it is not a virus it simply change the cookie of the website you need yto download greasemoneky first tho

It's not working for me... I either get the video to load forever or the site it's the same as it is for free users.

It did work for me, also I looked at the script and I didn't see anything beside cookies stuff.
Pretty twisted site IMO ;P

I don't know, maybe it's because I live outside the US, even tho I used the US version of the site. I tried to work on it for an hour, then give up.

I'm not in the US either, you're most likely doing something wrong.
Be sure to follow every step.
