Thread: [\[SQLi\] Vulnerable sites list.](#)

**Hannibal.** - August 1, 2013, 12:35 am

Who could make me a list with some fresh vulnerable sites?

I need them for some challenges that I'll may post soon.

But I'm on Ubuntu right now and I don't have a tool and to check every site manually would take an eternity with my laziness?

So who has such a tool for gathering a list with fresh sites could give me a PM?

Thanks.?

Go and download sql poizon, scan for vulnerable sites, crawl them then inject them manually..have fun

**?Stark** - August 1, 2013, 1:27 am

Online sql scanner [PHP] by just dork

<http://pastebin.com/iUV2bxbw>

Which part of : I'm running Linux atm, you didn't understood?

I cannot run exe.

@ax02798

Thank you sir, I'll check it right now.?

@ax02798

Thank you sir, I'll check it right now.?Windows emulators are always an option. Wine / Mono it is.

**Hannibal.** - *August 1, 2013, 10:05 am*

I know but I don't want to overload my Backbox with win emulators.

**bankbouy** - *October 8, 2013, 5:45 am*

i think hard for found work url because dorks

**exploitit** - *October 8, 2013, 6:16 am*

Are you crazy or kidding with us ?

If you have linux you don't need windows to find some sql vulnerable site  
and if it's Backbox you already have all the tools needed
