Thread: [New to H@ck!ng /?/ \[\[n00b 2 n00b \]\]](#)

T0ucaNSaM - August 6, 2013, 8:24 am

Hey whats up HF. Wanted to create a thread for my 100th post be HQ

This thread is to inform a n00b who is trying to understand how to be the best at hacking or whatever he needs to know in order to become elite ninja ? hacker

Lets Begin shall we!
?

Social Engineering - Being bale to not only manipulate a computer but the human being controlling it is key to obtaining information , data , disrupt any situation.

Some of us are surprisingly expert liars which is what a Social Engineer does. For example , Those times when you wanted something from your parents to where you developed a plan in your head on how to obtain or get what you want from them, by knowing first what they will say if you give them an explanation , reading there body gestures , eye movement , etc.

Me: Mom can i go to Ryan house tonight?

Mom: Why?

Me: Because its for a group project.

Mom: Ok do a good job on it tonight.

?

^^ Right There!! ^^ Knowing that your mom may not say NO to you going out for HW but for sure will say NO if youd say to hang with friends

If you are interested in this art here are something i recommend looking up;

Kevin Mitnik -Ghost in the Wire , Art of Deception

Art of War

Social Engineering: Art of Manipulation PDF

Wikipedia Social Engineering

=====
NeXt!!!
=====

Watching Movies that deal with hacking sure encouraged me but also gave me an idea of how elite hackers worked

Kevin Mitnik - Takedown (YouTube)

Real of a Hacker (YouTube)

Matrix - All of them!!

Using Tools a.k.a (Internet)

Utilizing the tools that surround you is key. Whether it be threads on HF , friends you have made or answering your own questions. My biggest struggle right now is programming and sticking to one thing at a time because so much information can be overwhelming thus frustrating the early hacker. " anything is possible if you set your mind to it "

Let me know what you think guys?!!

SIM-5561 - August 6, 2013, 8:27 am

Not bad. Kevin Mitnik is the king of social eng. After having read his books and seen his interviews, nobody can match that guy. Epic. I disagree with the 'using tools' bit of your post. The problem is: people use tools and never learn the fundamentals about how the tools work. If they don't know how the tools work - they have a colossal disadvantage.

Otherwise, nice try.

Fly By Night - August 6, 2013, 8:37 am

Thank-you for the guide, Should explain to noobies.

T0ucaNSaM - August 6, 2013, 8:40 am

Appreciate it puzzle9. Yea hes a beast , i am finishing the book the art of deception and when he replaces some of the people in his stories with other names which i find a lil humorous because all i can imagine is him doing the hacks.

Yea i should have been more detailed about utilizing fundamentally the " tools " !

thanks bro
