Thread: [\[Spreading Method\] RAT Spreading](#)

Slizza - August 1, 2013, 3:00 am

Hello hackforums today I thought I'd post about a method I just thought of that seems almost foolproof.

1. Find a false positive file. (Example ~ Game Crack ~Undetected will attract more attention.~)
2. Make sure the file is false positive, this will indicate that AVs need to be turned off for it to work or not be detected.
3. Bind your RAT or Keylogger to the file you've found.
4. Re-Upload to a site (I recommend crypting it so if it's FUD you can upload it to a trusted site like Mediafire.)
5. Sit back and watch your Victims' list pile up.

Hope this was helpful to you.

FAQ

Q: Can you please link me to a free crypter?

A: I've always found good results with Chrome Crypter [\(Click Here\)](#) You're not going to get FUD as it's free but you'll get pretty close.

thanks plz can you help a good rat detail tutorial with download link & a free crypter link
really appreciate it
thanks

mpdxd1 - August 1, 2013, 4:05 am

Wow great thanks never thought about it

#R00T~ - August 1, 2013, 4:21 am

great method will help many people and noobs out, thank you OP.

dext3r22 - August 1, 2013, 5:20 pm

Wow great thanks never thought about it

--Alexander-- - August 1, 2013, 5:40 pm

You forgot to say to bind your server -_-
but thank any way

k12riv6 - August 1, 2013, 7:39 pm

im confused... lol ima noob. so u put your rat server file in the false positivedownload or something?

Hyptonix - August 1, 2013, 7:56 pm

Agree with Alexander. You never stated anything about the server file.. Also the method is also pretty old. But thanks for the contribute.

Mountains - August 1, 2013, 7:58 pm

seems like a good way to get victims

pk864 - October 15, 2013, 10:33 am

nice tut for the begineers...like me

kooddoo - November 7, 2013, 3:44 am

Wow great thanks never thought about it. Nice stuff

Moms1976 - January 18, 2014, 1:58 am

Simple method, kind of obvious but people still fall for it regardless. Thanks!

StefanZxR - January 18, 2014, 7:48 am

Seems like a good way to get some victims

tsoPANos - January 18, 2014, 11:15 am

But my torrent doesn't get downloaded???

FidelCashFlow - January 20, 2014, 7:25 pm

Thanks, I really need to work on my spreading.

versaceeros - January 21, 2014, 4:47 am

thanks plz can you help a good rat detail tutorail with download link & a free crypter link
really appriciate it
thanks

TJ???? - January 21, 2014, 7:20 am

Nice tutorial, gonna try this out later.

Thanks

photoshopp - January 21, 2014, 8:27 am

so how will people see my file? how will we spread it can you give more details thank you

boubasse - January 21, 2014, 12:38 pm

This method is very known, thanks for sharing it :)

vinylscratch - January 22, 2014, 4:03 am

thanks for the method man i tryed it and got alot more.

AkiraKiku - January 23, 2014, 9:18 am

Thanks for contribution man. The intention is what matters.

Craig1690x - March 13, 2014, 5:35 pm

Thanks for this it really helped!
