt my infected file from dark comet it doesnt work on other people can u please help me?

ffsagain - May 10, 2015, 8:56 am

Superb piece of marketing sir ?

Runtime and scantime drive me crazy, I use 4 pc each with one av to test. Either AVG/Avast free norton or mcafee, when I download my files from various sites I own or non-sharing .exe hosting they are always spotted. I was going to try msil cloud crypter but before more \$ is lost, could you be so kind as to check these settings and see if their are any obvious problems for runtime?

My .exe settings are 'Startup' Wait until restart, 'keylog & socks' boxes checked, 'Protection' Elevated Process Delete ZoneID
Process Persistence all checked.

Crypter settings are 'Main' I use icon changer. 'Injection & install' Comparability box ticked-Injection-self. 'Advance Options' Message Prompt title-Adobe Download Assistance Body-Thank you, Delay Executions-25secs, I bind a file & Remove zoneID is checked.

On scantime checking with msil the above only shows Ikarus as detecting which is great for me.

Niel Degress Tison - May 22, 2015, 5:12 pm

I have Luminosity and it is great but I obviously can't have the clients connecting directly to a DNS that resolves to my IP. How do I keep myself anonymous and safe when controlling the RAT stubs? Also, is there any way that I can avoid having to create a stub per computer? Finally, are there any crypters that are good, FUD, and work with Luminosity that have lifetime licenses?

Business - May 22, 2015, 5:15 pm

(May 22, 2015 05:12 PM)I Cant Stop Wrote: [\[CITE\]](#) I have Luminosity and it is great but I obviously can't have the clients connecting directly to a DNS that resolves to my IP. How do I keep myself anonymous and safe when controlling the RAT stubs? Also, is there any way that I can avoid having to create a stub per computer? Finally, are there any crypters that are good, FUD, and work with Luminosity that have lifetime licenses? FUD Crypter: Dragon Crypter

You could ask the owner of Luminosity to create a stub for you using your DNS, but they may not do it.

As for staying hidden, you can use RDPs and VPNs to help a bit. In my personal opinion, if you are that paranoid about it, you shouldn't be doing it, you know what I mean?

Niel Degress Tison - May 22, 2015, 5:20 pm

(May 22, 2015 05:15 PM)?usiness Wrote: [\[CITE\]](#) You could ask the owner of Luminosity to create a stub for you using your DNS, but they may not do it.

What do you mean by this? Sorry, I'm not too experienced with RATs. Thanks very much for your help though!

(May 22, 2015 05:20 PM)I Cant Stop Wrote: [\[CITE\]](#) What do you mean by this? Sorry, I'm not too experienced with RATs. Thanks very much for your help though!

If you don't want to build a stub on your own PC, you can ask someone else to build it and send it to you. All they need to know is your port and DNS domain.

Sourhead420 - May 22, 2015, 5:23 pm

Instead of noip what should I use? That is safe!!

Niel Degress Tison - May 22, 2015, 5:23 pm

(May 22, 2015 05:21 PM)?usiness Wrote: [\[CITE\]](#) If you don't want to build a stub on your own PC, you can ask someone else to build it and send it to you. All they need to know is your port and DNS domain.

Well I'm really concerned about someone being able to just sniff the connection to my IP from their computer which has the stub running on it.

Business - May 22, 2015, 5:25 pm

(May 22, 2015 05:23 PM)I Cant Stop Wrote: [\[CITE\]](#) Well I'm really concerned about someone being able to just sniff the connection to my IP from their computer which has the stub running on it.

If someone is dumb enough to be infected, they probably won't know about sniffing at all.

Dragon crypter is FUD last time I checked, check it out if you think it meets your needs.

Or, if you want a FUD RAT that does not need a crypter, check out OSCelestial RAT, it is FUD already.

tischbein1717 - May 24, 2015, 3:06 pm

(May 24, 2015 02:50 PM)?usiness Wrote: [\[CITE\]](#) Most extension spoofers are outdated. However, there are macro exploits for Word and Excel that are very easy to use.

YYou have maybe a tut or sth for it ?

Make sure you double check that your Windows Firewall is COMPLETELY off. If it is, double check your incoming connection firewall rules and ensure that DC is in there.

leadoffsundew1 - May 25, 2015, 12:41 pm

(May 25, 2015 12:29 PM)?usiness Wrote: [\[CITE\]](#) Make sure you double check that your Windows Firewall is COMPLETELY off. If it is, double check your incoming connection firewall rules and ensure that DC is in there.

The firewall is completely off, and the incoming connection is allowed for DC, but I still can't get him to connect.

Business - May 25, 2015, 12:56 pm

(May 25, 2015 12:41 PM)leadoffsundew1 Wrote: [\[CITE\]](#) The firewall is completely off, and the incoming connection is allowed for DC, but I still can't get him to connect.

Are you listening to your port in DC? All three tabs in the firewall are set to "Allow" and "Off"?

bobswag2 - May 25, 2015, 1:37 pm

Hi Business. I wanted to know if you could test my RAT? I've heard of Sandboxie, but have no idea how to use it. PM me please? Thanks

Business - May 25, 2015, 1:47 pm

(May 25, 2015 01:37 PM)bobswag2 Wrote: [\[CITE\]](#) Hi Business. I wanted to know if you could test my RAT? I've heard of Sandboxie, but have no idea how to use it. PM me please? Thanks

Sandboxie is actually very easy to use. Just download it, install it, and open Sandboxie Control. Once it is open. drag the file you want to test into the control box, and accept the pop-up that shows up. If all is working, you should get a test connection.

If that fails to work, do a second test with Anubis scanner, it can give you a test as well.

haklol - May 25, 2015, 1:59 pm

i did every steps to set up darkcomet but nothing happens. I port forwarded (succefull) i created a dns with duck and created the stub. But no slaves appear even after testing on home computer. Anubis didnt work either. Please help!

Business - May 25, 2015, 2:00 pm

songbird - May 25, 2015, 2:14 pm

Hey Business, just wondering which crypter you would recommend? I'm going to purchase Babylon soon and I assume it's not FUD.

Business - May 25, 2015, 2:18 pm

(May 25, 2015 02:14 PM)songbird Wrote: [\[CITE\]](#) Hey Business, just wondering which crypter you would recommend? I'm going to purchase Babylon soon and I assume it's not FUD.

Well, the best crypter in my opinion is Dragon Crypter, but the autobuy link seems to be broken, and owner is away:

<https://hackforums.net/showthread.php?tid=4801665>

On the other hand, if you are looking for FUD, you can always check out OSCelestial RAT. It is FUD and can run both controller and stub on multiple OS. Windows, Mac, Linux. Highly stable, and no need for a crypter:

<https://hackforums.net/showthread.php?tid=4791575>

I really suggest Babylon if you are only working with Windows computers, it is the best RAT for that job.

songbird - May 25, 2015, 2:22 pm

Thanks for your help Business, I appreciate the quick reply.

haklol - May 25, 2015, 2:27 pm

wich free crypter AND paid crypter do u sugest using

You may want to try testing on Anubis instead of Sandboxie! :)

run-htx - June 12, 2015, 9:14 am

I tried it on Anubis too but still a no go :(

frankluckas - June 12, 2015, 9:38 am

Just joined this forum - Which RAT can I get that stable and where can I get some tutorials on it?

Is JRat still the best?

Do i need crypters?

If RATS can be used to spam email, say Ali Baba leads; how do i go about this?

Can some one explain this to me in some simple steps?

kristov911 - June 12, 2015, 9:50 am

i want to know how to use our slave as a proxy

itxakash - June 12, 2015, 12:26 pm

Can you tell me which is the best suitable Android RAT ?

KardoseR - June 12, 2015, 2:18 pm

If a rat becomes unfud, its user would have to wait till the crypter is update to fud it again? so in this meantime he would lose bots?

Business - June 12, 2015, 2:34 pm

(Jun 12, 2015 07:52 AM)Snake Bite Wrote: [\[CITE\]](#) Hello Business, would you be kind enough to explain how RAT tools work behind the scene? As detailed as possible, from the moment of their execution and until full communication is established.

What protocols are used?

What ports are used?

How packets travel from the client->to the server?

How RATs make their way to the boot up menu?

How RATs hide themselves in the system?

And anything else you think that would be beneficial to understand the architecture of the tool.

I think you have me mistaken for a developer! ?

Expert user, not creator!

liamsi - June 12, 2015, 3:41 pm

Hello Business,

I recently discovered what RATs are and I have one question.

If a RAT is FUD, how could I know if I am not aleready infected?

Maybe I am paranoid, but my PC is slower since yesterday.
I don't have any AV, I just use Malwarebytes and Windows Firewall.

I am very careful about what I download, but who knows, maybe my PC is a slave already.

Business - June 12, 2015, 3:42 pm

[Malware, Rat, and Virus Removal](#)

They can help you check your computer for malware and even assist you in removing it!

dennisv - June 12, 2015, 3:44 pm

Hello Business,

Im wondering about something, earlier i used Darkcomet and it showed me the password of victims including mine.

Now im using Darkcomet again and it doesnt show me any passwords, should it be outdated? And if it is, what rat should you recommend me?

Thanks in advance. ?

Business - June 12, 2015, 3:46 pm

Thanks in advance. ?Dark Comet is very outdated and unreliable. I would recommend OSCelestial RAT.

OSCelestial RAT is coded in Java, and works on multiple operating systems like Linux,Windows, and Mac. You can control all of these using OSC RAT. It is 100% FUD (always), so no crypter is needed. It is highly stable and I suggest it if you plan on accessing many different OS.

It is updated very frequently as well.

Find it here: <https://hackforums.net/showthread.php?tid=4791575>

Thanks for that fast reply, appriciate it. ?

So it doesnt need to be crypted/binded and all of that other stuff to be FUD?

Is it easy on use from your experience? Just building the .exe and spread it around?

Business - June 12, 2015, 3:56 pm

Testing on yourself will not work unless your router has NAT Loopback enabled.

dennisv - June 12, 2015, 6:06 pm

(Jun 12, 2015 06:05 PM)?usiness Wrote: [\[CITE\]](#) Testing on yourself will not work unless your router has NAT Loopback enabled.

Ah and its different with darkcomet? Because if it is that the problem i gues.

Business - June 12, 2015, 6:08 pm

(Jun 12, 2015 06:06 PM)dennisv Wrote: [\[CITE\]](#) Ah and its different with darkcomet? Because if it is that the problem i gues.

No it is the same for all RATs, you may want to try getting some installs from a help desk or posting a request in the small favors section.

run-htx - June 12, 2015, 11:20 pm

Ran a stub on anubis and sandboxie but never got a connection, anything that you could think of that might be the problem? Firewall is down and port is being seen on canyouseeme

Business - June 12, 2015, 11:32 pm

(Jun 12, 2015 11:20 PM)run-htx Wrote: [\[CITE\]](#) Ran a stub on anubis and sandboxie but never got a connection, anything that you could think of that might be the problem? Firewall is down and port is being seen on canyouseeme

Try using the DMZ feature by inputting your internal IP and applying the change. (This is in your router)

matt325 - June 13, 2015, 12:51 am

I followed all your instructions, I made my own server, then transferred it to my laptop via external hard drive from my desktop, opened it on my laptop but I'm not getting any connections from NJrat on my desktop?

Business - June 13, 2015, 12:57 am

Local connection tests may be unsuccessful if your router has NAT Loopback disabled, try testing outside your network. You can try using [Anubis](#).

siriu5ttt - June 13, 2015, 1:07 am

Hi Guys,
need help in setting up a basic rat .

Anyone willing to help , i tried dns and vpn .. but not able to get it up working..

Thanks in advance..

@business

Have tried all that ..but not able to find out what i am doing wrong..

Can you help me ? . will to pay for your course as well.

matt325 - June 13, 2015, 1:16 am

[quote='?usiness' pid='46561722' dateline='1434182235']

Local connection tests may be unsuccessful if your router has NAT Loopback disabled, try testing outside your network. You can try using

Trying that right now, the laptop I want the RAT on is the one I'm testing it on, after tomorrow it will be at a different location and new IP, since I ran the server now will I start seeing it once it's not on a local connection? Or would the server need to be opened again? I won't hve physical access at that point.

Also, I went to anubis and upload my server. I got the results but no idea how to read all this info? What am I supposed to be looking for to know if it worked?

Business - June 13, 2015, 1:32 am

I have a question about port forwarding. If I port forward successfully on my computer without using a VPN and then I start to use a VPN, would my port forwarding still be valid or would I have to redo it?

Business - July 5, 2015, 1:19 pm

(Jul 5, 2015 01:06 PM)rowenmcdaniel Wrote: [\[CITE\]](#) I have a question about port forwarding. If I port forward successfully on my computer without using a VPN and then I start to use a VPN, would my port forwarding still be valid or would I have to redo it? You need to redo your port forwarding through your VPN.

If you use the VPN and then get off it, you still have valid port forwarding but if you want to be port forwarded on the VPN, you will need to do so.

rowenmcdaniel - July 5, 2015, 1:34 pm

Definitely go with 143 VPN. They are the best around.

kpown - October 5, 2015, 7:35 pm

Hello, I am having issues with my slaves going to task manager and ending the process. I use bytencrypter and made sure to tick all of the options. The rat does bind to startup so when the slave restarts pc they are conneced once again. Is there a way to keep the slave from ending process?

Also, I am having issues crypting to 0/35. I can get a consistent 3/35 but never 0. As I mentioned before I am using Bytencrypter which is supposedly top notch software so I must be doing something wrong.

Thanks in advance!

Business - October 5, 2015, 7:46 pm

is there a way to open a reverse proxy in a victims computer silently i mean not all rats have that feature. if not is there another way to bypass sites that block the account bec of ip change?

Armada - June 2, 2018, 9:17 pm

(Jun 2, 2018 08:13 PM)Rixpl0it Wrote: [\[CITE\]](#) is there a way to open a reverse proxy in a victims computer silently i mean not all rats have that feature. if not is there another way to bypass sites that block the account bec of ip change?

Im drunkenly answering this, so here goes.....

(Drinks a beer)

- Sure theres a way, fuck I do it all the time, when needed.

NOW what you have to ASK YOURSELF.
is the following.

"What the fuck am I doing, why am I attempting to try it, and if I do not know how, why am I asking a bunch of internet assholes for advice?" ???

I mean, I could easily HAND you the answer, I know it, but what would you learn then?

Your hint is the following 2 elements:

- One you dont know what the fuck you want
- You dont know the software to utilize to accomplish what you want to do (go back to #1)

Rertr0 - June 3, 2018, 4:10 am

Yes daxor its been asked before but the search feature on this sight is terrible

Are you asking which crypter is the best?

Nah im wondering which is the best encryption method to encrypt saved strings in the stub (config, connection, etc)

AES etc requires an encryption key to be saved in the stub. i was wondering if there are alternatives(except AES).

Business - October 5, 2018, 6:05 pm

How should I 'install' the RAT?If you are simply monitoring your children, you should be able to allow the file through your AV as an exception, and it will run in the background. They won't be able to tell. You can control the client from a PC they don't use and view everything they do in real-time.
