WormLock v1.0

[img]http://i482.photobucket.com/albums/rr189/aporyto/WormLock/scr1_zpscbbf619f.png~original[/img]
[img]http://i482.photobucket.com/albums/rr189/aporyto/WormLock/src2_zps0e27dd31.png~original[/img]

What is WormLock?

WormLock is a Survey Locker. It locks slave's PC and asks to complete a survey in order unlock the PC.

With the right use you can easily make some mad cash.

It has better results by Downloading and Executing on slaves machines, rather than spreading it.

Features

?Disables Task Manager

?Disables Explorer

?Disables cmd

?Disables msconfig

?Startup Installation

?After entering unlock key, automatically removes itself

?FUD

General

It has .NET dependency.

The builder needs .NET 4 and the output file, it only requires .NET 2

So yeah make sure your slaves have .NET installed. (90% of Windows machines have .NET installed these days.)

Tested on Windows XP, Vista and 7.

It is still v1.0 so maybe there are bugs.

Please feel free to report them.

It will be a free survey locker and i am planning on adding more features in the future.

Do not scan the builder or the outputed file on virustotal, or into any service that distributes samples.

You will make it detected fast.

That is really gay..

Forcing people to do surveys..

Well yea.. your choice.

Helios. - August 20, 2013, 3:59 pm

Rating, Mining (draining their cpu and gpu),keylogging.. (i can continue that list) them is not gay?

You are on Hacking Forum, what did you expect?

Also this is not new, there are already Survey Builders, use search.

Most of them are paid and i am giving it for free...

stefstot - August 22, 2013, 7:31 am

Great program to make some cash from slaves.

No need to buy any of these in the market, since this is as good and free.

strongboy54 - August 22, 2013, 7:34 am

Thanks for this share. If I ever get into RATing properly I will definitely use this.

Ricky? - August 22, 2013, 7:48 am

Greta program if I get into ratting later I will use this for sure!

Looks cool, although I can't see myself being evil enough to do this to someone..

Surveys are evil.

explriz - August 24, 2013, 9:12 am

Great Software but when the user do the survey it can easily do other staff on his browser :/

i would like to try this one out seems interesting :P

Xlere - August 26, 2013, 1:44 pm

Its great! Thank you very much! :) :)

topstar - August 27, 2013, 3:11 pm

Thank for this , tested it in vmware and its working good.

One Tipp: Do not open a new IE window because the victims can simply google a solution or surf on facebook while locked :D.

Make a new .Net form with a browserwindow without IE controls

Would you share the source ?

jacob20023 - August 27, 2013, 3:12 pm

As mentioned to my first post, DO NOT upload to VirusTotal, but i guess kids like you have already scanned it there.

If so, then it will probably be detected by AVs soon.

Of course safe mode can be used to remove any malware from your pc especially ransomware/pc lockers etc.

Have you ever used it? You can not use any alt+f4 or whatever you try...

Please don't post things that you haven't tried/tested...
