As legit as you are you should still post a virus scan.

It is the source code, you can check the source and compile by yourself.

Polymatical - August 3, 2013, 12:08 pm

Can you please post a list of features as well as a virus scan? Even though it's a worm and it's going to come up as positive.

.?cb. - August 3, 2013, 12:14 pm

Posted his latest thread design in the main post.
