Thread: [Make Cube/Pixel Text!! MUST SEE!!](#)

Simba™ - April 15, 2010, 12:10 pm

1st credicts goes to tutorialbeach!

Hello all,

recently i posted my graphic in "rate my Graphic" and peoples also requested for a tutorial and here it is =D

Example of mine i done;

[img]<http://img72.imageshack.us/img72/9518/nice.png>[/img]

Step 1

- Create a blank document.

- Black background. White foreground.

- Type your text in a bold font of your choice and apply Filter --> Blur --> Gaussian Blur with a radius of something like 3.

[img]http://tutorialbeach.com/tutorials/images/firecube_text_1.jpg[/img]

- Hit CTRL-E to merge down the layers.

STEP 2

- Duplicate your layer and select the upper layer.

- Apply Filter --> Pixelate --> Mosaic and set the Cell Size to 9 or 10, depending on the size of your text.

[img]http://tutorialbeach.com/tutorials/images/firecube_text_2.jpg[/img]

STEP 3

- Now set the layer's opacity to 50 percent and use Filter --> Sharpen --> Sharpen three or four times.

- Press CTRL-E again to merge the layers.

[img]http://tutorialbeach.com/tutorials/images/firecube_text_3.jpg[/img]

STEP 4

- The last steps to add the fire color:

- Go to Image --> Mode --> Grayscale

- then Image -->Mode --> Indexed Colors

- and finally Image -->Mode --> Color Table and choose Black Body

[img]http://tutorialbeach.com/tutorials/images/firecube_text_4.jpg[/img]

If you liked comment and post some feedback :D

pseud0 - April 15, 2010, 12:14 pm

Simple, but effective. Good tutorial.

Just an FYI if you use 'unsharp mask' in the sharpen sub menu you could do the sharpening step instantly...or sharpen more which is essentially performing the sharpen action twice at once.

Simba™ - April 15, 2010, 12:15 pm

Thanks for your comment hereforthegangbang =D

Yeah you could do. But if you will do it without mistakes follow the guide and you will succes for the beginners.

TheInvader - April 15, 2010, 12:45 pm

Thats very good nice share.

Simba™ - April 15, 2010, 12:48 pm

Thank you :P Try it yourself and post an ecample here if ya want =D

Ally Mac - April 15, 2010, 1:26 pm

Great Tutorial.

My outcome:

SavageBoys - April 15, 2010, 7:23 pm

Hmm, looks quite nice, i applied this to a sig of mine.

Simba™ - April 16, 2010, 7:08 am

@Ally Mac ;

It is good but i think you forgeted a step. The blow one i think. Just looked at the text.

@Uchiha Itachi; Thanks for your comments =D

ip Hunter - April 16, 2010, 8:47 am

omfg!!!!

heres my result

[img]http://img228.imageshack.us/img228/7418/rapid2.png[/img]

THANKS SO MUCH!

Simba™ - April 16, 2010, 9:57 am

Silver - April 16, 2010, 1:25 pm

Very nice tutorial. Simple, yet an awesome outcome.

Braco Asshole - April 16, 2010, 3:18 pm

This is an epic tutorial and im Bookmarking it.

Simba™ - April 17, 2010, 12:48 am

Thanks Braco,

i like your tutorials too.You are new but very good =D

Braco Asshole - April 17, 2010, 4:06 am

Yea simba, and i tried your tutorial today since i got the Photoshop and this is my outcome:

[img]http://i40.[censored].com/i23nk1.jpg[/img]

Edited because it was white on the right side.

GameOver* - April 17, 2010, 10:19 am

simple but it's cool! thanks for share! I will try!

aiir - April 17, 2010, 10:42 am

Nice tut, Here's my attempt.

Simba™ - April 17, 2010, 10:58 am

Hehe nice peoples.You learn fast xD thx for all comments!

Shu7down - April 17, 2010, 12:26 pm

Very nice tutorial and effect too I will try this :)

Here is mine result :) + some brushes added

Exch4ng3r - April 17, 2010, 8:30 pm

lol thanks!! im making sigs for people now and look at what iv done !

<http://img217.imageshack.us/img217/7320/picture6qo.png>

NFLballa156 - April 17, 2010, 8:39 pm

Nice tutorial simple and makes a good looking effect

Simba™ - April 18, 2010, 12:20 am

Thanks for all your comments! Nice results.

@Schneweis; Your result is very blurry.try to follow the guide step by step like it says.

@NFL: Thank you!

@ShutDown: very creative :P

Texno - April 18, 2010, 9:56 am

Great i got nice results to, thanks for the tutorial ! ?

Simba™ - April 18, 2010, 1:02 pm

Thanks!

Hehe thank ya.

Procrastination™ - April 19, 2010, 8:10 am

Can't find the options in the Image -->Mode-->Indexed colors part

Simba™ - April 19, 2010, 9:52 am

Do you use PS CS4? Spoiler [\(Click to View\)](#) . . . , .

Promethazine - July 27, 2011, 8:16 pm

Thanks bro, I'll definitely use this. I'll post mine soon.

EDIT: Here's mine:

[IMG]<http://i840.photobucket.com/albums/zz325/ItsYaBoiAlex/PromethPixel.jpg>[/IMG]

RageInAction - July 27, 2011, 9:22 pm

nice tut thanks for the post!

Eminent - July 27, 2011, 11:09 pm

Really nice =D I think that it would look better if it was a tad less blurry though.

Oh dang, just saw the post date.

iamOnline - July 27, 2011, 11:40 pm

Thought, might aswell have a go as Photoshop is still up, turnout was awesome man good job! =)

Pos-eidon - July 28, 2011, 3:28 am

Awesome tut :D

Too Short [\(Click to View\)](#) Too Short

Grin - July 29, 2011, 7:08 pm

this is really cool i tried it and it was a great success...i think for maximized pixel effect you should transform it and stretch it out a little bit

XxSecretxSnakexX - July 29, 2011, 8:01 pm

That is amazing :D Thanks!!

Raf Simons - July 29, 2011, 8:43 pm

Nice tutorial. Is there any way to make it another color other then red?
