Thread: [Setting up web booters\[CHOOSE 11+ SOURCES\] \[CHEAP\] \[FAST\] \[RELIABLE\]](#)

Zymfk - August 6, 2013, 2:41 am

PLEASE NOTE THIS ISN'T THE THREAD DONE, THIS IS TEMPORARY UNTIL I MAKE A THREAD DESIGN.

Have you ever wanted your own booter, for commercial use or personal use but never had the:

- Time
- Patience
- Knowledge

This is where I come in.

I have set up many stressers for people, I've made my money and I've even had my own project which was and still is successful. I give the customer all my knowledge on stressers.

What makes us different from other people? -11+ Sources to choose from, all on template websites, so you can see all the features with each source.

- Custom coded sources (with extra expense)
- Some people say they give you full support but they get pissed when you ask. WE GIVE YOU FULL, AND I MEAN FULL support. You will get a response instantly if you need help.
- Choice from shell/API

- FREE power added to your booter

Price you ask? \$25 FOR FIRST CUSTOMER DISCOUNT

Like I said, this is a temporary thread. ._.

iLikePonys - August 6, 2013, 2:42 am

How much 'free' power is added, are they shells/servers? Also, which custom coded sources, do you have the rights to resell them?

Thanks for you're question :)

I will add a small amount of power, enough to test it out on home connections to make sure everything is working and fine. Like I said specifically in the thread, you have a choice between shells and servers ?

As for you're last question. I'm not selling the sources. The sources are free, its the service charge of setting it up.

?
