Here's a funny prank I wanted to share with you. maybe you can do it your friends, Anyway I'm on wifi and every now and then a few of my hacker buddies come over and hang out and hack shit together.

Well they came by this pass weekend and I'd thought I'd fuck with them alittle. So before they came by I changed my wifi name to FBI Van #7 and when they connected they started freaking out, looking out windows nshit. I went along with it but had to keep myself from laughing. I used "NetCut" and cut them offline and texted my neighbor and told him to bang on my door and say "Open up! it's the FBI!" ..lmfao! omfg I never seen 2 grown men freak out so bad. I just looked at both of them and said "Owned"! They were both pissed! LOL@idc

Try it, see if you get the response I did.

Best prank ever!

EDIT: Sorry meant to post this in the lounge, plz move ?

That's a good idea, but I don't think my friends would fall for it. Would probably scare my neighbors that see my wifi signal though haha.
