Why choose us?

We choose quality over quantity. We prefer long fud periods for our customers rather than refunds every week with a potential loss of servers, thus only a limited number of licenses will be active at a given time.

FUD Proof:

For informations and/or questions please PM [stefsot](#) or [HeliosGR](#)

PM for vouch copies.

Ignite666 - August 18, 2013, 8:49 am

Seems very nice. Are you giving out Vouch Copies? If so, i'd take one. Thank you and GLWS!

kaz7713 - August 18, 2013, 9:07 am

what is it coded in? what is the stub coded in, what software does it work with?

În??DiOuS - August 18, 2013, 9:23 am

Seems like a nice crypter, have contacted you about a business proposal!

It's coded in C# both the stub and the crypter. It's been confirmed to work with Darkcomet (no reason why it shouldnt work with others though). It supports both 32/64 bit and .NET based executables. Tested on Windows XP, Vista and Windows 7.
