Thread: [Node Stress Source Code - Full Source + DB](#)

Bermesiah - August 11, 2013, 2:44 pm

Well, this is my first post. I'm from other forums and i coded this and was going to sell it. This is very good has Admin/Owner CP and is a Edited vDos v2.0 Source. All new theme and CSS the admins cant do everything like change API's and such only owner. Also it has abilitys to just send news to admins or admins and users!

Many more functions aswell!

Enjoy!

<http://adf.ly/TpHN9>

(This is my first post, enjoy and leave feedback about the source please.)

ManDoR - August 11, 2013, 3:50 pm

Adfly link, and leaked version of vDos. I wouldn't suggest anyone to use it.

Pillows - August 11, 2013, 4:38 pm

Are they any screenshots of it? Screenshots would be good to see how the UI looks like. Also have you checked for backdoors?

Bermesiah - August 11, 2013, 5:58 pm

Sorry, i havent had it uploaded to a host yet. I coded in Xampp and my apache wont start back up.. :(

Ego Inc - August 11, 2013, 6:08 pm

Oh great just what the world needs... Another booter source...

Does the world really need more booters? Why not make something original?

ExaNet - August 16, 2013, 9:24 pm

Lol, next time you steal someone elses source and call it your own change the db name on the config file...

?APEX_NOOB - August 19, 2013, 1:47 pm

So True, im just reading the source and iv seen a couple of "vDos" in the scripts.
just another leech :(

Bermesiah - August 22, 2013, 6:54 pm

I fucking said it was a copied vDos? I said i edited the fuck outa it? Chlll faggots.

You contradicted yourself. I fail to see how the people posting are faggots?

Code "and i coded this and was going to sell it" You edited a theme, if you did try to sell this no one would buy it.

Code "and is a Edited vDos v2.0 Source" You coded this, but it's someone else's code...?
