Thread: [Tutorial | How to Take Ownership of a Folder and Files Inside](#)

NoodleBot™ - August 8, 2013, 6:55 pm

Advertisement:

If you are going to be involving yourself with any Keylogger, RAT, stresser, bruteforce or cracker tool, definitely consider some form of protection to cover yourself.

Check out my latest program Absolution, aimed at providing a safer environment and settings that are easy to configure.

Welcome to my short tutorial on how to take ownership of a file or folder that appears on your harddrive and you are not allowed to remove it.

No matter if its a system file or if a complicated form of malware - this will allow you to give your computer the power it needs to take over - and remove it if necessary.

Steps

Download the script

Run the script as administrator (One time)

Enjoy.

Download InstallTakeOwnership.reg

<http://ge.tt/api/1/files/5p0haOo/1/blob?download>

+

Download RemoveTakeOwnership.reg

<http://ge.tt/api/1/files/5p0haOo/0/blob?download>

Photos of the script in action

[img]<http://i.prntscr.com/3426bbe12f934a81b9fe67963684296d.jpeg>[/img]

* fixed the images, June 23 2015.

Enjoy.

Razza™ - August 8, 2013, 8:34 pm

Very nice tutorial, thanks man ;)

- Omgrazza.

Arzcy - February 19, 2014, 5:25 am

Could you fix the images? Also, what do I do after I run the script?..

Aura - February 19, 2014, 6:00 am

After you run the script, once you right-click on a file or a folder, you'll have a new option called "Take Ownership", click it.

I've updated the screenshot of what it will do when run on a large folder.

It moves very fast and will only take a few moments to complete, usually instantly if a small folder.

Right click the folder you want (Virus, TrustedInstaller, broken installation file) and take ownership of it. Then you are free to remove it and delete it/shred it.

Null Byte - February 19, 2014, 5:43 pm

This is a fantastic tweak! Good share NoodleBot.

Jagster™ - February 20, 2014, 1:44 pm

Looks nice, short and to the point.

Similar to mine but I give instructions how to do it manually as well as the registry hack ;)

sorker3 - February 22, 2014, 1:53 am

If it is an reg-file. Why not just giving the code? My browser dosen't even allow me to download this.

Jumanji - February 22, 2014, 1:54 am

Not to be that guy but... first result on google...

This .reg modification script have been around for ages. Everyone can download it, so Noodle didn't steal anything.

THIS

If you look at my Tutorial I posted previously, I use the same script, it is the convenience which makes it so popular.

Very nice tool! It is a must have for newbies :D
It will help a lot ty!

Computer Forensics - April 23, 2014, 6:55 pm

Thanks for the share this should come in handy.

SIMONBC - April 25, 2014, 11:03 am

Thanks for sharing mate, nice tutorial

__Johnny - April 26, 2014, 6:31 pm

Ty very much for tutorial.. Hope it work to safely remove pendrives

NoodleBot™ - June 23, 2015, 1:03 pm

I've updated the photo's for this script once again. Hope it helps people here.
