Thread: [Free MyBB Support Thread + Teamviewer Support](#)

Armani Exchange - August 5, 2013, 5:57 am

Hello there,

I have 3+ years of experience in utilizing the MyBB Forum Software. I ran numerous of communities that ran MyBB and gained full experience in everything MyBB has to offer. If you are stuck with anything no matter what plugin installations or fixes, bugs, themes, coding, editing, etc. I will help you for FREE. I am a fast responder and will teach you via Team Viewer simple and fast to your understanding. I can also explain it to you via reply post if needed. Anything you need I'm here.

Please note that I may need you to enter my PC via Team Viewer as I work easier and faster due because If I enter their PC, the screen tends to glitch or lag which would disrupt my work. A new FTP account and Admin Account on MyBB would be needed which can be deleted via cPanel at the end of the session. (Then again I also provide support via reply post if you wish).

Thanks!

Hi,

I don't currently use Skype at the moment. I can chat via Yahoo or Facebook.
