I'm not responsible if your list's show different results to customers/suppliers or anyone when regarding trades or transactions. As this is software, and all/if not most software contains bugs, please try not to rely on my application for sales.

[#] Netflix Account Checker v1.0.0.1[#]

This simple little tool I created for you all since the one out there doesn't work, (took a lot of effort to get this fucker working) simply checks and see if the account is working or if its dead (useful if you have tons of dumps!) :hurr: It will ignore accounts that where just pay once trials

Screen Shot:

(should note because i forgot to add it, right click the account list to load a dump file, right click the working list to save it)

It works pretty good, but you should make the interval a little faster. I can do it manually a bit faster. Thanks

It's just an autopilot method, so you can leave it running as you do something else :P If i made the interval any faster.. It wouldn't work correctly :(

Has this stopped working now? As when I'm trying to run it, it I've watched it put working accounts
