Thread: [Free Cross-Platform Tool Programming Service](#)

Grand Pootis - August 11, 2013, 10:20 am

I was really sick of seeing these sorts of threads: FREE 5 CENTS, FREE USELESS EBOOK, etc, so I decided to make a useful free service.

I will be coding apps in either Java or Mono C# for cross platform compatibility for you

If you're using my free service, the job has to be relatively small. Otherwise, you can discuss it with me.

Please post any requests here.

Don't hesitate to ask if you're not sure about whether it would fall in the free category.

Sorry, I am not interested in creating malware, even for money, or any assistance of malware.
