Thread: [Beta 4 OTA Tonight/Tomorrow](#)

On?x - July 29, 2013, 9:26 am

The download is available on the Developer Site now supposedly. So we should be assuming that the OTA for Beta 4 is released tonight or tomorrow latest. It has been delayed for outside developers due to the hacking incident although internal Apple employees have had it for a few days.

The build number of iOS 7 Beta 4 is 11a4435d.

While the links are up, unfortunately they don't appear to be active for download just yet.

http://adcdownload.apple.com/ios/ios_7_beta_4/ios_7_beta_4__iphone_5_model_a1428__11a4435d.dmg is an example

I would hope that they could get it up today, they don't want to fall too behind because of the hacking incident a few weeks back.

Trill? - July 29, 2013, 9:35 am

Hopefully its going to be dropped today,
But if not that, I'm looking towards the jailbreak

Troye - July 29, 2013, 10:04 am

Just released at 1PM EST. Currently downloading.

TheNullz - July 29, 2013, 10:08 am

Does it have anything specific in the change logs?
