Thread: [Select/Unselect ALL Checkboxes](#)

ExaNet - August 20, 2013, 4:40 pm

I have tried probably over around 10 different Javascript and JQuery scripts for this and haven't been able to get one to work. This is my current script:

Here's the JQuery import...

Code <html>

<head><script>

src="//ajax.googleapis.com/ajax/libs/jquery/1.4.3/jquery.min.js"></script></head></html>

Here's the function...

Code <script>

```
function toggleChecked(status) {  
    $("#checkboxes input").each( function() {  
        $(this).attr("checked",status);  
    })</script>
```

And here's the HTML...

Code <input type="checkbox" onclick="toggleChecked(this.checked)"> Select / Deselect All

<div id="checkboxes">

<input type="checkbox" class="checkbox" />

<input type="checkbox" class="checkbox" />

<input type="checkbox" class="checkbox" />

</div>

It makes all of the check boxes but when you click the select all, it doesn't do a thing to the other boxes.

You forgot to close your function's brace.

Why not just using something simple like this <http://jsfiddle.net/xHCwJ/>

Why not just using something simple like this <http://jsfiddle.net/xHCwJ/> The fiddle you posted didn't work either. :/

The code I added:

Code <script language="javascript">

```
$('#checkall:checkbox').change(function () {  
    if($(this).attr("checked")) $('input:checkbox').attr('checked','checked');  
    else $('input:checkbox').removeAttr('checked');  
});</script>
```

<input type="checkbox" name="all" id="checkall" />Check All</br>

<input type="checkbox" class="cb-element" /> Checkbox 1</br>

<input type="checkbox" class="cb-element" /> Checkbox 2</br>

<input type="checkbox" class="cb-element" /> Checkbox 3

Dave85 - August 20, 2013, 11:12 pm

I updated with a new fiddle:<http://jsfiddle.net/xHCwJ/388/>

Also use `<script type="text/javascript">` not `<script language="javascript">`

And you call the script after page loaded.

Also use `<script type="text/javascript">` not `<script language="javascript">`

And you call the script after page loaded. It's still not working. :(

Like I said, I've tried sooo many different scripts. I have no idea what's wrong.

I guess you wait me to post code ?

```
Code <!doctype html>
<html lang="en">
<head>
<meta charset="UTF-8">
<title>Test</title>
<script type="text/javascript"
src="http://ajax.googleapis.com/ajax/libs/jquery/1.10.2/jquery.min.js"></script>
<script type="text/javascript">
$(document).ready(function(){
    $('#checkall').on('click', function () {
        $('#yourform').find(':checkbox').prop('checked', this.checked);
    });
})
</script>
</head>
<body>
<form id="yourform">
<input type="checkbox" name="all" id="checkall" />Check All<br>
<input type="checkbox" class="cb-element" /> Checkbox 1<br>
<input type="checkbox" class="cb-element" /> Checkbox 2<br>
<input type="checkbox" class="cb-element" /> Checkbox 3
</form>
</body>
</html>
```

</script>  
</head>  
<body>  
<form id="yourform">  
<input type="checkbox" name="all" id="checkall" />Check All</br>  
<input type="checkbox" class="cb-element" /> Checkbox 1</br>  
<input type="checkbox" class="cb-element" /> Checkbox 2</br>  
<input type="checkbox" class="cb-element" /> Checkbox 3  
</form>  
</body>  
</html>
```

I put exactly every thing you have there into file and it still isn't working. Do you think it's because it's a .php file?

Dave85 - August 20, 2013, 11:38 pm

just save it as file.html and then open.

ExaNet - August 20, 2013, 11:43 pm

(Aug 20, 2013 11:38 PM)Dave85 Wrote: [\[CITE\]](#) just save it as file.html and then open. That's what I did. And I just said it fucks up all of my other stuff. In uBot, it does what I'm wanting it to do. Select users from a table based on attributes. And it was working in .php file type. So there should be a way to get it to work without renaming it to .html right?

This is what it does when I rename it to .html.

Dave85 - August 21, 2013, 12:29 am

Fit the previous script with yours, dont change anything.

ExaNet - August 21, 2013, 12:34 am

(Aug 21, 2013 12:29 AM)Dave85 Wrote: [\[CITE\]](#) Fit the previous script with yours, dont change anything. I did! And I know I didn't mess it up cause when I changed the extension to .html the checkboxes worked fine! It just screwed up everything else.
