Thread: [How to Find Legit Niches And Make Loads!! off them \[CPA Networks Friendly Niches \]](#)

Hustler. - August 10, 2013, 4:48 am

Introduction

Now days, Due to the use of Survey Builder by CPA/PPD users, The CPA Networks are banning peoples off who are using fake files or fake niches on their network, and most of the CPA Earners uses Fake Niches, Even I AM!! So, i discussed about this with my friends and came out with an idea! Which is time consuming but effective!

How to Find Them ?

As the Fake Niches, Legal Niches are also laid everywhere! You will just have to hit the right place! and right time to promote them.

Legal Niches are those niches, which are legal to promote and the peoples get's the same thing they see in the video! and it should be a working one, and it shouldn't be a fake file or something that doesn't work and the video shouldn't be stolen off from others and also the file that the user gets after the survey also shouldn't be of others.

Some Examples Of Legit Keywords: How to Lose Fat, How to look handsome, how to cure cancer...etc It goes on.....

There are a lot of Legit Niches/Keywords out there, you just need to find the right one with a low traffic and rank your video or site with that keyword and competition on legit niches are really tough as there are big players promoting their clickbank, amazon,ebook products. So to do this you need to spend a lot of money on SEO and The Best thing is that our videos will stay more longer than fake niches and will not get deleted frequently.

Tips While Using These Niches:

As there are a lot of Big Competitors in these you will have to Invest a good amount of money on SEO.

Or If you have found out a Good Unsaturated One!!! Then HOLY FUCK!! you've hit a Gold Mine.

Always have the files your own created otherwise you would be taken down with copyright infrigments

Make an HQ Video, not just explaining the product add some pictures, reviews,..etc

Advertise your niche everywhere!! Bring social shares, Post your site/Video link on Facebook pages.

...I'll Be adding more soon!!!

jackie90 - August 10, 2013, 4:51 am

Mhh...I think the most useless post ever. It just explain what a legit niche is, but I believe the word itself "legit" explains all what you described, and even if some really noob which is new to cpa/his native language its not english, can find that info evrywhere.

"Hey i have cancer, I should look on youtube how to fix myself up, oh look there is a tutorial! Fukken saved!"

No, seriously, File-Ice didn't ban anyone EVER for promoting fake files, and they have that in their ToS since launch, get real guys, i've been using adnooka for 5 days now using fake niches and nothing happened. nothing will happen.

Actually Adnooka it's the only network which will ban you. They made a mass ban right some days ago which included me, and I were just using generators + yt with Adnooka, they didnt even paid out me; just check some journeys of peoples adnooka all around cpa/internet forums...I advice you to switch to ANY other network, but not adnooka, hell they banned as fuck recently.

Banning members and taking their money is a jew action, feel sorry for you bro, thanks for the advice, i'm switching all my niches to pay per 1000 downloads :)

innn - August 10, 2013, 8:51 am

Shit post. I bet you don't even make over 20\$ from PPD/CPA per day. Seriously, if anyone follows this tutorial then that person must be dumb as fuck. Just one advice bro, don't post in this section anymore.

indicud - August 10, 2013, 9:45 am

Haha that's pretty fucking obvious, this post is useless. Everyone knows this. It's not as easy as it sounds.

Atlantis - August 10, 2013, 9:48 am

Good luck ranking the keyword "how to lose fat"!

It will cost you several thousands dollar or extreme SEO skills.

Ekillz999 - August 10, 2013, 11:22 am

Another failed attempt to get +rep, sorry but you are just bad

Zen - August 10, 2013, 11:28 am

Lol wow.

You know, keygens and stuff are going to be around and allowed for quite some time. You people need to stop overreacting.

Nuk3 - *August 10, 2013, 4:30 pm*

Text you used hurts my eyes.

Networks don't have time to bust loads of people for fake files.

Ransomware is Illegal, Fake files is not.
