You can chose from any of the locations offered using the drop down in the client

ajhockey88 - July 29, 2013, 8:50 pm

Do you get a new ip with this vpn? Cuz i tried a free one and it didnt give a new ip

Moghul - July 29, 2013, 10:25 pm

Do we get multiple locations for \$2.99/m or just one IP to choose from many /

Derank - July 30, 2013, 12:56 am

Wait im confusef why is there two threads. If this is the same vpn I vouch

Discounts was banned. He scammed me and another member and got banned. Now that he is banned, he scammed another member and more people have surfaced saying Discounts was saying he'd get people into a group for \$250 when he can't.

tgre

Please continue your purchases with DiamondVPN please. I plan on teaming up with Amon as I have several ideas on how to take DiamondVPN to the next level.

Amon is very trustworthy, he made a new thread for this service and I wish him success.

This is not a support thread.
There is a ticket system, and yes, its instant delivery.

ajhockey88 - July 30, 2013, 8:45 am

ok so it looks like my subscription worked, but how do i actually use the VPN, i didn't get a single email, notification, or anything regarding the actual service. I tried a ticket but that didn't even email me either...

Hope the France & UK will be up tomorrow.

You should really improve the EXE.

Like removing the error while launching it.

Edit the cloud icon to diamond icon in the program

Disconnect the VPN automatically if we stop the process.

Add more VPN power for better download speed and choose strategic VPN location.

Status is not great so far (visiting a website is shit). Maybe implement it in the program if possible.

Maybe do a To Do List?;)

Other than that, this VPN is really awesome.

Amon is a fucking great support.

Yeah i will fix the client soon, but its not really something important.

It is just that cloudflare is blocking the connection so it can not check for update.

And to disconnect the VPN you will have to stop the OpenVPN process, and if you click "Disconnect" then it kills the OpenVPN process.

I can implent status to the Program but i thought having it on a website is better.

And thanks :)

Yeah but you should add a fonction that when we close/stop the Diamond VPN Process, it automatically kill the OpenVPN process.

Amon could you pass on this thread, the guy said you're vpn doesn't got any DDoS Protection or really bad.

I have been doing my best, if you are not happy with this go open a dispute on paypal. I never lied, i tried to get it to work but it did not, and my life is not my vpn so i cant be trying 24/7. And yes it do have ddos protection against small attacks, and we even got 160gb ddos protected server but could not get openvpn to work with it.

And there is nothing wrong with the software more than that CF is blocking your connection to check for update.

And i never claimed UK and FR location was online and working it was discounts who was lying, as you can see, i say "6" locations, not 8.

After a week of use, I can conclude that DiamondVPN is great. For example, I can connected to every server that provided by DiamondVPN without any speed issue at all. Furthermore, if one server is down, you can basically change to another server and continuing to use it without any issue about internet speed connection. Connecting to DiamondVPN server is just as same as connecting to my home network, which is awesome for a VPN. GLWS "Amon"!

This VPN is really shit. No dramaqueen here.

First of all: the downtime. Alright, every VPN provider can experience this. However, diamondvpn didn't even take the time to send emails or even announce it to their regular users. Me myself, wasn't even aware of it till I visited this thread.

Second of all: support. This is the shittiest customer support I've ever seen in my life. When I open a ticket, nobody even answers sometimes. And when they do they're acting like they're helping me but in reality the problem is still there. When I said I had problems with my port, they just send a screenie to say: "Hey, it works for us.", nothing more. No help, nothing.

Then: connection. Another shitty thing this VPN provider has issues with. Most of the time I can't even connect to half of the locations. When I can connect to them it's a REALLY SHITTY connection. It takes like 2 minutes to load up a webpage that should've loaded within 2 seconds. I opened a ticket regarding my concern and their excuse was: "A lot of users are using our servers, you can't expect it to run fast.", well guess what? I bought this VPN because you were advertising with your 1gbps port and your amazing speed.

Overall: sucks, sucks, sucks. I do not recommend this VPN to anybody. After my month is over I'm switching provider.

It takes like 2 minutes to load up a webpage that should've loaded within 2 seconds. I opened a ticket regarding my concern and their excuse was: "A lot of users are using our servers, you can't expect it to run fast.", well guess what? I bought this VPN because you were advertising with your 1gbps port and your amazing speed.

Overall: sucks, sucks, sucks. I do not recommend this VPN to anybody. After my month is over I'm switching provider.

Most people uses junk mails when registering so theres no reason to send out emails.

It is not my fault you do not understand how to use port forwarding, you probably thinks it should be open without a program using that port.

And the support is not bad, if you explain your problem you get a response, what are we supposed to reply if you say "hi my ports is not working", what we do is test it to see if it works or not, and if it works we tell you it works.

Funny, our VPN has good speeds and all servers are hosted on 1gbps but just because of that doesnt mean you will get 100mbps or 1gbps internet sped, this is a VPN not a internet cable.

Why use a shitty provider? Why not switch already ???

And we are currently searching for good ddos proctected server to swith the login servers to.

Everything is fixed and works now! This should not happen again :)

Where is the new us server going to be

Swish - August 18, 2013, 7:52 am

I just bought this VPN but there is no connection information on the client page.

I have also made a support ticket which haven't been answered yet.

EDIT: I found that the VPN info should come to my mailbox but there is just mail confirming my purchase, nothing else.

Yeah, I had to open a ticket to get my username and pass because their mailservers are down.

The person replying to me forgot to give me the IPs, so now I have a username and pass but nowhere to connect to until he responds..

This VPN looks really nice but you need to sort your site out.

The mail servers will be working within 24 hours.

And all tickets are replied within 24 hours, if not open a new one.

You need to add a feature for openVPN not it's own client and I portforwarding site of the website where you enter the port and it automatically opens the port and easy user interface.

You can use the openvpn client. There is a link to download just the config files if you want to, it is sent out when you receive your vpn in email.

And about the pf thing, we are working on it.

Hi, title says \$1.66/m, but Website says \$2.99/m

Which price is for us? :)

I've a question, will I be able to use Darkcomet rat on your vpn without port forwarding my router?
my router hasn't this facility so I'm looking for vpn :) please reply.

It is for \$1.66/month if you buy a whole year.

And yes.

On the website it says port-forwarding is only available in USA, yet USA is down. Any new news on
when you will be getting a new USA server?

Yeah if i find the time i will have it working today, i have a lot of to study atm, and portforwarding
works in US but it is not online. When it is online i will inform you.

Sorry to be pushy, but you guys really need to get a USA location. This VPN is almost useless to
me without it.

SIM-1206811 - September 1, 2013, 6:35 am

Can you guys please add a UK location?

It would be really great, as UK locations are very popular among VPN users

Nimbus. - September 1, 2013, 5:39 pm

ye i havent been able to use this on windows 8 i guess i have to chargeback as no reply via ticket
system pretty cool. :) thanks for the "GREAT SERVICE"

He will do a better job since i was to busy at last so couldnt run it.

All support tickets will be replied.
Portforwarding requests will be taken care of soon.

You realize pretty much all VPNs here cooperate with law enforcement except if they are not hosted in the US...
