Thread: [Close the Hackintosh section and add a prefix in the Mac section.](#)

muzzy. - August 9, 2013, 3:35 am

<https://hackforums.net/forumdisplay.php?fid=216>

There's nothing of any quality in there, merging all of the threads into the Mac section and adding a prefix would suffice. It's a rather dead section.

Thoughts?

Darkwin - August 9, 2013, 4:00 am

I agree, I was going to ask a few questions in regards to hackintosh but since its a slow forum i rather just google.

Howard Stark - August 9, 2013, 4:16 am

Agreed. No one ever posts there. Good idea OP!

Triads - August 9, 2013, 4:40 am

Not agreed , because a section does not have many HQ posts in it people still try to answer questions in the best way possible.

Eddit : did not read the title because i am a faggot , sorry OP.

muzzy. - August 9, 2013, 4:43 am

(Aug 9, 2013 04:40 AM)Triads Wrote: [\[CITE\]](#) Not agreed , because a section does not have many HQ posts in it people still try to answer questions in the best way possible. But it doesn't warrant enough activity to have it's own section. Questions can still be asked and answered, just in the Apple section with a hackintosh prefix.

Triads - August 9, 2013, 4:44 am

(Aug 9, 2013 04:43 AM)Rogue? Wrote: [\[CITE\]](#) But it doesn't warrant enough activity to have it's own section. Questions can still be asked and answered, just in the Apple section with a hackintosh prefix.

Eddited my post right before you commented , again sorry OP.

Roger Waters - August 9, 2013, 11:03 am

Yeah there isn't much activity in there, in the last 50 threads there is still activity from April showing as the last post on some threads.

Morchid - August 9, 2013, 11:04 am

If Omniscient feels that it's inactive he will remove it, until then watch it die :)

Blizzard - August 9, 2013, 11:05 am

I too agree with this. Let us see what this happens.

RDCA - August 9, 2013, 11:05 am

I agree. It would be much better as a tag. Overall both sections are low activity, so merging them might help a little bit.

'Snorlax - August 10, 2013, 5:06 am

Front page have:

Last post: July 1st, 2013 00:57

That's 1 month and 10 days ago, lol.

I agree. Move it to another section and add a prefix.

Bloodshot - August 10, 2013, 5:12 am

There are threads on the first page from June 30th.

This should definitely happen.

chrisman0091 - August 10, 2013, 9:14 am

I agree.

A little over 3 years from its opening(or first thread anyway), and it only has ~400 threads. That's only about 11 threads per month. Considering there are plenty of threads that have more replies than that whole section...

Mason - August 10, 2013, 10:19 am

I agree with this. Not enough activity.

Di?mond - August 10, 2013, 10:24 am

I agree, it should be closed. Hardly any activity in it.

HostSlayer - August 12, 2013, 5:36 am

I support this idea i do not use the sections however this would help make things more efficient on those sections.

420 Lord - August 14, 2013, 5:00 pm

Good idea OP, I support this, better that way

Jemjem787 - August 14, 2013, 9:00 pm

I approve of this. Would make it look a bit better.

Phobix - August 15, 2013, 6:10 pm

Any questions about Hackintoshing can be thrown my way. I try to check out that section but with my job now it's difficult.

PM me. I do agree with OP to merge with OSX SF.

Loomaanaatii - August 16, 2013, 8:59 pm

I also agree with this, both sections have low activity and if they were merged, it might get more activity.

Roger Waters - August 16, 2013, 9:02 pm

I'm surprised this and a few other threads in this section haven't been closed... like the Removal of the Terraria section and the one about changing the grieving section.

muzzy. - September 18, 2013, 6:45 am

Re-highlighting this as an "official" response was never given.

Taserz - September 19, 2013, 10:20 pm

Aka a low quality to post just the bump the thread....

Give the section some time lol. When maverick comes out im sure people will want to dual boot it.
