Linux. - August 7, 2013, 3:08 pm

Really like those colors you provided at the end of the tutorial. Nonetheless good job.

lenaos - August 7, 2013, 3:39 pm

Great tutorial BME :D. I will be sure to use this as a reference when I choose colors.

Endanger™ - August 7, 2013, 8:55 pm

I feel as if the background you chose was a weird color and made my eyes have to strain a little to adjust.

It was a great guide though, and I like the ending color swatches that you had included. Do you mind including the color codes to them?

Bad Meets Evil - August 7, 2013, 9:39 pm

The background colour is actually the average colour of the universe, that is why it was chosen.

And I'd just screenshot or download the image and sample the colours. Takes about the same amount of time which is why I decided against adding the colour codes.

And I'd just screenshot or download the image and sample the colours. Takes about the same amount of time which is why I decided against adding the colour codes. I just wanted to know them so I could save them some where, but I guess I'll just bookmark this thread for future references.

Also, the color seems fine now so I must have been transitioning into night time and the color was too bright as I had just gotten on.

Linux. - August 8, 2013, 2:01 am

BME could you do a tutorial on fonts? Pretty please.

SIM-1179616 - August 8, 2013, 2:35 pm

I agree, BME would make a mean font tutorial.

Nice tutorial, I'll definitely be referencing it.

medo5120 - August 8, 2013, 3:32 pm

Great TUT m Honestly and one of a kind too thanks for it i'm sure it will help me a lot

Bad Meets Evil - August 9, 2013, 11:48 pm

Thanks guys. If I have some time I'll work on a typography and font tutorial.

Bad Meets Evil - August 10, 2013, 11:55 pm

Make sure to read this guys, it's a helpful guide.

Bad Meets Evil - September 10, 2013, 11:41 pm

Hasn't received much attention recently and a lot of effort was put into this.

FTL Mouse - November 24, 2013, 2:00 pm

Thanks man, this will probably help alot in future projects! :D

Bad Meets Evil - November 27, 2013, 4:17 pm

Yeah dog, gotta know about dem colours.

xXZzMLGzZXx - November 28, 2013, 10:38 am

I love the colors, I recommend adding the HEX codes to them, thanks for the share BME ;3 <3

glassp - December 1, 2013, 10:37 am

This is amazing, thank you.

I just figured out how to use swatches, lol.

fishgang - December 1, 2013, 12:44 pm

Really nice tutorial nice layout, thanks.

Bad Meets Evil - December 1, 2013, 6:19 pm

Nice to know you guys are liking this. It didn't get as much attention as my other tuts.

Bad Meets Evil - March 9, 2014, 9:57 pm

Forgot about making this - there was a lot of effort put in.

phybe? Jr. - March 10, 2014, 7:36 am

Awesome guide. I'll give you a well deserved compliment and .

Thank you, I compiled a good amount of research.

HIGH PAID FELLA - March 12, 2014, 8:09 am

Good job, BME!

I like it, also add some nice links in a spoiler wich help with the choice of a nice color sheme.

Bad Meets Evil - March 15, 2014, 9:24 pm

Thanks Asterea. A simple google search will give lots of solutions for putting together colours schemes.

Auxil - March 17, 2014, 2:21 pm

I know you put quite a bit of effort into this, and I appreciate it.

I learned this all in Graphic Design class, my first semester, other than the color feels, such as blue suppressing appetite.

By the way, I learned nothing, but the color wheel in that damn class.

Everything else, self taught. I find that the best way.

That is how my art teacher teaches. He gives you a pencil, eraser, some paper, and a reference while you get to work.

Later on, as you progress, he shows you individually how to use certain tools.

He showed me how to use a tortillion the other day.

But, back on topic, thank you BME.

Great tutorial.

METALSLUG - March 22, 2014, 7:56 pm

Wow i didnt realise colour was that precise! amazing tut ill refer to in future

It makes me really happy that you were able to learn from this.

Feel free to ask any further questions you have.

Yep! what do you mean by swatches in the last paragraph at the bottom? What's a swatch?

Bad Meets Evil - March 23, 2014, 5:15 pm

They are like colours that you have "saved" into Photoshop.

By default they should be in the top right corner as little squares of colour you can choose from.

It makes things easier if you keep you favourite colours here so you can select them instead of having to find them in the colour picker every time.

METALSLUG - March 23, 2014, 5:29 pm

Yeah the HF background was one of the first ones I put there.

You can also open up designs that you like and add colours from them to your swatch so that you can use them in your own designs.

Oooh sweet! So I can take at the bottom of the post :D they are niiiccee!. Weird how colours are more attractive then others :P

Vax™ - March 23, 2014, 6:57 pm

"Do not rip or I will hunt you down."

Found this extremely funny haha.

Hah yeah man. Gotta scare the rippers away.

Schnitzel - June 26, 2014, 11:22 am

Don't know if this count as thread digging but I find this very useful and want to remember where I can find it :P

Read most of your tutorials and they have helped me a lot to improve my graphics.

_wind - June 26, 2014, 1:57 pm

(Jun 26, 2014 11:22 AM)Black Puma Wrote: [\[CITE\]](#) Don't know if this count as thread digging but I find this very useful and want to remember where I can find it :P

Read most of your tutorials and they have helped me a lot to improve my graphics.

It's not grave digging if the thread is still valid, and if your reply is on-topic.

Great guide, though I learnt most of this in middle school :)
