Thread: [Ultimate RAT Section Guide](#)

Business - August 7, 2013, 9:46 am

*If you have a product or service you would like added to the resources listed below, please PM me.

This guide will help you figure out where to find what you need in the forum, as well as recommendations to solve common questions, so that you will not need to make an entire thread for one question.

In the RAT Section, there are plenty of people willing to help you. If you have any questions, you can ask them at any of these question desks:

[RAT Setup's question answering desk](#)

[RAT Setup's Ultimate Beginners' Guide to Dark Comet and BlackShades.](#)

[Sunlight's question answering desk](#)

[redpois0n's question answering desk](#)

[align=center]By utilizing these desks, we can reduce the amount of threads that are about the same questions.

Need further help? After asking your questions, you decide you need some hands on assistance. Many trusted people in the RAT section will screen share and assist you. Try one of these setup desk that I found:

[Depravity's RAT setup desk](#)

[Rainbow's RAT setup desk](#)

The best RAT to begin with:

Dark Comet is an amazing tool to begin with. You can use it to learn the basic functions. It is very user friendly, and easy to use.

Here is an untouched download for Dark Comet:

[Download Dark Comet](#)

Best RAT to invest in once you feel comfortable with the basic functions:

There are several great RATs on the market. Please have a look at them yourself and decide which one fits your needs the best:

(No particular order)

[BlackShades NET RAT](#)

[jRAT4 RAT](#)

[Imminent Monitor RAT](#)

[legacylink RAT](#)

It is essential to purchase a crypter if you are looking to RAT successfully. A crypter will keep your file FUD, or fully undetectable. Take a look at these crypters:

[RazorCrypt2](#)

[ChasoCrypter](#)

[Byte Crypter V3](#)

[Clarion Crypter v1](#)

[CryptME](#)

Need a way to test your stub? No problem. Once you create your file, before crypting, you can test it using Anubis.

On Anubis, you can upload your NON-CRYPTED stub and it will run a test on it. If set up properly, you will receive a temporary connection within your RAT.

[Test with Anubis](#)

If you need to test your crypted stub, you can create a thread asking for one. Be sure to check if there are any threads giving away test installs before making a thread asking for one.

Details about the leading RATs:

(No particular order)

[BlackShades NET RAT](#)

BlackShades NET has been sold here on Hack Forums for years now. It has a sleek, user friendly design. With many customers, it has become one of the most popular RATs on Hack Forums. Great stability. There is also a great line of BlackShades products to go along with BlackShades NET.

[jRAT4 RAT](#)

jRAT4 has been on Hack Forums for a year now. It was in beta for many months, and has recently been fully released. It is still updated often, and is a the leading Java RAT. With the ability to infect any computer running Java, it opens many possibilities. No crypter is needed when using jRAT4, a unique trait.

[Imminent Monitor RAT](#)

Imminent Monitor has self-claimed the crown of "The fastest RAT on Hack Forums". Although I am not sure this can be proven, it does have amazing speed. With its simple design, it is very user friendly. Fairly priced.

[legacylink RAT](#)

legacylink is one of the newer RATs here on Hack Forums. This RAT comes with a built in crypter, a rare feature for RATs. It has a sleek design, and is updated constantly. legacylink is growing into one of the best RATs on Hack Forums, and has awesome features.

Want a VPN to use while "RATting"? I suggest:

[BlackShades VPN](#)

Thank you for reading my guide. I hope it helped you!

Lungs - August 7, 2013, 10:45 am

This is very well laid out, thanks for this RAT SETUP.

Product is awesome and works perfectly with what i want to do, vouch for Jrat 4.

HIGHLY recommended purchasing if you are looking for a RAT.

Chills - August 7, 2013, 10:47 am

This is great! Should decrease the amount of RAT spam on here...nice job :)

Understalker - August 7, 2013, 10:49 am

As always, good high-quality thread RAT Setup. ?

Business - August 7, 2013, 11:31 am

Thanks for the positive comment. I appreciate it.

SWS. - August 7, 2013, 12:08 pm

This is a really nice guide with a lot of useful information about ratting. Keep up the great work RAT Setup!

Business - August 7, 2013, 12:37 pm

Thanks for the kind words regarding this guide!

redpois0n - August 7, 2013, 12:43 pm

Very nice thread friend... I smell something like Spoiler ([Click to View](#))

[img]http://x.hackforums.net/uploads/awards/sticky-bro.png[/img]

Business - August 7, 2013, 1:11 pm

Thanks. I am hoping to reduce spam of constant help requests with this, by having the requests asked in already existing threads.

Doxicity - August 7, 2013, 1:20 pm

This is a great thread. I'm sure it will help a lot of members. Maybe write somewhere that if you want your help desk to be added to the list, to PM you? Then you could just check that help desk out and see if it's good.

Business - August 7, 2013, 1:39 pm

Added, thanks. Great suggestion. I hope this thread helps out.

redpois0n - August 8, 2013, 5:54 am

Thanks for including my desk in this thread! =)

Business - August 8, 2013, 7:34 am

I hope this thread helps with the questions that you have!

Firef4rt - August 8, 2013, 7:39 am

Thanks RatSetup for this overview

35 characters need

Business - August 8, 2013, 9:24 am

Thanks for the kinds words, although that was a very LQ post. If you do not have anything over 35 characters to say, do not say anything at all.

Speeder411 - August 8, 2013, 6:41 pm

Um RAT Setup is the Darkcomet RAT download does it RAT me?

Business - August 8, 2013, 6:44 pm

(Aug 8, 2013 06:41 PM)Speeder411 Wrote: [\[CITE\]](#) Um RAT Setup is the Darkcomet RAT download does it RAT me?

Of course not. This thread is meant to help others.

Speeder411 - August 8, 2013, 6:56 pm

I'm very scared to get it

Do you need to disable all your malware and anit-virus things though?

Speeder411, Thank you

And another thing thank you soooo much for the RAT things

Business - August 8, 2013, 7:00 pm

I have had that file forever. I used to use it. It is not back doored.

Speeder411 - August 8, 2013, 7:01 pm

And why does it have the 531 at the end sorry for all the questions im just very concerned

Ok thanks for replying have a nice day sir ?

IM SO SORRY for all the replys sir but can you send me the official DARKCOMETRAT remover plz?

Business - August 8, 2013, 7:23 pm

IM SO SORRY for all the replys sir but can you send me the official DARKCOMETRAT remover plz? The 531 is the version. This is Dark Comet 5.3.1

Firef4rt - August 8, 2013, 7:27 pm

Sorry, first at all I need 10 Posts, thats right. But my english is not so pretty good at the moment. So I can't wrote down all what I am thinking in the right way. But I look only for threads were is it worthwhile to thanks and not do spam around some shit messages.

You do a good Job here and in the jRat threads, thats the only thing why i thanks to you here and post.

I hope you can understand what I will say in my bad english.

Please help me

What says expired? Where are you getting this error?

Speeder411 - August 8, 2013, 8:03 pm

When i press download it says Error code 3 please try again;;EXPIRED

That's exactly what it says

Umm

My thing says it appears to be malicious -_-

Me scared ._.

:scared:

AHH

Lol ok plz tell me what to do

Phishing and malware detection

Google Chrome warns you if the site you're trying to visit is suspected of phishing or malware, using Google's Safe Browsing technology.

What is phishing and malware?

A phishing attack takes place when someone masquerades as someone else to trick you into sharing personal or other sensitive information with them, usually through a fake website. Malware is software that gets installed on your machine often without your knowledge, and is designed to harm your computer or potentially steal information from your computer.

For more pointers on keeping your family safe on the web, read Google's Tips for Online Safety. Learn about other security settings and additional technologies, such as sandboxing and auto-updates, that Google Chrome uses to keep you safe on the Web.

How does Safe Browsing work?
Google Chrome phishing and malware alerts

Here are the messages you may see when phishing and malware detection is enabled:

Message What it means

The Website Ahead Contains Malware! This message appears if Google Chrome detects that the site you're trying to visit may have malware.

Thats what it says ._. soo plz help me

Business - August 8, 2013, 8:10 pm

Please PM me a join.me link. I am not sure what you are reading...

It is a RAT. It will be detected as a virus... you are supposed to turn off all AVs...

Speeder411 - August 8, 2013, 8:14 pm

Oh i feel silly

When i get it i can turn my AV's back on right?

Business - August 8, 2013, 8:14 pm

(Aug 8, 2013 08:14 PM)Speeder411 Wrote: [\[CITE\]](#) Oh i feel silly

When i get it i can turn my AV's back on right?

No. It will delete Dark Comet once it is detected.

Speeder411 - August 8, 2013, 9:01 pm

I got it THANKS SO MUCH BRO :D yYAYAYAYAYAYAYAYAYAYAYYA

I am glad you finally trusted me enough to give it a go. I hope you enjoy it.

G??gl? - August 8, 2013, 9:57 pm

Nice work, this will probably help out a lot of people

Blizzard - August 9, 2013, 4:08 am

Good thread but the layout could be better though.

It would be very helpful for other members on what decision they should take before buying a RAT, or asking questions to helpdesk and etc.

For improvements: Change the font or make the size smaller and choose a better and inspiring

color.

Business - August 9, 2013, 6:40 am

Will update thread with these improvements later today. Thanks.

racerboy1597 - August 11, 2013, 4:28 pm

Nice setup. thanks for the info. It helped me alot :)

Perelman - August 11, 2013, 5:20 pm

Hi, please do you know if I can only use the DUC from no ip and not no-ip updater in darkcomet it will work? thanks

Business - August 11, 2013, 5:23 pm

Do not use the built in No-Ip. Always use the DUC client.
