Thread: [ALL OF MY DEFACEMENTS \(#FIREFIGHTSEC\)](#)

XboxJtag - August 19, 2013, 1:52 am

Defacement 1 - River Front Park:

Reasoning: By Request.

Spoiler [\(Click to View\)](#)

<http://riverfrontpark.com/>

<http://blog.riverfrontpark.com/>

<http://www.glasshousedenver.com/>

<http://oneriverfront.com/>

<http://theparkoneriverfront.com/>

<http://unionstationneighborhoodco.com/>

Well, after a bit of work, I brought these websites down at the request of a few users on here. ?

Defacement 2 - Andalusia Digital Solutions :

Reasoning: Scamming users by taking payment and then infecting with a RAT virus instead of helping users. (as reported)

Spoiler [\(Click to View\)](#)

<http://andalusiadigitalsolutions.com/>

Even simpler, it took me about 5 minutes. :)

Defacement 3 - Dev Nokia :

Reasoning: It was vulnerable. Lol.

Spoiler [\(Click to View\)](#)

<http://socal.devnokia.com/>

<http://southeast.devnokia.com/>

I'll just leave it at that.

EDIT: I made my defacement page better.

Understalker - August 19, 2013, 1:52 am

So you gave them a link to your HF profile? Why exactly would you do that if I may ask.

Nonetheless, good job.

DARPA - August 19, 2013, 1:53 am

What was your methodology good sir ?

Wasting time by looking at my profile's reputation and defacing random websites. Moreover, after deface saying that people requested them. ?

vehla - August 19, 2013, 2:36 am

(Aug 19, 2013 02:32 AM)XboxJtag Wrote: [\[CITE\]](#) You have a -38 reputation. Of course I looked at it. I was asked to deface the pages, or I wouldn't of even known of the website. Now, do us all a favor, and get off this forum, or at least do something constructive.

Again looking at reputation.. What it has to do with the topic? You just post your naked picture with horse in a weird pose and you will get 400+ rep in few minutes.

SkyRider2 - August 19, 2013, 2:41 am

Good work man, keep the skills up bro.

Are you Mentally Deranged?

For a start, you're typing like a 10 year old, you barely know what anything there means, sorry to be rude but you called him a "dumass" skid for no reason at all? you're at a hacking forum, he's sharing his work. Get over it.

I take it you are an alt. account of someone else that's already posted in this thread. I could honestly care less how "large my e-penis" is, more or less, I'm just showing a vulnerability and helping people who want help (I get at least 3 PM's every day). ???

Udumb kid?

So you deface and instead of uploading a index.html you upload a index.php which has no php in it
L33MS segit

My method doesn't use HTML files. I identified a vulnerability involving PHP and Microsoft IIS. It makes any website that has IIS vulnerable.

Highschool - August 21, 2013, 12:56 am

What's with the random PHP tags with no PHP code in them lol.

Also, why would you attempt to copy "LuulzSec" hence the "FireFightSec"

That's whack.

I wasn't trying to copy FagzSec (HF censors it, good choice HF). Just because I shortened the word "security" doesn't mean I'm attempting to copy anyone.

This specific website isn't vulnerable to my method because it has extra protection, seeings as how it's a school's webpage. Sorry.

Well if they report you and the Feds come to HF and ask Omniscient for your information, he is forced to provide it.

Remove all your information from the Defacement Pages just to be safe.

The Libertine - August 21, 2013, 3:13 am

good job, deface page is clean and simple, yeah :)

Why would you deface a business website. Its just senceless crime. Its like spray painting a wall

cause you can.

Why would you join a hacking forum if you're going to be butthurt over someone hacking? That's like going to the doctor and getting mad at him after he tells you that you're sick.

JW1337 - August 21, 2013, 5:01 am

nice work, quite a few sites you've defaced :D , enjoy your new enlarged e-penis ^^
