Thread: [\[FREE\] Signature For Your Product! - Simple to edit! \[MEDIAFIRE DOWNLOAD\]](#)

Anon.Steel - August 11, 2013, 5:21 am

Hey,

I'm kinda new to hack forums and I need a good rep so I can be trusted in selling all my products/services... So I thought, maybe I could make a signature template for your products! It's really easy to edit and change how you like, all the files are labeled so you shouldn't have any problems in customizing it. But yeah, enjoy and please, please leave some good replies. Also I'm going to start selling GFX soon so if you want one, just PM me. :) - Here is a little sample of what it looks like.

And he is the download link! NO password or survey -

Thanks&Enjoy - Peace out.

what the point of this thread? share a simple signature for a good rep? .__.

I think stating you are sharing this for a good rep isn't the most kosher idea.

I need to close this thread - my new one is in the graphic resources and no. It's not for a good rep. It's just a contribution to sellers on hd. The rep part is I help them out and they can help me out by vouching etc out of their own will and kindness.
