Anyone seen it? It's on now, always reminds me of HF. It's an epic film, wonder if anything like a 'firesale' is actually possible.

What ya reckon?

It's One of my favor movies its nice and total overrated epic

Special when Bruce Willis drive the car into the helicopter?

I've watched that film, it's pretty amazing man how the hackers control the city... Also Bruce Willis does epic action scenes ?

I recommend you to watch it. Btw I need to watch the 5th one ?

Tryhard-unique - August 11, 2013, 2:07 pm

Seen it many times, I love it. Not seen the 5th one. May have to download it.

Arm4L1t3 - August 11, 2013, 3:38 pm

5th one is pure action crazy killing explosions.

So many clichés but a pretty decent movie.

I love that movie, it has things that most movie's dont have. Reallity also i dont think a firesale is possible, there are so many agents and shit that you couldnt win.

I think it's possible, it would just be incredibly difficult. It would require more social engineering than anything to get the level of access required for each system to then start the hack. I think that's a good point of discussion actually.

How would you (Hack Forums) go about doing this?

hackerz1018 - August 22, 2013, 4:28 pm

year brilliant film and yeah a firesale probably could happen but be unlikely
