Yui Hirasawa Wrote:Botwork Wrote:Hey Yui,

First off I'd like to say I love your bot. I would like to write a guide about it with spreading methods if you give me permission to do so? :)

Please reply with a written consent.

Thank you.

You're more than welcome to use it.

Thanks for asking before-hand, +rep for you!

Alan.

PLEASE COMMENT BELOW ON SUGGESTIONS

Although it's not a secret people spread on Omegle, it's simply too slow to do so without a VPS. I can guarantee most people DO NOT use a VPS to spread. Imagine, even if you got 10 bots per hour, if you had 10 VPS (for \$100), you would be getting 100 bots per hour which you can sell for \$10/ hour.

This is a great tutorial, thank you for your contribution to the community!

I tried this recently and had issues with the captcha appearing after every conversation, is there a work around for this?

Thanks.

I believe the bot bypasses captcha already. Alternatively you can use proxies. I will upload my premium proxy lists here later.

This product seems very useful, although I ran it for around 15 minutes I kept getting this pop up in the chat about straight/gay 18+ webcams causing the bot to stop typing. I'm not sure if I'm missing something here but I was wondering if you could help me out with this issue :).

No you only get temp banned from that one chat room. Also proxies would solve this if you happen to get IP banned which is very rare. With a list of 100 good proxies you could run this for 1 month 24//7 without a problem.

vituelnamasina39 - August 1, 2013, 4:18 am

Does it work with Wine under Ubuntu? Linux VPS is much cheaper than Windows.

Bot Products - August 1, 2013, 4:21 am

No it doesn't however you can get a cheap Windows VPS for \$10.

There aren't chatrooms on Omegle, there are just users.

I got permabanned for using a bot with Omegle. Using proxies makes it REALLY slow.

Using proxies has no effect when I'm running Omeglebot on my VPS. I've ran it for 1 month straight on one server and didn't get banned. :P

Don't use the same lines over and over, switch them up a bit so they know you're a real person.

10 slaves/ hour isn't bad considering the 5 min setup. If you have 10 VPS, that 10 slaves turns into 100 slaves, per hour, for a month, on autopilot.

Not to be rude but anyone could have came up with this?

When spreading what would you otherwise say?

"Hello im trying to infect you

Here is my virus: <http://myvirus.com/virus.exe>"

Ofcourse you say something like that, i dont see why you would need to make a tutorial for this?

This is like making a tutorial on how to make some one horny watch porn ???

And the poll is so stupid, just because one does not rat doesnt mean they cant have a botnet or something.

Just a warning I'm not saying anything but just recommending you to download the source and compile it on your own to be safe for sure.

It's a really awful coded dropper that is not able to inject the file properly.

Bot Products - August 21, 2013, 3:02 pm

I've just updated the bot with v1.40, should there be any changes/ issues with captcha there is none now. I will post a 30 hour proggy from one of my VPS.

PotSmoker - August 21, 2013, 3:44 pm

mmhmm i will try this.. thanks :) -35chr....

Loaf of Bread - August 21, 2013, 3:44 pm

Haha, I might try to out later thank you.

ipplaywin7 - August 21, 2013, 7:23 pm

Nice tut i will be trying this out tomorrow when ive got more time thanks for the guide

It's a really awful coded dropper that is not able to inject the file properly. Seemingly it doesn't interest hf members if files are infected or not?

Hankered - August 23, 2013, 10:49 am

How do I wait 10 seconds?

Thank you!

n1v4 - August 23, 2013, 12:13 pm

are people really dumb enough to click that link?

wow, rip earth

Tipiqle - February 17, 2014, 3:09 pm

Awesome program. Going to try it later. Thanks for all the help :)

KOF1998 - February 17, 2014, 4:47 pm

I really like this idea! Great way to mix your real life and your virtual one too :)

Bibl - February 17, 2014, 6:48 pm

Great way to spread, people always click links on omelge! thanks OP! :D

Locked Gates - January 18, 2015, 6:51 pm

This has never worked for me, but thanks anyway.

???? - January 26, 2015, 8:08 am

Lol nice tutorial, im getting or used to get 30 to 40 bots a day

Nice tut man.keep it up.waiting for more thnx

svenikolai - April 8, 2016, 9:15 am

Omegle spreader is super good! a few minutes on it and alot of victims haha !! Thanks for this tutorial

Klarion - April 8, 2016, 3:09 pm

how do you spread with this thing? You can't actually send files over omegle, right? So how then?

jaydenx - June 28, 2016, 6:09 pm

OH SHIT, NICE DUDE! GOOD FUCKING GAME. :D THANKS FOR THIS.

chrisjo - June 28, 2016, 6:32 pm

will have to give this one a try

retherenn - June 30, 2016, 10:27 am

This is really helpful. I'm going to put this knowledge to good use. Thank you.

Hi I'm Agreeable - August 1, 2016, 5:08 pm

Hey just going to try this <3

yeeheee - August 1, 2016, 5:55 pm

Thanks. Never really thought spreading on omegle was a profitable spreading method.

Jacob5263 - May 31, 2017, 7:03 pm

need a omegle bot! thanks for making this man!
