HTTP Bot Source code

Hello are you interested making your own HTTP bot well here you came to the solution.here you can can a full project including server + web panel source code and start making your own HTTP bot.once you buy it you have fully rights to edit , change and modify try a demo version [Click Here](#)

What is HTTP bot

A HTTP(Hypertext Transfer Protocol) bot is a Computer bot that allows to control a computer remotely from a website

Zero Dependencies

When selling stuff most of the people will look for zero Dependencies software so it can run on any pc well this is the solution the server is coded in AutoIT and i can run on Windows 95,Windows 98, Windows ME, Windows NT4, Windows 2000, Windows XP, Windows 2003,Windows Vista , Windows 7 and Windows 8 without required anything like Java Runtime Environment or .NET it will run freely on every Windows OS

Source Code Commented

The source code is fully commented to make it easier for you to follow the source code or change , edit and modify.

Web Panel featuresLogin

TOS

Spoiler ([Click to View](#))

1. There is no refund

2. There is no chargeback

3. You don't have rights to resale the source code

4. All sales are final

5. This project is for educational purposes we are not responsible on how you use it. Use it at your own risk

betamonkey - August 11, 2013, 1:49 am

Ok. We get it.. Bot source for sale. Stop recreating your thread over and over again.

Oh, and your images still aren't showing up for me.

Raz?r - August 11, 2013, 1:50 am

You should also optimize your code.

Stuff like this can lead to problems, they made @AppDataDir for this, so use it.

kra007 - August 11, 2013, 10:00 am

Vouch for this I bought it yesterday its amazing

i appreciated

Invicta - August 11, 2013, 10:43 am

Oh god is this coded in autoit? ?

Edit: Not to trash autoit, it's not a bad language, but it is quite bad for malware..

dude im not selling binaries or builder so it needs to hide stuff.
this is a project that allows people to easily build their own bot
meaning change, edit and modify
