Soccer - August 13, 2013, 12:24 pm

Soccer here, If you have any questions regarding the miner or sales contact me.

-Soccer

Balloon - August 13, 2013, 12:33 pm

Vouch for Soccer and Anon. Soccer is a chill guy, don't hesitate to do deals with either one of them.

Decompiler - August 13, 2013, 12:34 pm

Its good to see this HQ product come out for sale :)

blu3 - August 13, 2013, 12:36 pm

Vouch, anonymous is THE most trusted member on the forums, don't hesitate.

Flaaffy - August 13, 2013, 12:37 pm

this isnt just cus im legion, this is legitimately nice miner, good speed and stealthy

Moxxi - August 13, 2013, 12:37 pm

Looks good => just purchased a month, excited to give it a try

EXPLICIT CONTENT - August 13, 2013, 12:47 pm

Glad to be a part of the Support Staff, don't hesitate to pm me/Soccer if you got any questions.

Also, vouch for the Miner, using it myself ;)

Jaguar - August 13, 2013, 12:52 pm

Looks promising.

Good luck with your sales guys!

?merta - August 13, 2013, 12:56 pm

Does it use injection when "store files inside bin" option is enabled? When these are downloaded?

Does the miner have a .NET dependency (not speaking about GPU mining with AMD catalyst). Prices

are good and this have a bunch of interesting features.

Moxxi - August 13, 2013, 1:01 pm

Well I just got everything super fast =)

Vouch for anon and his products

Business - August 13, 2013, 1:02 pm

Looks amazing. Will update if I have any experience with it! Vouch for Legion.

EXPLICIT CONTENT - August 13, 2013, 1:07 pm

(Aug 13, 2013 12:56 PM)?merta Wrote: [\[CITE\]](#) Does it use injection when "store files inside bin" option is enabled? When these are downloaded? Does the miner have a .NET dependency (not speaking about GPU mining with AMD catalyst). Prices are good and this have a bunch of interesting features.

Injection is always used, and there are always files dropped to the disk (Some are encrypted and not runnable for the victim/Antivirus, some aren't, but there are no DLL's dropped). If you tick the Option "Store Files inside Bin", the files needed are downloaded upon creation and are saved inside the Resources. And all files have a .Net 2 Dependency

Z0mbie. - August 13, 2013, 1:14 pm

Vouch for this , using this on bots and I can say , it works very good.

?S0ulSn1p3rR - August 13, 2013, 1:16 pm

Vouch for this miner had it for a few days support is great and it gets the job done better than any other miner

Business - August 13, 2013, 1:25 pm

I am looking forward to seeing some hashrates being posted. I am sure they will blow away Silent Miner.

Soccer - August 13, 2013, 2:20 pm

Thank you all. Updates are coming soon, we are adding alot.

-Soccer

Business - August 13, 2013, 2:23 pm

I have a really interesting idea for a miner function, but I am not sure if it is possible. Who could I run it by?

Soccer - August 13, 2013, 2:27 pm

(Aug 13, 2013 02:23 PM)Business. Wrote: [\[CITE\]](#) I have a really interesting idea for a miner function, but I am not sure if it is possible. Who could I run it by?

PM me, then I will forward it to Anonymous. I can see if we can do it

Im gone brah - August 13, 2013, 3:35 pm

Biggest vouch you can see from me!

Anon-more legit then BillGates.

TheLuckyGuy - August 13, 2013, 3:39 pm

Am I able to mine with that thing without Stratum?

cheers

-TheLuckyGuy

EXPLICIT CONTENT - August 13, 2013, 3:44 pm

(Aug 13, 2013 03:50 PM)TheLuckyGuy Wrote: [\[CITE\]](#) But I don't have a stratum server. So can I use it without a Proxy/Stratum...

cheers

-TheLuckyGuy

You can also mine on servers without Stratum/Proxy, as long as it is supported by Ufasoft/Poolers. You may want to pm me further info about what Specs you have/need

Six Below - August 13, 2013, 8:27 pm

Going to purchase this the second I get my net back up. Keep up the good work. This has an amazing team behind it.

Soccer - August 14, 2013, 6:52 am

(Aug 13, 2013 02:23 PM)Business. Wrote: [\[CITE\]](#) I have a really interesting idea for a miner function, but I am not sure if it is possible. Who could I run it by?

We are thinking of implementing your idea in.

We are capable of adding it. When next update comes out, we might bring it in.

Tastylicious - August 14, 2013, 6:57 am

Vouch for this. The team behind this knows what shit's about.

DeadRoute - August 14, 2013, 7:05 am

So this have a dependency of .net and just drop files ?

Soccer - August 14, 2013, 7:11 am

(Aug 14, 2013 07:05 AM)DeadRoute Wrote: [\[CITE\]](#) So this have a dependency of .net and just drop files ?

It doesn't drop files. Legion Miner is injection also.

Yes, the bin is .NET 2

Fly By Night - August 14, 2013, 7:46 am

Vouch for Legion Miner, Best miner you can get.

SOAP. - August 14, 2013, 7:50 am

I have a couple questions about this I'd like to speak over PM who should I contact?

Soccer - August 14, 2013, 8:01 am

(Aug 14, 2013 07:50 AM)Soap Smith Wrote: [\[CITE\]](#) I have a couple questions about this I'd like to speak over PM who should I contact?

PM me.

I can help you with your questions or concerns.

?nonymous - August 14, 2013, 8:38 am

Codah & Soccer will function as support team while I'll be coding the next project.

Soccer will primarily handle sales support and Codah will handle bug reports; they'll forward anything serious to me, but they should be able to handle most of the things themselves. ?

I hope you'll enjoy your product.

itzG0D - August 14, 2013, 7:25 pm

Got a test bin, and I have to say, this is WAY better than Silent Miner or Chrome Miner. Huge vouch!

EXPLICIT CONTENT - August 15, 2013, 5:05 am

(Aug 14, 2013 07:25 PM)itzG0D Wrote: [\[CITE\]](#) Got a test bin, and I have to say, this is WAY better than Silent Miner or Chrome Miner. Huge vouch!

Thanks for the vouch, we really appreciate your feedback :)

Deesr - August 15, 2013, 5:12 am

Vouch for this Miner! Saw it in action, and it seems to work very well!

Duhoh - August 15, 2013, 7:40 am

Miner has my full vouch. Also, if you have any questions, I can provide (unofficial) support if one of the provided are not online.

Soccer - August 15, 2013, 9:13 am

(Aug 15, 2013 05:12 AM)Deesr Wrote: [\[CITE\]](#) Vouch for this Miner! Saw it in action, and it seems to work very well!

Thanks man, means alot.

Also, I might need your GFX Service.

SOAP. - August 15, 2013, 10:35 am

I must say the support is VERY good lol I'll be buying this very soon. I can't wait ^_^

The Monetizer - August 15, 2013, 11:02 am

can someone scan a bin to see the detection rate?

Soccer - August 15, 2013, 11:24 am

(Aug 15, 2013 11:02 AM)The Monetizer Wrote: [\[CITE\]](#) can someone scan a bin to see the detection rate?

I will post the results when I am home.

I will send you a PM and post it here

Mjas™ - August 15, 2013, 12:08 pm

Bought this good support!, Now lets see the outcome of this !

Soccer - August 15, 2013, 12:25 pm

thx

It works for all. Non Stratum and Stratum. We have some already added in for quick navigation but it works with all.

asmoka - August 18, 2013, 2:50 pm

Can't wait to receive this ill post again when I do! Just wished the licencing system wasn't down aha

xSpas - August 18, 2013, 3:11 pm

Hey I love the miner so far. Just confused on one thing. What's the difference between Ufasoft and Poolers option? And is the cgminer just not available right now or what?

Thanks :D

KingRaider - August 18, 2013, 3:27 pm

(Aug 18, 2013 03:11 PM)xSpas Wrote: [\[CITE\]](#) Hey I love the miner so far. Just confused on one thing. What's the difference between Ufasoft and Poolers option? And is the cgminer just not available right now or what?

Thanks :D

The different engines can support different things, like example: The CG miner can support GPU for LTC mining. (Much more profitable)

The Ufasoft can not, but also can pick the intensity but poolers can't.

CG miner will be released in the next update, its currently not available, but put on display to show whats coming.

SOAP. - August 18, 2013, 9:53 pm

Just bought this. Waiting for a reply now. Can't wait to set it up and get everything going. ?

TheLuckyGuy - August 19, 2013, 7:13 am

Just bought this too. ;)

Awaiting for reply :)

cheers

-TheLuckyGuy

xhflhkeuhwguu34 - August 19, 2013, 7:27 am

Vouch for this, works better then any other miner I've tried!

Soccer - August 19, 2013, 10:07 am

I am online now and sent the licenses off.

Sorry for the delay, I was at school all day.

SpheX™ - August 19, 2013, 10:14 am

What language is this in? Thanks for the reply

Soccer - August 19, 2013, 10:17 am

(Aug 19, 2013 10:14 AM)Net Beans Wrote: [\[CITE\]](#) What language is this in? Thanks for the reply
Builder is in C#, and the bin is in .NET

Updates coming soon.

SOAP. - August 19, 2013, 10:44 am

Vouch for this product just got it and they helped me set it up 100% I'll post back soon with what I think of it. ?

ejd59005 - August 19, 2013, 10:52 am

Once cgminer has been added and working, I'll be purchasing

negerhek - August 19, 2013, 11:22 am

Looks like a nice miner, wondering how many languages there are in the builder (I see English on the right top corner)

PM me if you need any more languages up there :P

Soccer - August 19, 2013, 11:52 am

(Aug 19, 2013 11:22 AM)fckcruz Wrote: [\[CITE\]](#) Looks like a nice miner, wondering how many languages there are in the builder (I see English on the right top corner)

PM me if you need any more languages up there :P
We have English and Dutch.

We might need more, what kind of languages can you do?

negerhek - August 19, 2013, 12:09 pm

(Aug 19, 2013 11:52 AM)Soccer Wrote: [\[CITE\]](#) We have English and Dutch.

Well, I was gonna do Dutch, I could try Russian.

Soccer - August 19, 2013, 12:33 pm

(Aug 19, 2013 12:09 PM)fckcruz Wrote: [\[CITE\]](#) Well, I was gonna do Dutch, I could try Russian.
I will send you a PM when I am on my computer as I am on my phone
Thank you.

n0syst3m - August 19, 2013, 1:11 pm

after i buy do i pm soccer?

or is it completely autobuy?

Thx

Soccer - August 19, 2013, 1:50 pm

(Aug 19, 2013 01:11 PM)n0syst3m Wrote: [\[CITE\]](#) after i buy do i pm soccer?

or is it completely autobuy?

Thx

After you buy. You PM me so I can give you the info you need to get to the miner.

We are going to do a security check we new to find someone

If you license has been terminated. PM me to get it back.

KingRaider - August 19, 2013, 3:42 pm

Hey I was wondering what type of persistence does this have? When the miner was up and I clicked close process, it stayed closed.

Can you make persistence an option? (For crypters that support process persistence)

Last thing, for the Advanced Idle mining, can you have it so we can set a custom time before idle mining starts? Its currently at 5 mins, but I would like it at like 30 secs or something.

I can't wait to see the new features(:

Eternal. - August 19, 2013, 3:43 pm

Looks like a pretty sick miner, good job once again on a solid product.

EXPLICIT CONTENT - August 19, 2013, 5:11 pm

I can't wait to see the new features(:

I would be intersted what process you have killed :P PM me ;)

Also, the Persistence Module looks kinda like this:

- Processes get respawned
- Files cannot be renamed or deleted
- Registry Key gets checked in a specific Interval

Also, time should be customizable for the Idle Mining, but I will ask Anon on this

sk300 - August 20, 2013, 12:57 am

cgminer doesn't work, ltc gpu mining isn't supported, cpu mining can't be disabled completely.

Six Below - August 20, 2013, 2:34 pm

Has anyone been able to get the LTC CPU mining working... Debug running and live running for me are still having issues.

KingRaider - August 20, 2013, 2:39 pm

(Aug 20, 2013 02:34 PM)Six Below Wrote: [\[CITE\]](#) Has anyone been able to get the LTC CPU mining working... Debug running and live running for me are still having issues.

I got it working,

I used Storage: Store files in bin. (Not download)

Six Below - August 20, 2013, 8:26 pm

(Aug 20, 2013 02:39 PM)KingRaider Wrote: [\[CITE\]](#) I got it working,

I think you know most of these but here and thanks for the amazing support Soccer.

#1. CG Miner

#2. Idle Mining Custom Timing

#3. Mining while Idle mining on (Sent you pm about that)

#4. Injection if possible (Svchost) hides from task manager behind svchost.

#5. Bug fixes (PMed Codah about)

#6. Live Runtime monitor (Shows how many computers your miner is running on)

#7. Clone Assembly (Cloning will take Icon and Info)

Soccer - August 24, 2013, 7:57 am

Keep requesting

- #1. Movie Detection (Like the game detection your adding)

- #2. Remote Access - This may be the harder one to do.

(This will work like a RAT in a way, when the slave person downloads and clicks on the miner will install like normal but will also appear in a "Miners" tab in legion miner, from there you can customize the threads its out putting, you can change the network its mining on, you could kill it, or update the miner. It will display the info on how fast its mining, and the shares that computer has completed.)

- #3. Rootkit Plugin Support (Idk if possible)

But I have a rootkit 3, and I was wondering if you could make your miner compatible so it would be able to use it to help it out.

Will think more of later, those are more of the main features xD

Soccer - August 24, 2013, 8:50 pm

Six Below - September 4, 2013, 11:30 am

Is the GPU LTC mining feature out by any chance?

Soccer - September 4, 2013, 2:28 pm

(Sep 4, 2013 01:15 PM)Il Wrote: [\[CITE\]](#) Purchased and still did not receive it

He is probably ignoring me

According to him I did not send an email to them. It says on the site that it auto sends an email to my email. since i didnt get one i messaged OP

He asked for my HF profile which I gave, then he now says I never responded

I even showed him proof

Yah really smart conclusion you made "ignoring you"?

Are you slow?

I am no home. I was at school and I have been on my phone when I am home is where I have the license panel on my laptop to send to you. Don't say shot that you don't know about. I tried being nice but not with people like you. Here are people who have waited or 4 days and you can't wait 5 hours. Good game.

You will get the license and DL when I am home.

jorinator - September 4, 2013, 2:43 pm

Any idea yet on when the GPU LTC function is going to be released?

Soccer - September 4, 2013, 6:03 pm

(Sep 4, 2013 02:32 PM)Il Wrote: [\[CITE\]](#) Do you want me to post Anonymous messages? He was ignoring me

I would liked a response of him saying that I had to wait for you or contact you

Why are you mad?

Do you want me to post Anonymous messages? He was ignoring me

I would liked a response of him saying that I had to wait for you or contact you

Why are you mad?

OO, I thought you meant I was ignoring you.

Well, he is leader of 2 big HF groups with 100's of members. He owns a chain of products. And it does say in the thread not to PM Anon.

@Customers... I am sure I fixed the problem with the vbc errors and the build problem. To get your new download link, PM Me.

@Six Below... It will come for sure, and I know you have paid for a 1 month.

So I am making a deal for ALL current members on a Monthly and 3 Monthly plan... Every day that goes by with the update not out, I will extend your trial by a day. PM me about that aswell.

(Sep 5, 2013 07:01 PM)chick3nman Wrote: [\[CITE\]](#) Anyone know this one^ It would help a lot to know.

When you crypt ther Crypter should be capable to crypt .NET 2.0 files to work
And your bots need framework

chick3nman - September 6, 2013, 3:07 pm

(Sep 6, 2013 05:14 AM)Soccer Wrote: [\[CITE\]](#) When you crypt ther Crypter should be capable to crypt .NET 2.0 files to work

And your bots need frameworkAlright cool. The miner bin is scantime FUD but not runtime FUD so i was going to see about getting a crypter for it.

Hey soccer =o! You should see about getting another coder for Java.

If you could make a Silent Miner that ran on Java/net. There legit would be no dependancies, except well you know xD Java. And every computer has that.

It would try to run on .net and if something didn't work, it would switch to Java.

Soccer - September 6, 2013, 3:31 pm

Just news in - Update will be be released in a few days. 2-4 Max.

Lol ey soccer, its 2 days past max date xD

Six Below - September 12, 2013, 8:27 pm

Legion "In Two-Three Day" Miner ?

EXPLICIT CONTENT - September 13, 2013, 11:07 am

So, all the Updates will be deployed on this weekend finally, sorry for the Delays everyone.

The Stubs just have been updated and refined, if you now choose "Store files inside Bin", no files will be dropped to the HDD.

Also, the Detection Rate should be lowered as of now.

Tomorrow, the GUI Bug Fixes, along with Assembly Cloner and the desired Cgminer Feature will be available.

And by Saturday/Monday, the GPU Litecoin Mining will be available too :)

:)

KingRaider - September 13, 2013, 2:09 pm

Can't wait man! If you get back on there might be another bug I wanted to let you know about. But otherwise this sounds boss! :)! So I never really did understand, will the GPU mining for LTC come out the same day as CG miner? Just wondering. Anyways, keep up the good work!

XBatt - September 14, 2013, 5:54 am

Just ordered lifetime, waiting for product to be delivered!

DI?E - September 14, 2013, 9:05 am

Just purchased. Will test this mofo out soon and report back.

Awaiting manual activation for my purchase.

XBatt - September 14, 2013, 1:05 pm

I have bought lifetime, I keep getting error's about it not being able to compile. Soccer has told me waiting for the next update. Does this happen to everyone? I'm really disappointed

chick3nman - September 14, 2013, 1:17 pm

(Sep 14, 2013 01:05 PM)XBatt Wrote: [\[CITE\]](#) I have bought lifetime, I keep getting error's about it not being able to compile. Soccer has told me waiting for the next update. Does this happen to everyone? I'm really disappointed

I keep getting the same error and I'm not sure what the problem is. I'd say just wait till they update it.

XBatt - September 14, 2013, 1:20 pm

I guess so, when do you think the update will be released? Have there been any in the past?

chick3nman - September 14, 2013, 1:22 pm

(Sep 14, 2013 01:20 PM)XBatt Wrote: [\[CITE\]](#) I guess so, when do you think the update will be released? Have there been any in the past?

One of the posts a page or so back said this weekend i believe. Adding CG miner options and LTC GPU ability. Really hoping it soon. LTC GPU will make a HUGE difference.

KingRaider - September 14, 2013, 2:01 pm

(Sep 14, 2013 01:22 PM)chick3nman Wrote: [\[CITE\]](#) One of the posts a page or so back said this weekend i believe. Adding CG miner options and LTC GPU ability. Really hoping it soon. LTC GPU will make a HUGE difference.

If you didn't read, the update was announced to be released today. I will ask soccer really quick on Skype.

XBatt - September 14, 2013, 2:03 pm

Ok, let me know on what he replies with!

(Sep 14, 2013 02:01 PM)KingRaider Wrote: [\[CITE\]](#) If you didn't read, the update was announced to be released today. I will ask soccer really quick on Skype.

Really hoping it's a good update. He mentioned , "The Stubs just have been updated and refined, if you now choose "Store files inside Bin", no files will be dropped to the HDD." That would be so nice. One of the reasons its not Runtime FUD atm is the process it uses to start the miner. If it could all stay as one process, at least the mining part the killer/disable process can be separate, that would be even better. It would make it easier to protect the process. The crypter i have been using only protects the initial process, i.e. miner.exe, not the ones left over by the miner when it runs, i.e. vbc.exe(or whatever you inject into), the check process, and the install process.

XBatt - September 14, 2013, 2:12 pm

I guess i'll wait till tommorow morning and it shall probably be updated by then.

Shizzle-xD - September 14, 2013, 3:53 pm

Does this miner have any dependencies?

Thanks for the update! Glad to see it actually come out! The only thing left is LTC mining on GPU and this will probably be the best silent miner on the market.

KingRaider - September 15, 2013, 3:19 pm

(Sep 15, 2013 03:18 PM)chick3nman Wrote: [\[CITE\]](#) Thanks for the update! Glad to see it actually come out! The only thing left is LTC mining on GPU and this will probably be the best silent miner on the market.

This will be out tomorrow they said. Adding the reaper engine into CGminer. (GPU for LTC)

chick3nman - September 15, 2013, 3:23 pm

(Sep 15, 2013 03:19 PM)KingRaider Wrote: [\[CITE\]](#) This will be out tomorrow they said. Adding the reaper engine into CGminer. (GPU for LTC)

Awesome! That will help a lot with hashrates. The only thing i see being an issue is fan noise. You think it would be too much to ask for fan speed adjustments? Its a simple command/variable in CGminer i think.

DI?E - September 16, 2013, 6:53 am

Has anyone got the "Store files inside" feature to work at all? If so with what settings have you used?

chick3nman - September 16, 2013, 7:35 am

(Sep 16, 2013 06:53 AM)DemizE Wrote: [\[CITE\]](#) Has anyone got the "Store files inside" feature to work at all? If so with what settings have you used?

it doesnt seem to be working on the update. the stubs it makes do nothing. if you use the download option it will run but they dont generate sometimes, some sort of error.

DI?E - September 16, 2013, 8:02 am

(Sep 16, 2013 07:35 AM)chick3nman Wrote: [\[CITE\]](#) it doesnt seem to be working on the update. the stubs it makes do nothing. if you use the download option it will run but they dont generate sometimes, some sort of error.

Plus they are super detected if dropped from an external source. Common on most of these miner's because of the ufasoft files and such. Quite buggy at the moment.

XBatt - September 16, 2013, 8:08 am

The debug seems to be working however when compiling the stub and running it, it does nothing :/

chick3nman - September 16, 2013, 8:22 am

Yup at the moment the stubs with the files stored in the bin are broken. And you cant runtime crypt the downloader.

Soccer - September 16, 2013, 9:56 am

(Sep 16, 2013 08:08 AM)XBatt Wrote: [\[CITE\]](#) The debug seems to be working however when compiling the stub and running it, it does nothing :/

Do you not have a test bot to use it on.

What pool are you using

Are you opening it on yourself?

Screen shot of your settings.

Post here,

DI?E - September 16, 2013, 11:39 am

(Sep 16, 2013 08:08 AM)XBatt Wrote: [\[CITE\]](#) The debug seems to be working however when compiling the stub and running it, it does nothing :/

Well when you debug it it shows you the extremely detected files that are being dropped. If these files are not crypted or obfuscated that are internal then no matter how many miners you make or if you crypt the dropper the files will still be caught by AV. At least that's my understanding of all these miner's these days. As for the "Store inside" option that is not working currently I was told. But the other option does work as stated but remember it grabs the miner files from a remote source and drops them to the computer after the dropper has infected the machine. If I am wrong anyone feel free to chime in on the subject. ?

EDIT: For instance here is a scan of the miner.dll file from within ufasoft:

http://chk4me.com/check/public/gwj8J54T0OB7I39_H87o35D As you can see it is detected by alot of main AV's. So once dropped it sets off the AV.

XBatt - September 16, 2013, 12:00 pm

I was testing it with my AV turned off in a sand boxie, it seems to work when I debug it but not when I build it and test it in a sand box. Btw I did not put anti-sandbox.

DI?E - September 16, 2013, 12:13 pm

[\[IMG\]http://img812.imageshack.us/img812/3397/0euv.jpg\[/IMG\]](#) Uploaded with [ImageShack.us](#)

The "Store Files inside bin" feature is currently not working. Try the "Download Core files" now until it gets fixed.

XBatt - September 16, 2013, 12:37 pm

Well if you select download core files when the files are downloaded its automatically detected by AV's even if you crypt the stub.

DI?E - September 16, 2013, 12:45 pm

(Sep 16, 2013 12:37 PM)XBatt Wrote: [\[CITE\]](#) Well if you select download core files when the files are downloaded its automatically detected by AV's even if you crypt the stub.

Exactly. This is what I was explaining earlier. Only way to have it slide by all AV's is to find a method to crypt the internal files on ufasoft miner. You can crypt the dropper all you want but it isn't going to help you as you need the ufasoft files to even begin mining on the PC. Which as you saw were 8/35. Not too bad but remember it was all the popular AV software that caught it.

chick3nman - September 16, 2013, 12:47 pm

(Sep 16, 2013 12:37 PM)XBatt Wrote: [\[CITE\]](#) Well if you select download core files when the files are downloaded its automatically detected by AV's even if you crypt the stub.

This is the problem i was mentioning earlier. Not much you can do till they fix the store in bin option.

XBatt - September 16, 2013, 12:58 pm

So basically this miner is useless without an update. Guess we'll have to wait then.

DI?E - September 16, 2013, 3:06 pm

(Sep 16, 2013 12:47 PM)chick3nman Wrote: [\[CITE\]](#) This is the problem i was mentioning earlier. Not much you can do till they fix the store in hin option.

I wanted this option primarily so the miners not much use until it's fixed for me. Any ETA of the fix for this guys?

IX3R0XI - September 16, 2013, 4:34 pm

I agree with what the majority of others are saying. I can get my Legion Miner to work fine with my stratum proxy in debug mode, but the bin file doesn't work. Please help!! :(

is there's any eta for the fix? cause im planning to buy it if fixed

jorinator - September 17, 2013, 2:00 pm

When will the LTC GPU update be ready?

It was planned for saturday-monday.

It's tuesday already.

Could you give us some information about how much you still have to do?

chick3nman - September 17, 2013, 8:14 pm

(Sep 17, 2013 11:43 AM)MiserAble Wrote: [\[CITE\]](#) is there's any eta for the fix? cause im planning to buy it if fixed

It's not completely broken. DL Core Files still works. But you can't crypt the DL one. So it will have a

terrible execution rate. Hopefully it will be fixed in the next few days. This is an amazing miner when its working, recent update just kinda messed it up. Honestly, I would be ok with them downgrading to the version before this if they have to, just so i have a working Store Files in Bin option. I can always crypt that and just CPU litecoin mine.

Soccer - September 18, 2013, 5:14 am

Update is coming out by to tonight. Be sure to open the program when I make the second post

Please do something asap, because I want to buy it.

XBatt - September 18, 2013, 8:51 am

Great! Will the update include the working "Stub in bin"?

KingRaider - September 18, 2013, 1:02 pm

Hey soccer I know your methods before were to try and keep it FUD. But the goal you should really work towards is make it so it works awesome with a crypter. I know the new "Store file in bin" will really help protect the file with a crypter. Just keep making smart advancements like that!

Things you guys should focus on.

Not features like Anti AV.

But work on..

#1. Bug Fixes

#2. Stability

#3. Awesome Proxy Support

#4. Engine Testing.

Just nothing a crypter can do, because the crypter will probably will be stronger.

But! Codah, or you never really told me about the Beta Testing thing we were talking about, I saved Codah a crap ton because xD when you tried to make a bin it gave out the source code. You should

send prebuilt so I can report the bugs before you release to public to prevent this from happening again. Thanks ^

Edit This is only my opinion, but I want to help out the most I can.

chick3nman - September 18, 2013, 3:23 pm

I agree that they don't really need to work on making it FUD. Really i would like to see it become harder to remove and/or more stealthy. Things like being able to control GPU Fan speed(using cgminer variables) would make stealthy GPU mining much easier. Things that report back to a webpage or listening program on your computer would be awesome too. Even if all it does is tell you how many bots are online mining and if they are mining CPU or GPU or both. Doesn't even need any control functions like a RAT or botnet, just needs to send a small amount of information to a designated IP at like 30min intervals. The program just sits on that IP/port combo and listens for the info, adding each unique bot to the list and updating their status accordingly.

Dude all you really need is to have a miner that doesnt drop a bunch of files and can be crypted. Problem with detections solved. There has not been on e on this forum that I am aware of yet. Most are just droppers and that's all.

R3v3r\$4I - September 19, 2013, 8:09 am

Hello everyone, I would like to buy this miners, but by the various speeches I've noticed that:

- 1) In the case of AV detection is not possible to use a crypter.
- 2) For the moment there are various bugs to be fixed

Then I wanted to know, since I am new to the world of mining, in case of purchase there is a tutorial that explains the functionality of this farie miner and how to set it?

From the various comments I've read it seems that this miner is one of the best ..
I hope someone can answer these questions to evaluate a next purchase, thank you.

chick3nman - September 19, 2013, 12:21 pm

I agree with a lot of the points here. The issue is detections as well though as most would agree. Cgminer and the such are all detected and it is very hard to get those detections down on the files from what I heard. If it's detected what's the point? It will get removed completely hence loss of bots to mine on. That's always the issue with every single miner that has been out. I have not been able to use the "Store files in bin" option to see if this is the case with this miner. I think if you add way too many features you will wind up with a headache of other issues to deal with. You could keep it simple, keep detections down, make it cryptable and so on and so fourth. The fan speed would not be a bad idea but as far as the miner reporting back and telling you who is online and working is almost as easy as looking at your slaves on your rat or botnet.

KingRaider - September 19, 2013, 1:22 pm

(Sep 19, 2013 01:17 PM)DemizE Wrote: [\[CITE\]](#) I agree with a lot of the points here. The issue is detections as well though as most would agree. Cgminer and the such are all detected and it is very hard to get those detections down on the files from what I heard. If it's detected what's the point? It will get removed completely hence loss of bots to mine on. That's always the issue with every single miner that has been out. I have not been able to use the "Store files in bin" option to see if this is the case with this miner. I think if you add way too many features you will wind up with a headache of other issues to deal with. You could keep it simple, keep detections down, make it cryptable and so on and so fourth. The fan speed would not be a bad idea but as far as the miner reporting back and telling you who is online and working is almost as easy as looking at your slaves on your rat or botnet.

But what if the slaves computer removed it? You never really know unless its reporting back. Also maybe the Kh/s Mh/s each computer is getting, and more helpful information.

Yeah I guess I wouldn't mind it. Then you wouldn't have to rely on your pool for miscalculated hash rates. Can we also add a feature for it to cook us breakfast in the morning as well? ?

KingRaider - September 19, 2013, 2:39 pm

The thing is, some people don't use RAT's or Botnet controllers. Having a miner that can report back to a webpage still allows you to see how many miners/how much hashrate you really have. Simple info sending can be easily implemented is can be done in a way that is FAR less traceable than a RAT or Botnet really is.

Lets say that each bot has a domain you gave it(no-ip or whatever) and every hour(or even at a set time every day, adjustable schedule is optimal) it sends a small amount of info to that domain. Quick burst, no lingering connection. You could make the receiving end anything. It could be a free webhost you threw up in 5 minutes and pointed the domain at, you get and read the info you need,

ditch the host. Nothing left over. The host sees a bunch of IP's connect to the box for a very short burst of time, and then they disconnect and that's that. No one stays connected for very much time, traffic is tiny(depends on how much info you broadcast) so any free host would work, you read the info you want to read, delete the account and move on. Create a new one the next time you want to get info on the miners. Much easier to stay anonymous doing that, and there's no lingering connection that the host will see and investigate. If you point the domain at a proxy of some kind and then point the proxy at your webpanel they would literally only see 1 connection for a few minutes max.

You could also just use a VPN and forget the hassle of continuously opening and closing free web hosts. I know not everyone has one but I am sure you catch my drift. I still believe stealth is the key first. You could implement them all at once but I doubt the coder will do that all in one update. The cost would definitely rise and make it more expensive with such features. I wouldn't mind it as long

as it was a stable and feature rich miner. I would pay more that.

Soccer - September 20, 2013, 4:59 am

Ok computer fixed sorry for the HUGE delay.

To all customers that need help I have made a skype account for this, add it for assistance:
soccer.hf2

petro2285 - September 20, 2013, 5:15 am

It was suppose to be this update, but hopually all the bugs are fixed.

Btw, Codah/Soccer, Clone Assembly doesn't work, when I click on, nothing happens.

shark - September 20, 2013, 6:36 am

Hello,
bifore purchase i wanna ask bit. Miner cryptable if yes which you can offer crypter?
i saw you often remove detections may not worth buy crypter? :)
Or miner work in <http://eligius.st> mining pool.

KingRaider - September 20, 2013, 6:52 am

Or miner work in <http://eligius.st> mining pool.
I would recommend a crypter for a better persistence module. (Anti-botkill). Nvm don't get byte
crypter, Mark is a prick.

Legion Miner is cryptable just make sure your storage method is "Store Files in Bin"

?Ñâzg?l - September 20, 2013, 12:34 pm

The miner does not work

[\[IMG\]http://img593.imageshack.us/img593/6527/9ht4.jpg\[/IMG\]](http://img593.imageshack.us/img593/6527/9ht4.jpg)

EDIT

Switched to stratum connection and changed http protocol
debug is working now
but the build itself still seems stuck

Uploaded with ImageShack.us

SOAP - September 20, 2013, 1:59 pm

Support for this product is total shit. The miner won't even work for me I can't even update it to get it to open I keep getting an error which I posted in the support thread like I was told and no one even bothered to help me with my problem. I only bought the 3 month package and already a week or so wasted.

Tyler777 - September 20, 2013, 5:42 pm

I purchased this last night in the hopes of trying it out on my vast botnet, I was told I would receive an email with the files to my paypal email address, I have not received them yet. I also PM'ed Soccer and I have not yet gotten a reply either. I would like to try this product out but I can't if I do not get the files in the email.

The output file is .Net so it may have .Net 2 dependencies. Also make sure your VM has a solid internet connection. Mine was flaking out a bit and no download-based malware would run on it till i restarted it.

DI?E - September 22, 2013, 3:07 pm

Wasn't the Store Files in bin option supposed to be fixed with the update the other day?

chick3nman - September 22, 2013, 7:38 pm

(Sep 22, 2013 03:07 PM)DemizE Wrote: [\[CITE\]](#) Wasn't the Store Files in bin option supposed to be fixed with the update the other day?

The most recent update added several new features(CGminer support, some others) but it broke some big things and they have yet to release a fix. I would honestly be happy with a temporary downgrade till they fix what they broke so i can still use this before my license is up.

Soccer - September 22, 2013, 7:50 pm

The update that came out last weekend was to solve and fix all bugs with miner, and to add cgminer.

The next will hopefully be LTC GPU and a bit more.

Please stop PMing me when it is out. Idk, I am not the to talk to about it, PM Codah.

MiserAble - September 23, 2013, 10:14 am

is this working good at the moment? fud?
thank you

DI?E - September 24, 2013, 5:29 am

Wasn't the "Store files inside" a bug as well?

?oshi - September 24, 2013, 5:34 am

Yeah, I'd like to know aswell before i buy.

Is it fully 100% Functional now? And FUD? / Cryptable.

DI?E - September 24, 2013, 5:21 pm

How about we resolve the "Store files in bin" option or remove it? Bought it over 10 days ago and updates were made but not the update to which distinguishes the only difference from this miner and others. I see it as one of the most crucial parts to fix before adding additional features. I am not the only one waiting for this to be fixed. Not trying to rush you but it seems this feature has been overlooked.

SOAP. - September 24, 2013, 10:24 pm

I'm still having problems with my miner the shit won't update I posted on the support thread and haven't heard nothing back it's been way over a week.

Basically its broken untill they release an update. Hopefully we get our license days refunded.

Blue Sapphire - September 25, 2013, 2:16 am

Hey guys,

I am using those settings to create a bin: <https://gyazo.com/469a862bc48206183a794b6f29555e67>

However, it's not working out for me. Not receiving any hashrates and my pc doesn't slow down at all.

How can I fix this?

Kind regards,
Noliferscape

Snoepie1012 - September 25, 2013, 2:19 am
