[VB] ALL Themes Gathered | Mega-Thread | Theme-List

Hi guys, I've seen a lot of theme "archive" on the forum but nothing about a thread "archive". I'm lying, I saw some thread like mine but none of them were updated. No need to download an application, everything is at your fingertips, just below!

If you want me to add a theme, PM me with at least this information:

Quote:Title:

Details:

None of those theme has been made by me, all credits goes to their creator. If someone doesn't want his theme on my thread, please feel free to notify me.

It will be respectful if you could give credits to those you used in your application.

He should NOT do that. Private themes are private for a reason. Not to mention that technically it would be against site rules to do so.

Personally, I think that these are the best themes on HackForums. Excellent range of controls, really unify the app's purpose and vision.

I think commercially these themes could fetch £1000 each.

EDIT: Even though obviously the other themes are also very nice and a lot of effort went into those.

If a theme has no copyright on it and there's no proof someone owns it you could... But i don't think it'd be smart because they'd get rep fucked haha.

I think yes, if you don't want to convert it(with an online tool), you can always make it a DLL.

Paste the code into a new file then run your project. When you go back to the winform designer you should have a few more controls in the top of your toolbox. Those are added by the theme.

Set maximizebox property to false. You can also set minimizebox property if you don't want it too.
