Thread: [HTML, XHTML & CSS For Dummies](#)

hazardgkt - August 22, 2013, 12:21 pm

Hello everyone. I've decided to release an e-book to help out those of you who are interested in learning how to code in HTML, XHTML, and CSS. Please don't just take this without saying anything, at least post & say thanks :) Many people seem to believe you shouldn't read books and that you should just practice, I say you should do both of them. If you're interested in learning then read this book & practice that way you'll have more knowledge then someone who's coding, but doesn't necessarily know everything he's exactly doing.

<http://www.sendspace.com/file/14vd8n>

I will be releasing more so stay on the look out.

?

Rublinded - August 22, 2013, 12:39 pm

cant open it.. when I click on the link it just blinks and does nothing

hazardgkt - August 22, 2013, 2:20 pm

^ Idk, try a different browser or something. If it still isn't work I can upload it else where for you.

HappyFace - August 22, 2013, 2:24 pm

Looks good man. Would be nice if you made Javascript and php for dummies :D

hazardgkt - August 22, 2013, 2:31 pm

Well why not? I've just uploaded a PHP for dummies right now. I don't give a shit about javascript, therefor I don't have any of those books. I have MANY more books, but I'll release them later.
