Thread: [How do I make a lock in cinema 4d or Photoshop](#)

KK123 - August 11, 2013, 7:51 pm

How do I make a lock in cinema 4d, I wanted to make a chain and lock I can make a chain but I cant make a lock. What I mean by "lock" is a lock that you would put on a "locker" that you fit a key inside to open.

Also a tutorial on how to make a key in cinema 4d would be greatly approved.

[You can link me to a tutorial]

Thanks.

Closest thing I could find to a lock was a tutorial on how to make a chain.

Sorry mate, hope someone else can help you out.

Here's the link:

<http://cinema-4d.wonderhowto.com/how-to/create-dynamic-3d-chain-cinema-4d-343375/> .

Make a bezier spline, and do LITTLE tiny plots along (NOT CIRCULAR OR ELSE IT WILL SCREW UP) then get a spline wrap and click the mouse botton the bottom right. Spawn in a cylinder and put the spline wrap as a child of it. The rest you can do with a cube.

Thanks for the attempt at it.

I hope I can find something else.

I will try it, with the little detail you added haha.
