Author's Note:

In any medium, it's important to develop the eye to see and perceive the shadows / lights before laying it down. Start by observing things around you. A good start would probably be observing and understanding [this sphere](#). Also, check the links below to have a better understanding of this tutorial.

Learning Outcomes:

- Ability to produce several shading techniques using various tools in Adobe Illustrator.

Baghead - July 29, 2013, 10:27 pm

Another great tutorial mjaj. These are some sick techniques!

Issvor - July 30, 2013, 2:26 am

Holy crap, this is amazing. Thanks for sharing this! :D

Vector Master - July 30, 2013, 9:29 am

you're welcome :P i'll write as much as I can while I still have free time.

Looking forward on seeing pieces done using my tutorial xD lol.

+Awesome - July 30, 2013, 9:31 am

Damn these are awesome. Great job again mjaj!

Wentworth Miller - July 30, 2013, 10:01 am

Please keep making tutorials, they are just too awesome. I've learned so much from it and I made pretty decent work with what I learned from you. You're awesome, thank you.

Seems like you are starting to enjoy making tutorials :)

MyLittlePony - July 30, 2013, 10:58 am

Fuck, you're pretty good.

Very nice tutorial.
