Thread: [Anyone tried greenscreen for VCW? \[Waving, 1,2,3,4 fingers etc.?\]](#)

CatDoge™ - August 20, 2013, 1:41 pm

So, i watched around some videos with good content to ewhore (masturabte, show boobs,...) but no waves or something!

The Pros are that in some videos the notebook is on there stomach and they are lying on their bed, so you don't see their hands during they type (chatloop)

Did anyone try to record their own hand in a greenscreen for waving or something?

It is actually really easy to make it look legit. you could track her eyes so the hand follows the camera motion, then lower the resolution of your selfmade hand and then just matching some colors to the light in the room (most of them are dark)

Do you think that could work? ?

If so, I could bring some VCWs out :b

This is a refreshing idea!

In fact, this is the most creative thing I've read in a while.

It should be possible to do this, but I guess it's very time consuming.

But if you can fake the hand and match it with the VCW, you're going to get a great show.

The making of this VCW would be very interessting, but I guess it's easier to get a VCW which has a show and all the stuff like finger, wave.

Yeah sure, but for a very good VCW you must pay the cammodel or you must buy one^^ or in my case just invest some time (maybe 1-2 hours for recording, tracking, setting up the scene, final rendering)

i mean the only thing to do is to proof the buyer that you are real and not fake! not many (UN)saturated VCWs have all options! And the other thing is that your VCW must be very hot :P and if you just search webcam on a p*rn site you will find thousands of videos that will match to this what I said (hands not shown).

Sorry dor double post but I wnt to push and here is a test that I made with a photo, its not good i know ubt yeah:
