Thread: [isr stealer help!](#)

insha10 - August 23, 2013, 1:04 am

After setting everything up and building the server i cant see my passwords which are stored in mozilla, in the logs!

i just shows some isrs tealer test logs not the ones i have saved!what am i doing wrong?i also sent the sever.exe to my friend and i cant see his logins either?!?

wt am i doing wrong/

may be the version you're trying doesn't support firefox, the latest one.

I'd tried 6.3 but I only got old opera's saved logs & that of file zilla's.

it's no more useful, use sys logger, it's very good keylogger.

im using ISR stealer 0.4!Its readme says that it supports all versions of firefox and chrome and more

any luck?

0.4? or do you mean 6.4?

I could only get 6.3 no any later version, may be there isn't launched any after 6.3 officially.

While it may had supported all version in it's time but now security of browsers is much more than the past, without any antivurs Opera latest & Chromes do protect their users, don't know about Firefox as I haven't tried that browser.

ISR stealer is so old it's completely outdated. In the readme it says it works on all versions because years ago it did but now it doesn't that's why you won't get any passwords from it.
